

Weddell Sea Tectonics and Gondwana Break-up

Geological Society Special Publications
Series Editor A.J. FLEET

GEOLOGICAL SOCIETY SPECIAL PUBLICATION NO. 108

Weddell Sea Tectonics and Gondwana Break-up

EDITED BY

B. C. STOREY, E. C. KING and R. A. LIVERMORE
British Antarctic Survey

1996
Published by
The Geological Society
London

THE GEOLOGICAL SOCIETY

The Society was founded in 1807 as the Geological Society of London and is the oldest geological society in the world. It received its Royal Charter in 1825 for the purpose of 'investigating the mineral structure of the Earth'. The Society is Britain's national society for geology with a membership of around 7500. It has countrywide coverage and approximately 1000 members reside overseas. The Society is responsible for all aspects of the geological sciences including professional matters. The Society has its own publishing house, which produces the Society's international journals, books and maps, and which acts as the European distributor for publications of the American Association of Petroleum Geologists, SEPM and the Geological Society of America.

Fellowship is open to those holding a recognized honours degree in geology or cognate subject and who have at least two years' relevant postgraduate experience, or who have not less than six years' relevant experience in geology or a cognate subject. A Fellow who has not less than five years' relevant postgraduate experience in the practice of geology may apply for validation and, subject to approval, may be able to use the designatory letters C Geol (Chartered Geologist).

Further information about the Society is available from the Membership Manager, The Geological Society, Burlington House, Piccadilly, London W1V 0JU, UK. The Society is a Registered Charity, No. 210161.

Contents

KING, E. C., LIVERMORE, R. A. & STOREY, B. C. Weddell Sea tectonics and Gondwana break-up: an introduction	1
CURTIS, M. L. & STOREY, B. C. A review of geological constraints on the pre-break-up position of the Ellsworth Mountains within Gondwana: implications for Weddell Sea evolution	11
DiVenere, V., Kent, D. V. & I. W. D. Dalziel Summary of palaeomagnetic results from West Antarctica: implications for the tectonic evolution of the Pacific margin of Gondwana during the Mesozoic	31
Brewer, T. S., Rex, D., Guise, P. G. & Hawkesworth, C. J. Geochronology of Mesozoic tholeiitic magmatism in Antarctica: implications for the development of the failed Weddell Sea rift system	45
Grantham, G. H. Aspects of Jurassic magmatism and faulting in western Dronning Maud Land, Antarctica: implications for Gondwana break-up	63
Reimer, W., Miller, H. & Mehl, H. Mesozoic and Cenozoic palaeo-stress fields of the South Patagonian Massif deduced from structural and remote sensing data	73
Storey, B. C., Vaughan, A. P. M. & Millar, I. L. Geodynamic evolution of the Antarctic Peninsula during Mesozoic times and its bearing on Weddell Sea history	87
Richards, P. C., Gatliff, R. W., Quinn, M. F., Williamson, J. P. & Fannin, N. G. T. The geological evolution of Falkland Islands continental shelf	105
Jokat, W., Hübscher, C., Meyer, U., Oszko, L., Schöne, Versteeg, W. & Miller, H. The continental margin off East Antarctica between 10°W and 30°W	129
Hunter, R. J., Johnson, A. C. & Aleshkova, N. D. Aeromagnetic data from the southern Weddell Sea embayment and adjacent areas: synthesis and interpretation	143
McAdoo, D. C. & Laxon, S. W. Marine gravity from Geosat and ERS-1 altimetry in the Weddell Sea	155
Hübscher, C., Jokat, W. & Miller, H. Crustal structure of the Antarctic continental margin in the eastern Weddell Sea	165
Leitchenkov, G. L., Miller, H. & Zatzepin, E. N. Structure and Mesozoic evolution of the eastern Weddell Sea, Antarctica: history of early Gondwana break-up	175
Jacobs, J., Kaul, N. & Weber, K. The history of denudation and resedimentation at the continental margin of western Dronning Maud Land, Antarctica, during break-up of Gondwana	191
Hübscher, C., Jokat, W. & Miller, H. Structure and origin of southern Weddell Sea crust: results and implications	201
King, A. C. & Bell, A. C. New seismic data from the Ronne Ice Shelf, Antarctica	213
Livermore, R. A. & Hunter, R. J. Mesozoic seafloor spreading in the southern Weddell Sea	227
Roeser, H. A., Fritsch, J. & Hinz, K. The development of the crust off Dronning Maud Land, East Antarctica	243
Nogi, Y., Seama, N., Isezaki, N. & Fukuda, Y. Magnetic anomaly lineations and fracture zones deduced from vector magnetic anomalies in the West Enderby Basin	265
