Special Publication reviewing procedures

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society has a team of Book Editors (listed above) who ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

Geological Society Special Publications are included in the ISI Science Citation Index, but they do not have an impact factor, the latter being applicable only to journals.

More information about submitting a proposal and producing a Special Publication can be found on the Society's web site: www.geolsoc.org.uk.

GEOLOGICAL SOCIETY SPECIAL PUBLICATION NO. 202

Volcano–Ice Interaction on Earth and Mars

EDITED BY

J. L. SMELLIE
British Antarctic Survey, UK

M. G. CHAPMAN
US Geological Survey, USA

2002

London

THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of 9000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to www.geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the American Geological Institute (AGI), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies world-wide, consult www.geolsoc.org.uk, or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; Email: enquiries@geolsoc.org.uk.

Contents

Introduction

- SMELLIE, J. L. & CHAPMAN, M. G. Introduction: volcano–ice interaction on Earth and Mars 1

Eruptive, hydrological and glacial dynamics, and tephra chronology of subglacial eruptions

- WILSON, L. & HEAD, J. W. Heat transfer and melting in subglacial basaltic volcanic eruptions: implications for volcanic deposit morphology and meltwater volumes 5
- HEAD, J. W. & WILSON, L. Mars: a review and synthesis of general environments and geological settings of magma–H₂O interactions 27
- SMELLIE, J. L. The 1969 subglacial eruption on Deception Island (Antarctica): events and processes during an eruption beneath a thin glacier and implications for volcanic hazards 59
- LARSEN, G. A brief overview of eruptions from ice-covered and ice-capped volcanic systems in Iceland during the past 11 centuries: frequency, periodicity and implications 81

Reconstruction of sub-ice volcanoes and ice sheet thicknesses from geomorphological and lithofacies analysis and volatile compositions

- SKILLING, I. P. Basaltic pahoehoe lava-fed deltas: large-scale characteristics, clast generation, emplacement processes and environmental discrimination 91
- LE MASURIER, W. E. Architecture and evolution of hydrovolcanic deltas in Marie Byrd Land, Antarctica 115
- LOUGHLIN, S. C. Facies analysis of proximal subglacial and proglacial volcanoclastic successions at the Eyjafjallajökull central volcano, southern Iceland 149
- EDWARDS, B. R. & RUSSELL, J. K. Glacial influences on morphology and eruptive products of Hoodoo Mountain volcano, Canada 179
- KELMAN, M. C., RUSSELL, J. K. & HICKSON, C. J. Effusive intermediate glaciovolcanism in the Garibaldi Volcanic Belt, southwestern British Columbia, Canada 195
- TUFFEN, H., MCGARVIE, D. W., GILBERT, J. S. & PINKERTON, H. Physical volcanology of a subglacial-to-emergent rhyolitic tuya at Rauðufossafjöll, Torfajökull, Iceland 213
- WILCH, T. I. & MCINTOSH, W. C. Lithofacies analysis and ⁴⁰Ar/³⁹Ar geochronology of ice–volcano interactions at Mt. Murphy and the Crary Mountains, Marie Byrd Land, Antarctica 237
- DIXON, J. E., FILIBERTO, J. R., MOORE, J. G. & HICKSON, C. J. Volatiles in basaltic glasses from a subglacial volcano in northern British Columbia (Canada): implications for ice sheet thickness and mantle volatiles 255

Remote sensing of terrestrial and martian subglacial features

- CHAPMAN, M. G. Layered, massive and thin sediments on Mars: possible Late Noachian to Early Amazonian tephra? 273
- FAGENTS, S. A., LANAGAN, P. & GREELEY, R. Rootless cones on Mars: a consequence of lava–ground ice interaction 295
- GUDMUNDSSON, M. T., PÁLSSON, F., BJÖRNSSON, H. & HÖGNADÓTTIR, Þ. The hyaloclastite ridge formed in the subglacial 1996 eruption in Gjálp, Vatnajökull, Iceland: present day shape and future preservation 319

BEHRENDT, J. C., BLANKENSHIP, D. D., MORSE, D. L., FINN, C. A. & BELL, R. E. Subglacial volcanic features beneath the West Antarctic Ice Sheet interpreted from aeromagnetic and radar ice sounding	337
Hydrothermal evolution, and mineralogical and biological formation of palagonite	
BISHOP, J. L. & MURAD, E. Spectroscopic and geochemical analyses of ferrihydrite from springs in Iceland and applications to Mars	357
BISHOP, J. L., SCHIFFMAN, P. & SOUTHARD, R. Geochemical and mineralogical analyses of palagonitic tuffs and altered rinds of pillow basalts in Iceland and applications to Mars	371
SCHIFFMAN, P., SOUTHARD, R. J., EBERL, D. D. & BISHOP, J. L. Distinguishing palagonitized from pedogenically-altered basaltic Hawaiian tephra: mineralogical and geochemical criteria	393
FURNES, H., THORSETH, I. H., TORSVIK, T., MUEHLENBACHS, K., STAUDIGEL, H. & TUMYR, O. Identifying bio-interaction with basaltic glass in oceanic crust and implications for estimating the depth of the oceanic biosphere: a review	407
Index	423

It is recommended that reference to all or part of this book should be made in one of the following ways:

SMELLIE, J. L. & CHAPMAN, M. G. (eds) 2002. *Volcano–Ice Interaction on Earth and Mars*. Geological Society, London, Special Publications, **202**.

EDWARDS, B. R. & RUSSELL, J. K. 2002. Glacial influences on morphology and eruptive products of Hoodoo Mountain volcano, Canada. *In*: SMELLIE, J. L. & CHAPMAN, M. G. (eds) *Volcano–Ice Interaction on Earth and Mars*. Geological Society, London, Special Publications, **202**, 179–194.

Referees

The Editors are very grateful to the following people who, through their insightful comments, provided the additional motivation that materially improved the scientific quality of the papers submitted to this Special Publication.

- Philip Kyle, New Mexico Institute of Mining and Technology, Socorro, USA
Magnus Gudmundsson, University of Iceland, Reykjavik, Iceland
Jamie Allan, Appalachian State University, North Carolina, USA
Sally Newman, California Institute of Technology, Pasadena, USA
Cathie Hickson, Geological Survey of Canada, Vancouver, Canada
Thom Wilch, Albion College, Michigan, USA
John Behrendt, University of Colorado at Boulder, USA
David Lescinsky, University of Western Ontario, London, Canada
Olivier Bourgeois, Centre National de la Recherche Scientifique, Vandoeuvre-lès-Nancy, France
Wes LeMasurier, University of Colorado at Denver, USA
John Stix, McGill University, Montreal, Canada
Jim Moore, U.S. Geological Survey, Menlo Park, California, USA
Steve Self, The Open University, Milton Keynes, UK
Kristján Sæmundsson, Orkustofnun – National Energy Authority, Reykjavik, Iceland
