

## Palaeomagnetism and Diagenesis in Sediments

Geological Society Special Publications

*Series Editors*

A. J. FLEET

R. E. HOLDSWORTH

A. C. MORTON

M. S. STOKER

It is recommended that reference to all or part of this book should be made in one of the following ways.

TARLING, D. H. & TURNER, P. (eds) 1999. *Palaeomagnetism and Diagenesis in Sediments*. Geological Society, London, Special Publications, **151**.

URBAT, M., DEKKERS, M. J. & VRIEND, S. P. 1999. The isolation of diagenetic groups in marine sediments using fuzzy *c*-means cluster analysis. *In*: TARLING, D. H. & TURNER, P. (eds) *Palaeomagnetism and Diagenesis in Sediments*. Geological Society, London, Special Publications, **151**, 000–000.

GEOLOGICAL SOCIETY SPECIAL PUBLICATION NO. 151

# Palaeomagnetism and Diagenesis in Sediments

EDITED BY

**DONALD H. TARLING**

University of Plymouth

AND

**PETER TURNER**

University of Birmingham

1999

Published by

The Geological Society

London

# THE GEOLOGICAL SOCIETY

The Society was founded in 1807 as The Geological Society of London and is the oldest geological society in the world. It received its Royal Charter in 1825 for the purpose of 'investigating the mineral structure of the Earth'. The Society is Britain's national society for geology with a membership of around 8500. It has countrywide coverage and approximately 1500 members reside overseas. The Society is responsible for all aspects of the geological sciences including professional matters. The Society has its own publishing house, which produces the Society's international journals, books and maps, and which acts as the European distributor for publications of the American Association of Petroleum Geologists, SEPM and the Geological Society of America.

Fellowship is open to those holding a recognized honours degree in geology or cognate subject and who have at least two years' relevant postgraduate experience, or who have not less than six years' relevant experience in geology or a cognate subject. A Fellow who has not less than five years' relevant postgraduate experience in the practice of geology may apply for validation and, subject to approval, may be able to use the designatory letters C Geol (Chartered Geologist).

Further information about the Society is available from the Membership Manager, The Geological Society, Burlington House, Piccadilly, London W1V 0JU, UK. The Society is a Registered Charity, No. 210161.

## Contents

|  |     |
|--|-----|
| TARLING, D. H. Introduction: sediments and diagenesis  | 1   |
| BATT, C. M. Preliminary investigations into the acquisition of remanence in archaeological sediments   | 9   |
| PISAREVSKY, S. A. Studies of post-depositional remanent magnetization and their relevance to the palaeomagnetic record   | 21  |
| BORRODALE, G. J. Viscous remanent magnetization of high thermal stability in limestone   | 27  |
| MAHER, B. A. & HOUNSLOW, M. W. The significance of magnetotactic bacteria for the palaeo- and rock magnetic record of Quaternary sediments and soils   | 43  |
| MARCO, S., RON, H., MCWILLIAMS, M. O. & STEIN, M. The locking-in of remanence in late Pleistocene sediments of Lake Lisan (palaeo Dead Sea)  | 47  |
| DINARÉS-TURELL, J. & DEKKERS, M. J. Diagenesis and remanence acquisition in the early Pliocene Trubi Marks at Punta di Maiata (southern Sicily): palaeomagnetic and rock magnetic observations | 53  |
| VIGLIOTTI, L., CAPOTONDI, L. & TORII, M. Magnetic properties of sediments deposited in suboxic–anoxic environments: relationships with biological and geochemical proxies                      | 71  |
| URBAT, M. DEKKERS, M. J. & VRIEND, S. P. The isolation of diagenetic groups in marine sediments using fuzzy <i>c</i> -means cluster analyses   | 85  |
| WILSON, G. S. & ROBERTS, A. P. Diagenesis of magnetic mineral assemblages in multiply redeposited siliclastic marine sediments, Wanganui basin, New Zealand                                    | 95  |
| TURNER, P., CHANDLER, P., ELLIS, D., LEVEILLE, G. P. & HEYWOOD, M. L. Remanence acquisition and magnetostratigraphy of the Leman Sandstone Formation: Jupiter Fields, southern North Sea       | 109 |
| HAILWOOD, E. A., BOWEN, D., DING, F., CORBETT, P. W. M. & WHATTLER, P. Characterizing pore fabrics in sediments by anisotropy of magnetic susceptibility analyses                              | 125 |
| HROUDA, F. & JEZEK, J. Magnetic anisotropy indications of deformations associated with diagenesis  | 127 |
| BORRADAILE, G. J., FRALICK, P. W. & LAGROIX, F. Acquisition of anhysteretic remanence and tensor subtraction from AMS isolates true palaeocurrent grain alignments                             | 139 |
| D'ARGENIO, B., FERRERI, V., IORIO, M., RASPINI, A. & TARLING, D. H. Diagenesis and remanence acquisition in the cretaceous carbonates of Monte Raggeto, southern Italy                         | 147 |
| MÁRTON, E. Diagenesis in platform carbonates: a palaeomagnetic study of a late Triassic–early Jurassic section, Tata (Hungary)   | 157 |
| SHOGENOVA, A. The influence of dolomitization on the magnetic properties of early Palaeozoic carbonate rocks in Estonia  | 167 |
| HAUBOLD, H. Alteration of magnetic properties of Palaeozoic platform carbonates during burial diagenesis (Lower Ordovician, Texas, USA)  | 181 |
