THE GEOLOGICAL SOCIETY

The Society was founded in 1807 as The Geological Society of London and is the oldest geological society in the world. It received its Royal Charter in 1825 for the purpose of 'investigating the mineral structure of the Earth'. The Society is Britain's national society for geology with a membership of around 8500. It has countrywide coverage and approximately 1500 members reside overseas. The Society is responsible for all aspects of the geological sciences including professional matters. The Society has its own publishing house, which produces the Society's international journals, books and maps, and which acts as the European distributor for publications of the American Association of Petroleum Geologists, SEPM and the Geological Society of America.

Fellowship is open to those holding a recognized honours degree in geology or cognate subject and who have at least two years' relevant postgraduate experience, or who have not less than six years' relevant experience in geology or a cognate subject. A Fellow who has not less than five years' relevant postgraduate experience in the practice of geology may apply for validation and, subject to approval, may be able to use the designatory letters C Geol (Chartered Geologist).

Further information about the Society is available from the Membership Manager, The Geological Society, Burlington House, Piccadilly, London W1V 0JU, UK. The Society is a Registered Charity, No. 210161.

Contents

Introduction and overviews

- J.-P. HENRIET & J. MIENERT: Gas hydrates: the Gent debates. Outlook on research horizons and strategies 1
- KVENVOLDEN, K. A.: A primer on the geological occurrence of gas hydrate 9
- SLOAN, E. D. JR.: Physical/chemical properties of gas hydrates and application to world margin stability and climatic change 31

Analysis and modelling of hydrate formation

- GINSBURG, G. D.: Gas hydrate accumulation in deep-water marine sediments 51
- REMPEL, A. W. & BUFFETT, B. A.: Mathematical models of gas hydrate accumulation 63
- BAKKER, J.: Improvements in clathrate modelling II: the $\text{H}_2\text{O}-\text{CO}_2-\text{CH}_4-\text{N}_2-\text{C}_2\text{H}_6$ fluid system 75
- LU, H. & MATSUMOTO, R.: Synthesis of CO_2 hydrate in various $\text{CH}_3\text{CO}_2\text{Na}/\text{CH}_3\text{CO}_2\text{H}$ pH buffer solutions 107

Exploration strategy and reservoir evaluation methodology

- BOOTH, J. S., WINTERS, W. J., DILLON, W. P., CLENNELL, M. B. & ROWE, M. M.: Major occurrences and reservoir concepts of marine clathrate hydrates: implications of field evidence 113
- GOLDBERG, D. & SAITO, S.: Detection of gas hydrates using downhole logs 129
- HOBRO, J. W., MINSHULL, T. A. & SINGH, S. C.: Tomographic seismic studies of the methane hydrate stability zone in the Cascadia Margin 133
- TINIVELLA, U., LODOLO, E., CAMERLENGHI, A. & BOEHM, G.: Seismic tomography study of a bottom simulating reflector off the South Shetland Islands (Antarctica) 141

Worldwide gas hydrate occurrences and regional case studies

- PAULL, C. K., BOROWSKI, W. S., RODRIGUEZ, N. M. & ODP LEG 164 SHIPBOARD SCIENTIFIC PARTY: Marine gas hydrate inventory: preliminary results of ODP Leg 164 and implications for gas venting and slumping associated with the Blake Ridge gas hydrate field 153
- THIÉRY, R., BAKKER, R., MONNIN, C. & THE SHIPBOARD SCIENTIFIC PARTY OF ODP LEG 164: Geochemistry of gas hydrates and associated fluids in the sediments of a passive continental margin. Preliminary results of the ODP Leg 164 on the Blake Outer Ridge 161
- DE LANGE, G. J. & BRUMSACK, H.-J.: The occurrence of gas hydrates in Eastern Mediterranean mud dome structures as indicated by pore-water composition 167
- WOODSIDE, J. M., IVANOV, M. K., LIMONOV, A. F. & SHIPBOARD SCIENTISTS OF THE ANAXIPROBE EXPEDITIONS: Shallow gas and gas hydrates in the Anaximander Mountains region, eastern Mediterranean Sea 177
- IVANOV, M. K., LIMONOV, A. F. & WOODSIDE, J. M.: Extensive deep fluid flux through the sea floor on the Crimean continental margin (Black Sea) 195
- BOURIAK, S. V. & AKHMETJANOV, A. M.: Origin of gas hydrate accumulations on the continental slope of the Crimea from geophysical studies 215
- LONG, D. LAMMERS, S. & LINKE, P.: Possible hydrate mounds within large sea-floor craters in the Barents Sea 223
- VEERAYYA, M., KARISIDDAIAH, S. M., VORA, K. H., WAGLE, B. G. & ALMEIDA, F.: Detection of gas-charged sediments and gas hydrate horizons along the western continental margin of India 239

NEBEN, S., HINZ, K. & BEIERSDORF, H.: Reflection characteristics, depth and geographical distribution of bottom simulating reflectors within the accretionary wedge of Sulawesi	255
DELISLE, G., BEIERSDORF, H., NEBEN, S. & STEINMANN, D.: The geothermal field of the North Sulawesi accretionary wedge and a model on BSR migration in unstable depositional environments	267
Relevance to margin stability and climatic change	
MIENERT, J., POSEWANG, J. & BAUMANN, M.: Gas hydrates along the northeastern Atlantic margin: possible hydrate-bound margin instabilities and possible release of methane	275
DILLON, W. P., DANFORTH, W. W., HUTCHINSON, D. R., DRURY, R. M., TAYLOR, M. H. & BOOTH, J. S.: Evidence for faulting related to dissociation of gas hydrate and release of methane off the southeastern United States	293
HAQ, B. U.: Natural gas hydrates: searching for the long-term climatic and slope-stability records	303
THORPE, R. B., PYLE, J. A. & NISBET, E.G.: What does the ice-core record imply concerning the maximum climatic impact of possible gas hydrate release at Termination 1A?	319
RAYNAUD, D., CHAPPELLAZ, J. & BLÜNIER, T.: Ice-core record of atmospheric methane changes: relevance to climatic changes and possible gas hydrate sources	327
