THE GEOLOGICAL SOCIETY

The Society was founded in 1807 as the Geological Society of London and is the oldest geological society in the world. It received its Royal Charter in 1825 for the purpose of 'investigating the mineral structure of the Earth'. The Society is Britain's national society for geology with a membership of 7500. It has countrywide coverage and approximately 1000 members reside overseas. The Society is responsible for all aspects of the geological sciences including professional matters. The Society has its own publishing house, which produces the Society's international journals, books and maps, and which acts as the European distributor for publications of the American Association of Petroleum Geologists, SEPM and the Geological Society of America.

Fellowship is open to those holding a recognized honours degree in geology or cognate subject and who have at least two years' relevant postgraduate experience, or who have not less than six years' experience in geology or a cognate subject. A Fellow who has not less than five years' relevant postgraduate experience in the practice of geology may apply for validation and, subject to approval, may be able to use the designatory letters C Geol (Chartered Geologist).

Further information about the Society is available from the Membership Manager, The Geological Society, Burlington House, Piccadilly, London W1V 0JU, UK. The Society is a Registered Charity, No. 210161

Contents

NIEUWLAND, D. A. & BUCHANAN, P. G. Introduction	1
Seismic interpretation	
HORSCROFT, T. R. & BAIN, J. E. Validation of seismic data processing and interpretation with integration of gravity and magnetic data	5
PICKERING, G., BULL, J. M & SANDERSON, D. J. Scaling of fault displacement and implications for the estimates of sub-seismic strain	11
WALSH, J. J., WATTERSON, J., CHILDS, C. & NICOL, A. Ductile strain effects in the analysis of seismic interpretations of normal fault systems	27
Palinspastic reconstruction and forward modelling	
BUCHANAN, J. G. The application of cross-section construction and validation within exploration and production: a discussion	41
COWARD, M. P. Balancing sections through inverted basins	51
GROSHONG, R. H. Construction and validation of extensional cross sections using lost area and strain, with application to the Rhine graben	79
HAUGE, T. A. & GRAY, G. G. A critique of techniques for modelling normal-fault and rollover geometries	89
HILL, K. C. & COOPER, G. T. A strategy for palinspastic restoration of inverted basins: thermochronology and structural analyses in SE Australia	99
MORLEY, C. K. Discussion of potential errors in fault heave methods for extension estimates in rifts, with particular reference to fractal fault populations and inherited fabrics	117
SKUCE, A. G. Forward modelling of compaction above normal faults: an example from the Sirte Basin, Libya	135
ROWAN, M. G. Benefits and limitations of section restoration in areas of extensional salt tectonics: an example from offshore Louisiana	147
Fault populations and geometric analyses	
CARTWRIGHT, J. A., MANSFIELD, C. & TRUDGILL, B. D. The growth of faults by segment linkage	163
KERR, H. G. & WHITE, N. Kinematic modelling of normal fault geometries using inverse theory	179
NEEDHAM, D. T., YIELDING, G. & FREEMAN, D. Analysis of fault geometry and displacement patterns	189
Analogue modelling	
MCCLAY, K. R. Recent advances in analogue modelling: uses in section interpretation and validation	201
VERSCHUREN, M., NIEUWLAND, D. & GAST, J. Multiple detachment levels in thrust tectonics: sandbox experiments and palinspastic reconstruction	227
Mathematical modelling	
BARNICHON, J. D. & CHARLIER, R. Finite element modelling of the competition between shear bands in the early stages of thrusting: strain localization analysis and constitutive law influence	235
BEEKMAN, F., BULL, J. M., CLOETINGH, S. & SCRUTTON, R. A. Crustal fault reactivation facilitating lithospheric folding/buckling in the central Indian Ocean	251
HARDY, S., POBLET, J., MCCLAY, K. & WALTHAM, D. Mathematical modelling of growth strata-associated with fault-related fold structures	265
TER VOORDE, M. & CLOETINGH, S. Numerical modelling of extension in faulted crust: effects of localized and regional deformation on basin stratigraphy	283
VAN WEES, J. D., CLOETINGH, S. & DE VINCENTE, G. The role of pre-existing weak zones in basin evolution: constraints from 2D finite element and 3D flexure modelling	297

Regional analyses and remote sensing

INSLEY, M. W. The use of satellite imagery in the validation and verification of structural interpretations for hydrocarbon exploration in Pakistan and Yemen	321
TURNER, J. P. Gravity-driven nappes and their relation to palaeobathymetry: examples from West Africa and Cardigan Bay, UK	345
Index	363
