THE GEOLOGICAL SOCIETY

The Geological Society of London was founded in 1807 and is the oldest geological society in the world. It received its Royal Charter in 1825 for the purpose of 'investigating the mineral structure of the Earth' and is now Britain's national society for geology.

Both a learned society and a professional body, the Geological Society is recognized by the Department of Trade and Industry (DTI) as the chartering authority for geoscience, able to award Chartered Geologist status upon appropriately qualified Fellows. The Society has a membership of 8600, of whom about 1500 live outside the UK.

Fellowship of the Society is open to those holding a recognized honours degree in geology or cognate subject and who have at least two years' relevant postgraduate experience, or who have not less than six years' relevant experience in geology or a cognate subject. A Fellow with a minimum of five years' relevant postgraduate experience in the practice of geology may apply for chartered status. Successful applicants are entitled to use the designatory postnominal CGeol (Chartered Geologist). Fellows of the Society may use the letters FGS. Other grades of membership are available to members not yet qualifying for Fellowship.

The Society has its own publishing house based in Bath, UK. It produces the Society's international journals, books and maps, and is the European distributor for publications of the American Association of Petroleum Geologists, (AAPG), the Society for Sedimentary Geology (SEPM) and the Geological Society of America (GSA). Members of the Society can buy books at considerable discounts. The publishing House has an online bookshop (<http://bookshop.geolsoc.org.uk>).

Further information on Society membership may be obtained from the Membership Services Manager, The Geological Society, Burlington House, Piccadilly, London W1V 0JU, UK. (Email: enquiries@geolsoc.org.uk; tel: +44 (0)171 434 9944).

The Society's Web Site can be found at <http://www.geolsoc.org.uk/>. The Society is a Registered Charity, number 210161.

Contents

Preface	vii
RYAN, P. D. & MAC NIOCAILL, C. Continental Tectonics: an introduction	1
BALLANCE, P. F. Simplification of the Southwest Pacific Neogene arcs: inherited complexity and control by a retreating pole of rotation	7
JOLIVET, L., FACCENNA, C., D'AGOSTINO, N., FOURNIER, M. & WORRALL, D. The kinematics of back-arc basins, examples from the Tyrrhenian, Aegean and Japan Seas	21
DEWEY, J. & MANGE, M. Petrography of Ordovician and Silurian sediments in the western Irish Caledonides: tracers of short-lived Ordovician continent–arc collision orogeny and the evolution of the Laurentian Appalachian–Caledonian margin	55
PLANT, J. A., STONE, P. & MENDUM, J. R. Regional geochemistry, terrane analysis and metallogeny in the British Caledonides	109
RAST, N., ETTENSOHN, F. R. & RAST, D. E. Taconian seismogenic deformation in Appalachian Orogen and the North American Craton	127
SEARLE, M. P., WATERS, D. J., DRANSFIELD, M. W., STEPHENSON, B. J., WALKER, C. B., WALKER, J. D. & REX, D. C. Thermal and mechanical models for the structural and metamorphic evolution of the Zaskar High Himalaya	139
FORSTER, M. A. & LISTER, G. S. Separate episodes of eclogite and blueschist facies metamorphism in the Aegean metamorphic core complex of Ios, Cyclades, Greece	157
PEASE, V. & ARGENT, J. The Northern Sacramento Mountains, southwest United States. Part I: Structural profile through a crustal extensional detachment system	179
PEASE, V., FOSTER, D., WOODEN, J., O'SULLIVAN, P., ARGENT, J. & FANNING, C. The Northern Sacramento Mountains, southwest United States. Part II: Exhumation history and detachment faulting	199
BEYDOUN, Z. R. Evolution and development of the Levant (Dead Sea Rift) Transform System: a historical–chronological review of a structural controversy	239
KHAN, M. A., MECHIE, J., BIRT, C., BYRNE, G., GACIRI, S., JACOB, B., KELLER, G. R., MAGUIRE, P. K. H., NOVAK, O., NYAMBOK, I. O., PATEL, J. P., PRODEHL, C., RIAROH, D., SIMIYU, S. & THYBO, H. The lithospheric structure of the Kenya Rift as revealed by wide-angle seismic measurements	257
KARNER, G. D. & DRISCOLL, N. W. Style, timing and distribution of tectonic deformation across the Exmouth Plateau, northwest Australia, determined from stratal architecture and quantitative basin modelling	271
KARSON, J. A. & BROOKS, C. K. Structural and magmatic segmentation of the Tertiary East Greenland Volcanic Rifted Margin	313
Index	339
