For the use made of the material reviewed the author is solely responsible, and (as already mentioned) the suggested chronology is in some instances at variance with accepted opinion.

The figures have been drawn by Mr R. C. H. Smith of the Department of Mining and Mineral Technology, Imperial College, and Mr Harland arranged for Mrs K. Herod to help with the references and with getting the review ready for the printer. Mrs A. M. Tyler and other former members of the Geological Society's library staff gave much assistance throughout the preparation of the paper.

The work would not have been possible without the continuous co-operation of my wife, Mrs E. M. Evans, who undertook the translation of the relevant German literature and helped with the successive revisions of the text and the final preparations for publication.
