Aalenian unconformity 229
Albert rift 210
Altai belt, Siberia 97
analogue modelling (AM) 2, 3-4
Anatolian Fault system 262, 264, 265
Anatolian–Aegean block 264, 269, 271
Ando rotation 121
Anidriti di Burano Formation 9
anisotropic poro-elasticity (APE) 118, 130-1, 147, 148
Aquitaine Basin 236
Åre Formation 298
Armorican Massif 227
artificial neural network (ANN) technology 124
axial magma chamber (AMC) 251-2, 253-9

Baikal Rift system (BRS) 191–2
Baikal Rift Zone, Siberia 85, 96, 97, 99, 210
Bárðarbunga volcano 136
Base Permian unconformity (BPU) 23, 27
bedding-parallel slip 54
Biot’s theory 324-5
Black Forest Massif 236, 239
block mosaic 59
Bohemian Massif 239
borehole slotter data (BS) 108-9
Bouguer formula 238
Bray Fault 227
Buarguzin Basin 191
Byerlee’s law 213
Calcare Massiccio Formation 9, 14, 15-16, 15
Calcarei con Selce Formation 8
Caledonian belt 24–5
CASMO 102, 114
Castel Santa Maria Fault 20
Central African Rift system (CARS) 193
Central Andes, finite strain in 64–6, 65
Central Apennine Fault System (CAFS) 9, 15, 16, 19
Central Baikal rift zone (CBRZ) 191–2
Chablis code 246
Chablis model 226
channel flow model 212
Cheshire Basin 34
Cleaver Bank High, Dutch 23–36
exploration history 23-4
fault systems 28–31
folding 31–2
regional tectonic setting 24–7
Caledonian belt 24–5
Devonian–Early Carboniferous tectonics 25
fault reactivations 26–7
Middle and Late Carboniferous tectonics 25–6
structural model 32–5
Upper Carboniferous seismic facies 28
cohesion factor 76
competent layers 286
Complex Elastic Screen 252
compression fracture 77
computed tomography (CT) 3
Confidence Hills, California 178
Conoco Orbital Vibrator (COV) 146
constant fault-slip 54
Counting Deviation 83–5, 84, 99
counting net 80
counting value 80
cross-correlation coefficient (CCC) 124
cross-correlation function (CCF) 124
data set (pattern) 78
Dead Sea Fault system 262, 264
Dead Sea Rift 97
Death Valley fault zone, California 178
defformation gradient matrix 72
DepthCon2000 54
DIANA 314, 318, 320–1, 327
direct inversion methods 75
Dnieper–Donetz Basin 219
Döonna Terrace 153, 155
downhole Orbital Vibrator (DOV) 146
drilling-induced fractures (DIF) 106–8
DTM (Digital Terrain Model) 13
East African Rift system (EARS) 192–3
Enola, Arkansas, earthquakes 119
erosion law 217–19
erosional forcing of basin dynamics 209–22
erosion and basin evolution 210–12
erosion law and 217–19
 evolution of topography and crust 217
numerical model 212–13, 221–2
post-rift extension and compression 219–20
rheological assumptions 221–2
extended Bingham body 265, 266
tenseive–dilatancy anisotropy (EDA) 118
fast Fourier Transform (FFT) 253
Fast Lagrangian Analysis of Continua family (FLAC) 221–2
fault branches 49, 51
fault–horizon intersections 41-2
fault–horizon networks 39-56
building 40, 40, 41-4, 42-3
- fault–horizon intersections 41-2
- fault tip points 42-3
