Preface	000
SEMPÉRÉ, J. C., WEST, B. P. & GÉLI, L. The Southeast Indian Ridge between 127° and 132°40'E: contrasts in segmentation characteristics and implications for crustal accretion	1
BLONDEL, P. Segmentation of the Mid-Atlantic Ridge south of the Azores, based on acoustic classification of TOBI data	17
MCALLISTER, E. & CANN, J.R. Initiation and evolution of boundary wall faults along the Mid-Atlantic Ridge, 25–29°N	29
ALLERTON, S., SEARLE, R. C. & MURTON, B. J. Bathymetric segmentation and faulting on the Mid-Atlantic Ridge, 24°00'N to 24°40'N	49
LAWSON, K. A., SEARLE, R. C. & PEARCE, J. A. Detailed volcanic geology of the MARNOK area, Mid-Atlantic Ridge north of Kane transform	61
BATIZA, R. Magmatic segmentation of mid-ocean ridges: a review	103
ROBINSON, C. J., WHITE, R. S., BICKLE, M. J. & MINSHULL, T. A. Restricted melting under the very slow spreading Southeast Indian Ridge	131
EDWARDS, S. J., FALLOON, T. J., MALPAS, J. & PEDERSEN, R. B. A review of the petrology of harzburgites at Hess Deep and Garrett Deep: implications for mantle processes beneath segments of the East Pacific Rise	143
HAYMON, R. M. The response of ridge-crest hydrothermal systems to segmented episodic magma supply	157
GERMAN, C. R., PARSON, L. M., MURTON, B. J. & NEEDHAM, H. D. Hydrothermal activity and ridge segmentation on the Mid-Atlantic Ridge: a tale of two hot-spots?	169
MACLEOD, C. J. & MANNING, C. E. Influence of axial segmentation on hydrothermal circulation at fast-spreading ridges: insights from Hess Deep	185
ZAYKOV, V. V., MASLENNIKOV, V. V., ZAYKOVA, E. V. & HERRINGTON, R. J. Hydrothermal activity and segmentation in the Magnitogorsk-West Mugodjarian zone of the margins of the Urals palaeo-ocean	199
SOUTHWARD, E. C., TUNNICLIFFE, V., BLACK, M. B., DIXON, D. R. & DIXON, L. R. J. Ocean-ridge segmentation and vent tubeworms (Vestimentifera) in the NE Pacific	211
TUNNICLIFFE, V., FOWLER, C. M. R. & MCARTHUR, A. G. Plate tectonic history and hot vent biogeography	225
NISBET, E. G. & FOWLER, C. M. R. The hydrothermal imprint on life: did heatshock proteins, metalloproteins and photosynthesis begin around hydrothermal vents?	239
