| Preface | vii |
| HEAD, M.J. & GIBBARD, P.L. Early–Middle Pleistocene transition: an overview and recommendation for the defining boundary | 1 |
| MASLIN, M.A. & RIDGWELL, A.J. Mid-Pleistocene revolution and the ‘eccentricity myth’ | 19 |
| SCHEFUß, E., JANSEN, J.H.F. & SINNINGHE DAMSTÉ, J.S. Tropical environmental changes at the mid-Pleistocene transition: insights from lipid biomarkers | 35 |
| JAHN, B., SCHNEIDER, R.R., MÜLLER, P.-J., DONNER, B. & RÖHL, U. Response of tropical African and East Atlantic climates to orbital forcing over the last 1.7 Ma | 65 |
| HAYWARD, B.W., GRENFELL, H.R., SABAA, A.T. & SIKES, E. Deep-sea benthic foraminiferal record of the mid-Pleistocene transition in the SW Pacific | 85 |
| REALE, V. & MONECHI, S. Distribution of the calcareous nannofossil <i>Reticulofenestra asanoi</i> within the Early–Middle Pleistocene transition in the Mediterranean Sea and Atlantic Ocean: correlation with magneto- and oxygen isotope stratigraphy | 117 |
| FERRETTI, P., SHACKLETON, N.J., RIO, D. & HALL, M.A. Early–Middle Pleistocene deep circulation in the western subtropical Atlantic: southern hemisphere modulation of the North Atlantic Ocean | 131 |
| SUC, J.-P. & POPESCU, S.-M. Pollen records and climatic cycles in the North Mediterranean region since 2.7 Ma | 147 |
| CAPRARO, L., ASIOLI, A., BACKMAN, J., BERTOLDI, R., CHANNELL, J.E.T., MASSARI, F. & RIO, D. Climatic patterns revealed by pollen and oxygen isotope records across the Matuyama–Brunhes Boundary in the central Mediterranean (southern Italy) | 159 |
| BYRAMI, M.L., NEWNHAM, R.M., ALLOWAY, B.V., PILLANS, B., OGDEN, J., WESTGATE, J. & MILDENHALL, D.C. A late Early Pleistocene tephrochronological and pollen record from Auckland, New Zealand | 183 |
| DODONOV, A.E. The stratigraphic transition and suggested boundary between the Early and Middle Pleistocene in the loess record of northern Eurasia | 209 |
| VAN KOLFSCHOTEN, T. & MARKOVA, A.K. Response of the European mammalian fauna to the mid-Pleistocene transition | 221 |
| O’REGAN, H.J., BISHOP, L.C., LAMB, A., ELTON, S. & TURNER, A. Large mammal turnover in Africa and the Levant between 1.0 and 0.5 Ma | 231 |
| PALOMBO, M.R., RAIA, P. & GIOVINAZZO, C. Early–Middle Pleistocene structural changes in mammalian communities from the Italian peninsula | 251 |
| PALOMBO, M.R. & VALLI, A.M.F. Highlighting the Early–Middle Pleistocene transition in Italian and French large-mammal faunas: similarities and faunal renewals | 263 |
| CUENCA-BESCÓS, G., ROFES, J. & GARCIA-PIMIENTA, J. Environmental change across the Early–Middle Pleistocene transition: small mammalian evidence from the Trinchera Dolina cave, Atapuerca, Spain | 277 |
| M McNABB, J. Hominins and the Early–Middle Pleistocene transition: evolution, culture and climate in Africa and Europe | 287 |
| PETRAGLIA, M.D. Hominin responses to Pleistocene environmental change in Arabia and South Asia | 305 |
| Index | 321 |
