THE GEOLOGICAL SOCIETY

The Geological Society of London was founded in 1807 for the purposes of 'investigating the mineral structures of the earth'. It received its Royal Charter in 1825. The Society promotes all aspects of geological science by means of meetings, special lectures and courses, discussions, specialist groups, publications and library services.

It is expected that candidates for Fellowship will be graduates in geology or another earth science, or have equivalent qualifications or experience. All Fellows are entitled to receive for their subscription one of the Society's three journals: *The Quarterly Journal of Engineering Geology*, *Journal of the Geological Society* or *Marine and Petroleum Geology*. On payment of an additional sum on the annual subscription, members may obtain copies of another journal.

Membership of the specialist groups is open to all Fellows without additional charge. Enquiries concerning Fellowship of the Society and membership of the specialist groups should be directed to the Membership Manager, The Geological Society, Burlington House, Piccadilly, London W1V 0JU.

Contents

ENGLAND W. A. & FLEET A. J. Introduction	1
Part I: Generation and expulsion (primary migration)	
PEPPER, A. S. Estimating the petroleum expulsion behaviour of source rocks: a novel quantitative approach	9
LEYTHAEUSER, D. & POELCHAU, H. S. Expulsion of petroleum from type III kerogen source rocks in gaseous solution: modelling of solubility fractionation	33
DÜPPENBECKER, S. J., DOHMEN, L. & WELTE, D. H. Numerical modelling of petroleum expulsion in two areas of the Lower Saxony Basin, Northern Germany	47
MUDFORD, B. S., GRADSTEIN, F. M., KATSUBE, T. J. & BEST, M. E. Modelling 1D compaction-driven flow in sedimentary basins: a comparison of the Scotian Shelf, North Sea and Gulf Coast	65
Part II: Secondary migration	
BURRUS, J., KUHFUSS, A., DOLIGEZ, B. & UNGERER, P. Are numerical models useful in reconstructing the migration of hydrocarbons? A discussion based on the Northern Viking Graben	89
SYLTA, Ø. Modelling of secondary migration and entrapment of a multicomponent hydrocarbon mixture using equation of state and ray-tracing modelling techniques	111
CHAPMAN, D. S., WILLET, S. D. & CLAUSER, C. Using thermal fields to estimate basin-scale permeabilities	123
DAVIS, R. W. Integration of geological data into hydrodynamic analysis of hydrocarbon movement	127
LARTER, S. & MILLS, N. Phase-controlled molecular fractionations in migrating petroleum charges	137
KROOSS, B. M., BROTHERS, L. & ENGEL, M. H. Geochromatography in petroleum migration: a review	149
Part III: Case studies	
BARNARD, P. C. & BASTOW, M. A. Petroleum generation, migration, alteration, entrapment and mixing in the Central and Northern North Sea	167
THOMPSON, K. F. M. Contrasting characteristics attributed to migration observed in petroleum reservoirs in clastic and carbonate sequences in the Gulf of Mexico region	191
PIGGOTT, N. & LINES, M. D. A case study of migration from the West Canada Basin	207
BUTLER, R. W. H. Hydrocarbon maturation, migration and thrust sheet loading in the Western Alpine foreland thrust belt	227
ROBERTS, G. Structural controls on fluid migration through the Rencurel thrust zone, Vercors, French Sub-Alpine Chains	245
Part IV: Trap leakage and subsequent migration	
CLARKE, R. H. & CLEVERLY, R. W. Petroleum seepage and post-accumulation migration	265
VIK, E., HEUM, O. R. & AMALIKSEN, K. G. Leakage from deep reservoirs: possible mechanisms and relationship to shallow gas in the Haltenbanken area, mid Norwegian shelf	273
