

# Index

Page numbers in *italics* refer to Figures. Page numbers in **bold** refer to Tables.

- abiotic parameters, cave assessment **450–451**, 452–454, 457
- abrissskluft cave 123–124, 129, 130, 133
  - attributes **135**
- aeolian calcarenite 172, 180, 182–183
- aeolianite 174, 181
- African monsoon, speleothem formation 212
- air flow in caves 377
  - condensation corrosion 190, 197, 205
  - humidity 167
- Albania, water export 225
- Alberta foreland basin 33–35, 74
  - Athabasca Oil Sands 37–43
  - glacial meltwater 53–55
- alluvial deposit, Puerto Princesa cave 158
- Altamura underground quarry 384–385
- alteration front 97, 101
- alterite 90, 93, 97–101
- altitude of discharge 278, 285, **290**
- altitude/pressure 360, 362, 371–372
- amphibians, endangered species 415–416, 425, 427
- anhydrite 25, 28, 29, 37, 43, 341, 346
  - density contrast 350
  - geophysical parameters 343
  - Medieval mining 344
  - zoning 45
- anhydrite–gypsum solubility disequilibrium 465, 468
- anthropogenic impact 359, 361, 431–432
  - agriculture 143–145
  - environmental quality 148–149
  - island karst 307–308, 314–316
  - temperature in tourist caves 370
- anthropogenic sinkholes, Apulia
  - classification 383–384
  - hazard 381–385
  - numerical modelling 387–392
  - calibration and validation 392–393
  - technical properties 386–387
- Apulia caves 4, 15
  - anthropogenic sinkholes 381–393
  - speleological investigation 137–151
- aquifer, karst 1–2, 13, 427, 463
  - flow reversal 51, 52, 74
  - salt basin 37, 38
  - storage 237–238
  - stress 295–296
  - zones of vulnerability 432
- aquifer, Negev Desert 190–196
- aquifer, Sierra Grazalema 276–278
- aquitard 242, 243
- aragonite 175, 178
- argillite 99, 100
- artesian basin 83, 98, 103
- Ashalim Cave, Israel 5, 187–199
  - cave setting and climate 202–205
  - groundwater flow 190–196
  - hydrology/palaeohydrology 196–199
  - morphology 187–190
- Askynskaya cave, glacier 365
- astronaut training 2, 3, 376
- Athabasca Oil Sands 27, 30, 32, 51, 74
  - Alberta foreland basin 37, 39–43
  - evaporite karst features 55–59
  - Jackpine mine 60, 61
  - sinkholes 65–71, 72–73
- Atlantic air mass 284, 289
- atmosphere in caves 14, 17, 359–378
  - convection 371–375
  - data **364**
  - energy fluxes 366–371
  - Puerto Princesa, Philippines 166–167
  - Su Bentu, case study 375–377
  - temperature 361–366
- Aurora North Mine 57, 59, 61, 62–65, 70
- Austria, cave classification 121–135
  - database 128
  - study area 125–128
- Austroalpine Crystalline 127, 130
- automatic model, calibration and evaluation 336–337
  - parameters 332–333
- backwater flooding 403, 405–406
- bacteria 11, 161, 301, 303
  - extremophiles 471
- Badino, Giovanni vii, 359
- Bahamas, platform subsidence 181
- Bahamas, schematic denudation model 183
- barrier reef, Presqu'île 27–30
- base flow 253, 257, 272
  - recharge 256
  - Sierra Grazalema 278
- bats 161, 162, 453
  - conservation and protection 416, 424–425
  - Škocjan Caves species list **426**
- beads-on-a-string 172, 173
