Preface vii

### LISP-UK studies

BLACK, K. S. & PATerson, D. M. LISP-UK Littoral Investigation of Sediment Properties: an introduction

Dyer, K. R. The typology of intertidal mudflats

Amos, C. L., Brylinsky, M., Sutherland, T. F., O’Brien, D., Lee, S. & Cramp, A. The stability of a mudflat in the Humber estuary, South Yorkshire, UK

Christie, M. C. & Dyer, K. R. Measurements of the turbid tidal edge over the Skeffling mudflats

Law, D. J. & Bale, A. J. *In situ* characterization of suspended particles using focused-beam, laser reflectance particle sizing

Brown, S. L. Sedimentation on a Humber saltmarsh

Widdows, J., Brinsley, M. & Elliott, M. Use of *in situ* flume to quantify particle flux (biodeposition rates and sediment erosion) for an intertidal mudflat in relation to changes in current velocity and benthic macrofauna

Wiltshire, K. H., Tolhurst, T., Paterson, D. M., Davidson, I. & Gust, G. Pigment fingerprints as markers of erosion and changes in cohesive sediment surface properties in simulated and natural erosion events

Davey, J. T. & Partridge, V. A. The macrofaunal communities of the Skeffling muds (Humber estuary), with special reference to bioturbation

Underwood, G. J. C. & Smith, D. J. *In situ* measurements of exopolymer production by intertidal epipelagic diatom-dominated biofilms in the Humber estuary

Ruddy, G., Turley, C. M. & Jones, T. E. R. Ecological interaction and sediment transport on an intertidal mudflat I. Evidence for a biologically mediated sediment–water interface

Ruddy, G., Turley, C. M. & Jones, T. E. R. Ecological interaction and sediment transport on an intertidal mudflat II. An experimental dynamic model of the sediment–water interface

Wood, R. G., Black, K. S. & Jago, C. F. Measurements and preliminary modelling of current velocity over an intertidal mudflat, Humber estuary, UK

### Generic studies

Rodriguez, H. N. & Mehta, A. J. Considerations on wave-induced fluid mud streaming at open coasts

Van der Lee, W. T. B. The impact of fluid shear and the suspended sediment concentration on the mud floc size variation in the Dollard estuary, The Netherlands

Mikkelsen, O. & Pejrup, M. Comparison of flocculated and dispersed suspended sediment in the Dollard estuary

Uncles, R. J., Stephens, J. A. & Harris, C. Seasonal variability of subtidal and intertidal sediment distributions in a muddy, macrotidal estuary: the Humber–Ouse, UK

Ryan, N. M. & Cooper, J. A. G. Spatial variability of tidal flats in response to wave exposure: examples from Strangford Lough, Co. Down, Northern Ireland

Kornman, B. A. & de Deckere, E. M. G. T. Temporal variation in sediment erodibility and suspended sediment dynamics in the Dollard estuary

CUNDY, A. B., COLLINS, P. E. F., TURNER, S. D., CROUDACE, I. W. & HORNE, D. 100 years of environmental change in a coastal wetland, Augusta Bay, southeast Sicily: evidence from geochemical and palaeoecological studies

WHITEHOUSE, R. J. S. & MITCHENER, H. J. Observations of the morphodynamic behaviour of an intertidal mudflat at different timescales

HULL, J. & NUNNY, R. Mapping intertidal sediment distributions using the RoxAnn system, Dornoch Firth, NE Scotland

RIETHMÜLLER, R., HAKVOORT, J. H. M., HEINEKE, M., HEYMANN, K., KÜHL, H. & WITTE, G. Relating erosion shear stress to tidal flat surface colour

SUTHERLAND, T. F., AMOS, C. L. & GRANT, J. The erosion threshold of biotic sediments: a comparison of methods

SHAikh, M. A., MEADOWS, A. & MEADOWS, P. S. Biological control of avalanching and slope stability in the intertidal zone

MEADOWS, P. S., MEADOWS, A., WEST, F. J. C., SHAND, P. S. & SHAikh, M. A. Mussels and mussel beds (Mytilus edulis) as stabilizers of sedimentary environments in the intertidal zone

MEADOWS, P. S., MURRAY, J. M. H., MEADOWS, A., MUIR WOOD, D. & WEST, F. J. C. Microscale biogeotechnical differences in intertidal sedimentary ecosystems

MEADOWS, A., MEADOWS, P. S. & McLoughlin, P. Spatial heterogeneity in an intertidal sedimentary environment and its macrobenthic community

BOORMAN, L. A., GARbutt, A. & BARRATT, D. The role of vegetation in determining patterns of the accretion of salt marsh sediment
