Acknowledgments

It is impossible to thank, by name, all who contributed to the success of the conference and the production of this volume. Without financial backing from the Geological Society and the generous active support of Professor Mike Audley-Charles the whole project would have been still-born. Before and during the conference, the bulk of the day-to-day administration was handled by Dr Judith Rowbotham and a dedicated band of helpers. We know that everybody at the conference greatly appreciated their efforts. We wish to acknowledge those speakers who are not represented in this volume but who made valuable contributions on the day, and finally we thank the reviewers for their rapid and efficient scrutiny of the manuscripts.
