

## Contents

Preface	vii
BURLINI, L. & BRUHN, D. High-strain zones: laboratory perspectives on strain softening during ductile deformation	1
BURG, J.-P., ARBARET, L., CHAUDHRY, N. M., DAWOOD, H., HUSSAIN, S. & ZEILINGER, G. Shear strain localization from the upper mantle to the middle crust of the Kohistan Arc (Pakistan)	25
TEYSSIER, C., FERRÉ, E. C., WHITNEY, D. L., NORLANDER, B., VANDERHAEGHE, O. & PARKINSON, D. Flow of partially molten crust and origin of detachments during collapse of the Cordilleran Orogen	39
PASSCHIER, C. W., ZHANG, J. S. & KONOPÁSEK, J. Geometric aspects of synkinematic granite intrusion into a ductile shear zone – an example from the Yunmengshan core complex, northern China	65
RESOR, P. G. & SNOKE, A. W. Laramie Peak shear system, central Laramie Mountains, Wyoming, USA: regeneration of the Archean Wyoming province during Palaeoproterozoic accretion	81
EDWARDS, M. A. & RATSCHBACHER, L. Seismic and aseismic weakening effects in transtension: field and microstructural observations on the mechanics and architecture of a large fault zone in SE Tibet	109
SIDMAN, D., FERRÉ, E. C., TEYSSIER, C. & JACKSON, M. Magnetic fabric and microstructure of a mylonite: example from the Bitterroot shear zone, western Montana	143
RITTER, O., HOFFMANN-ROTHER, A., BEDROSIAN, P. A., WECKMANN, U. & HAAK, V. Electrical conductivity images of active and fossil fault zones	165
BURLINI, L., ARBARET, L., ZEILINGER, G. & BURG, J.-P. High-temperature and pressure seismic properties of a lower crustal prograde shear zone from the Kohistan Arc, Pakistan	187
SCHUBNEL, A., FORTIN, J., BURLINI, L. & GUÉGUEN, Y. Damage and recovery of calcite rocks deformed in the cataclastic regime	203
BAUD, P., LOUIS, L., DAVID, C., RAWLING, G. C. & WONG, T.-F. Effects of bedding and foliation on mechanical anisotropy, damage evolution and failure mode	223
MAINPRICE, D. & PATERSON, M. Experimental deformation of flint in axial compression	251
BARBERINI, V., BURLINI, L., RUTTER, E. H. & DAPIAGGI, M. High-strain deformation tests on natural gypsum aggregates in torsion	277

BRUHN, D., KOHLSTEDT, D. L. & LEE, K.-H. The effect of grain size and melt distributions on the rheology of partially molten olivine aggregates	291
NIEMEIJER, A. R. & SPIERS, C. J. Influence of phyllosilicates on fault strength in the brittle–ductile transition: insights from rock analogue experiments	303
EVANS, B. Creep constitutive laws for rocks with evolving structure	329
WIBBERLEY, C. A. J. Initiation of basement thrust detachments by fault-zone reaction weakening	347
ROSSI, M., ROLLAND, Y., VIDAL, O. & COX, S. F. Geochemical variations and element transfer during shear-zone development and related episyenites at middle crust depths: insights from the Mont Blanc granite (French–Italian Alps)	373
MUTO, J., NAGAHAMA, H. & HASHIMOTO, T. Water distribution in dynamically recrystallized quartz grains: cathodoluminescence and micro-infrared spectroscopic mapping	397
FERNÁNDEZ, F. J., MENÉNDEZ-DUARTE, R., ALLER, J. & BASTIDA, F. Application of Geographical Information Systems to shape-fabric analysis	409
SCHMID, D. W. Rigid polygons in shear	421
ISSEN, K. A. & CHALLA, V. Strain localization conditions in porous rock using a two-yield surface constitutive model	433
Index	453
