

Index

Page numbers in *italics* refer to Figures. Page numbers in **bold** refer to Tables.

- Abu Hureyra (Syria), archaeological stratigraphy 99–101
- abundance zone **152**
as applied to Anthropocene 157–158, *157*, *158*
- acidification
ice cores 287
lacustrine 11, 187, 188
oceanic 14, 25, 29, 113, 167, 175, *176*, *177*, 227, 255
- AD 1900 event 11, 132
- Adriatic Sea, eutrophication 194
- aeolian deposits, anthropogenic impact on 43
- aerial photography, use of 82
- aerosols, record in ice cores 257, 258
- Age, defined 3, 39
- aggregate extraction 46
- agriculture impact 7, 14, 29, 186
coastal environment 171
diatoms 188
land use 301
ostracods 203–204
sedimentary environment 56
- airborne particulates 10
- air pollution, impact on lakes 188
- ²⁶Al 5
- Alaid eruption (Russia) **293**
- Albania, magnetic mineral signatures **135**
- albedo change 40
- alien species as markers 11, 155, 156, 157, 197, 204–205
- alkaline batteries 72
- alkaline earth trace elements, in speleothems **243**, 244
- alkalization 8, 187
- allostratigraphy 56, 60
- alloys, first appearance 111
- alluvial deposits, effect of human modification *70*
- aluminium, annual world production 112–113, *113*
- aluminium cans 72
- Almirante Bay (Panama) 16
- American Commission on Stratigraphic Nomenclature (ACSN) 31
- Ammobaculites* 197
- Ammonia* spp. 196, 207
- animal behaviour
reflected in trace fossils
Anthropocene 145–147
Cambrian 143–145
- Antarctic ice cores 258, 287
Sulphate measurements 290
- Antarctic Ice Sheet
Expansion during Oligocene and Miocene 151
- future of 255, 257
ice core record 292
role in defining Anthropocene 261
- Anthocene, defined 17
- anthropic rocks 57, 58
- anthropic soils 33
- Anthropocene
boundary with Holocene 1–3, 24, 32, 33, 35, 39, 160–161, 207–208
future date 15–17
Industrial Revolution 9, *10*, 11
mid-twentieth century 11–15
pre-Industrial Revolution age 7, 9
consideration as Series 42
aeolian evidence 43
Artificial Ground 44–45
coastal evidence 45–46
fluvial evidence 43
glacial evidence 43–44
ice sheet evidence 44
lacustrine evidence 43
marine deep sea evidence 46–47
marine shelf evidence 46
soils evidence 42–43
defined 17
deposits defined 17
definition in terms of archaeology 25–26, 34
definition in terms of coral reef ecosystem 167
definition in terms of geomagnetism 119, 129, 136
definition in terms of human activity 93, 255
definition in terms of industrial activity 93
definition in terms of palaeontology 151
definition in terms of radionuclide release 265
definition in terms of technosphere 301–302, 306, 307–308
definition in terms of volcanic eruption 286, 290–294
length considerations 47–48
position in stratigraphic hierarchy 3–4, 39
reasons for formalization 111, 301
selecting a start date 6–17, 39–40
word derivation 17, 29
- Anthropocene Task Group, concepts for consideration
concept of formalization 26–27, 301
definition of base 25
formal nature of the unit 24
significance of formalization 27
value of classification 26
earth-human history interface 25–26
earth-human process balance 26
- Anthropocene Working Group (AWG) 3, 32, 111,
establishment of 3, 32, 111
- anthropogenic deposits 1, 2, 8, 17
iron mineral distribution 130–136
recognition of 57
see also artificial ground
- anthropogenic geochemical anomalies 223
- anthropogenic impacts 8, 29, 55, 185, 189, 207
early phase 169–171
late phase 178–181
mid phase 171–178
on dispersal of ostracods 204–205
anthropominerals 115–116
- Anthroposian, age 3
- anthroposphere, defined 302
- Anthropozoic Era 17, 111, 185
- Anthrosols (Anthropogenic soils) 1, 62
- anthroturbation 8, 58

- antimony pollution 229
 $^{40}\text{Ar}/^{39}\text{Ar}$ dating, volcanic eruptions 285–286
 Aragonite Saturation State 168–169
 archaeology
 recording of artificial ground 58, 61–62, 91
 stratigraphic concepts 93–95
 Abu Hureyra case study 99–101
 archaeosphere 104–106
 cultivation soils 103–104
 earthworks 102–103
 Leicester case study 95–99
 riverworks 101–102
 archaeomagnetic jerks 123
 archaeomagnetism 119, 123
 archaeoscape 104–107
 archaeosphere 104–106
 Arctic latitude lakes, diatom studies 189
Arcuatula demissa 155
 Arduino, Giovanni 31
 Argentina, geochemical enrichment measurements **225**
 Armenia 201, 202
 artificial ground 18, 44, 57
 case study of archaeological stratigraphy 95–99
 classification schemes 60–63, 92, 92
 as a geological concept 91
 geomorphology 75, 76
 map depiction 58
 measurement in Great Britain 57, 59
 role in archaeology 58, 61–62, 91, 93–95
 role in land-use planning 58
 role of lithostratigraphy 55–56
 association problems 63
 hierarchical framework 63, 77–81
 importance of type sections 63, 76–77
 lateral continuity 63
 spatial extent 65–66
 temporal extent 68
 thickness 66–67
 Law of Superposition 63–65
 lithological distinction 63
 composition 69, 70, 71
 grain size 75
 lithological characterization 74–75
 preservation potential 73–74
 sedimentary structures 75–76
 temporal variation 71–73
 procedures 63
 artificial deposits 8, 18, 56
 artificially modified ground 56–58
 Asian Land Mammal Age 151
 assemblage zone **152**
 as applied to Anthropocene 155–157
 associations in chronostratigraphy 60
Asterionella formosa 187, 189
 asteroid impact 2, 3
 astronomical pacing 31
 Aswan Dam 43
 Atlantic Ocean, Pu fallout record 278
 atmosphere
 composition 29
 record in ice core 246, 258–260

 energy flow 303
 radiogenic fallout history 266–269
Aulacoseira ambigua 188
Aurila speyeri 203
 Australia
 alien species 156, 205
 diatom signatures 188, 189
 foraminifera signatures 198
 ostracod signatures 204
 plutonium coastal marine record 277, 278
 plutonium sedimentary record
 Blue Lake 270–271
 Lake Victoria 271–272
 plutonium soil record 274, 274
 Austria
 magnetic mineral signatures **135**
 Obir Cave 246, 247
 axial tilt *see* dipole axial tilt
 Baitoushan eruption (China/North Korea) 286, **289**
 bakelite 72
Balanus improvisus 155
 ballast water *see* ship ballast
 banded ironstone formation 110
 Bangladesh, geochemical measurements **227, 228**
 Bárðarbunga eruption (Iceland) **288**
 Bassenthwaite Lake, magnetic mineral record **135**
 batteries 72, 73
 ^{10}Be 5, 127, 128
 Bed, as hierarchical stratigraphic term 80–81
 Beerenberg eruption (Jan Mayen) **293**
Bicornucythere bisanensis 200, 207
 Bikini Atoll, Pu released 278
 Billy Mitchell eruption (Papua New Guinea) **288**
 biogeochemistry and mineral diversification 110
 biomineralization 110, 130
 biosphere
 energy flow 303
 impact of Great Oxidation Event 305–306
 recycling ability 305–306
 biostratigraphic units 151–152
 biostratigraphic zone, relevance to Anthropocene 161
 biotic turnover, markers for 1, 2
 Blue Lake (Australia), sediment record of Pu 270–271
 bolide impact 2, 3
Bolivina 196
 borazon 111, 112
 borehole records 66
 boron isotopes 230, 259
Bos primigenius, as range zone fossil 152
Bos taurus 156
 Bosphorus Strait 196
 contamination measurements **226**
 boundary layer 151
 significance for Anthropocene 160
 boundary stratotype 6–7, 25
 Brazil
 impact of river management 197
 land use change 198
 breeze blocks 72
 British Geological Survey, artificial ground classification

 British Geological Survey Lexicon of Named Rock
 Units 92
Brizalina 196
Bromus tectorum 155

- Bronze Age 134, 251
 environmental change 187, 207
 impact on anthropogenic deposits 186
- Brown's Folly (Avon) 245, 247
- Bulimina* 197
- Buliminella* 196
- bundles in chronostratigraphy 60
- Burdekin River, sediment transport 171
- Busycotypus canaliculatus* 155
- $\delta^{13}\text{C}$ 244
 ice core record 246
 speleothems 241, **242**
- ^{14}C 34, **266**
 dating 4, 5, 206, 241, **243**
 volcanic eruptions 286
 speleothems 241, 246, 247
 volcanic eruptions 286
- calcareous deposits *see* speleothems
- calcio-uranioite 115
- calcite compensation depth 47
- Callistocythere alata* 200
- Cambrian Period, recognition of base of 143
- Campi Flegrei eruptions 284
- Canada
 estuary eutrophication 194–195
 geochemical measurements **227, 228**
 lake eutrophication 187–188
- Candona neglecta* 203
- Canis lupus familiaris* 156
 as range zone fossil 152
- Capra hircus* 156
 as range zone fossil 152
- carbon cycles 14
 human impact on 29, 227
- carbon dioxide levels 7, 25, 33, 169, 175, 178–179, 180, 255, 291, 292
 degassing and speleothem growth 241
 record in ice cores 4, 9, 34, 44, 170, 246, 258, 259, 260
 role in acidification 227
 role in defining Anthropocene 25, 261
 role in glacial inception 256–257
- carbon isotope excursion 150, 151
- carbonate ion concentration, Vostok ice core record 170
- Carcinus maenus* 155
- Caribbean Sea, fishing pressure 174, 178
- Carnot Engine 307
- catastrophic events 2–3
- caves and environmental change 239
- Ceboruco eruption (Mexico) **289**
- Cervus elaphus* 156
- Chandler wobble 121
- charcoal record 244
- chemical characterization, volcanic glass shards 284
- chemical pollutants
 modification of sediments by 232
- ostracod indicators 200–201
 record in ice cores 260, 261
- Chernobyl 230, 266
- Chesapeake Bay 201
- Chile, alien species 156
- China
 geochemical measurements **226, 227, 228**
 geomagnetic field intensity reconstruction 125
 magnetic mineral signatures **135**
 Meishan GSSP 1, 5
 Shanghai 45, 125
 Yellow River, human interactions 102
- chlorine pollution 294
- chlorofluorocarbons (CFCs), record in ice cores 260
- Chrissia halyi* 200
- chrono-layers 60
- chromosomes 60
- chronostratigraphic correlation (chronocorrelation) 25
- chronostratigraphic unit, defined 30, 149
- chronostratigraphy
 applied to Anthropocene 41–42, 56
 artificial ground classification 60–61, 62
 compared with geochronology 1, 26, 31, 40–41
 defined 30
- Churchill eruption (Alaska) **289**
- cities, megacities and urbanization 12, 29, 33, 44, 56, 145–147
- ^{36}Cl 5, 127
- Clarke values, defined 223
- class, in BGS enhanced classification 60, 61
- Clean Air Act (1956) 73
- climate anomaly, Tambora related 292
- climate change 3
 early human impact 170, 255
 impact on coral reefs 167, 170–171
 impact on diatoms 187, 189
 record in speleothems 241, 247–250
 solving problems of 307
- climatostratigraphy 4, 31
- closed systems for carbon circulation 241, 244
- coastal environment
 human impact 186
 early phase 170–171
 late phase 178–181
 mid phase 171–178
 microbiotic signatures 206
 Pu fallout record 277, 278
- coastal reclamation 55
- coastal zone, anthropogenic impact on 185
- Colima eruption (Mexico) **293, 294**
- Commission on New Minerals, Nomenclature and Classification 115
- compact discs 72
- concrete blocks 72
- conodonts, as stratigraphic marker 1
- contamination factor (CF), defined 224, **226**
- contamination, archives of 221
- contamination index 223
- contourites 46–47
- Control of Pollution Act (1974) 73

 - autonomy of 306–307
 - characteristics of 17, 302–303
 - defined 301–302
 - long-term stability of 304–305
 - resource appropriation by 303–304
- temperature variation with time 170, 176, 177, 179, 180
- speleothem record 249, 249
- tephra
- characterization 283–285
 - use in chronology 283, 285–286
- terra preta 9
- Teredo navalis* 155
- Textularia* 197
- thermal remnant magnetization (TRM) 122
- Thesaurus of Monument Types* 62–63
- time-rock classification *see* chronostratigraphy
- tin cans 72
- Toba eruption 283, 284, 286
- Tokyo Bay, eutrophication evidence 195
- topographical classification 62
- Touroconcha marcida* 203
- toxicity indicators, ostracods 200
- trace elements
- human impact on geochemistry 229
 - speleothem chemistry **243**, 244, 245–246
 - volcanic glass shard characterization 285
- trace fossil concept 58
- trace fossils
- anthropogenic 1, 2, 6, 158
 - base of Cambrian 143, 144
 - burrow systems of Anthropocene 146
 - cultural remains as 158–159
 - road networks as 161
- transport of sediment, anthropogenic 56, 57
- trawling, environmental impact 46
- Treptichnus pedum* 143, 144
- Trichophycus pedum* *see* *Treptichnus pedum*
- tritium, record in ice cores 258
- Trochammina*, spp. 197, 207
- tunnelling 64
- turbidites 46–47
- Turkey, contamination measurements **226**
- type section, importance in lithostratigraphy 63, 76–77, **84**
- type-fossil concept 94
- types, in BGS enhanced classification 60, 61
- ²³⁴U dating 4, 5, 240
- unconformities, anthropogenic 56
- unit, in BGS enhanced classification 60, 61
- urban development and urbanization 12, 29, 33, 44
- cities and megacities 145–147
 - impact on sedimentary environment 56
- urban land, measurement in Great Britain 58
- Urosalpinx cinerea* 155
- USA
- alien plant species 155
 - eutrophication evidence 194–195
 - geomagnetic field intensity reconstruction 125
 - magnetic mineral signatures **135**
 - Mount St Helens eruption 283
 - ostracod signature 204
- Usu eruption (Japan) **293**, 294
- vegetation, role in mapping deposits 82
- Venerupis philippinarum* 155
- Victoria, Lake (Australia), sediment record of Pu 271–272, 275–276, 276
- Virgulopsis* 197
- virtual axial dipole moment (VADM) 124
- volcanic eruption 2, 3
- volcanic explosivity index (VEI) 283
- volcanic glass shards
- use in chronology 283
 - absolute 285–286
 - relative 286
- Wadden Sea 157–158
- Wallingford (Oxfordshire) 103
- waste dumping, impact on sedimentary environment 56
- water abstraction 186
- water management
- anthropogenic 185
 - impact on marine environment 197
- water quality, effect on coral reefs 171
- wildfires 130
- Windermere Lake, index of geoaccumulation measurement 226
- worked ground 18, 46, 55, 60, 92
- as archaeological concept 93, 94
- World Reference Base for Soils 62
- Xestoleberis atra* 203
- Yangtse Delta, magnetic mineral signatures **135**
- Yellow River (China), human interactions 44, 102
- Younger Dryas, climate change event 169
- Zea mays* 161
- as lineage zone fossil 153, 155
 - as range zone fossil 152
- zinc carbon batteries 72
- zinc pollution 197, 232
- speleothem record 246
- Zomia (SE Asia) 303
