

# Index

- active tectonics, defined 127
- Aegean Sea, back-arc basins 41–7
  - cross-section 44
  - gravitational collapse vs slab roll-back 45
  - map 42
  - see also* Ios
- Africa, Kenya Rift lithospheric structure 257–69
- Afro-Arabian crust 239–47
- Anatolian-Arabian plates, collisions 250
- Apennines-Calabrian subduction system, Tyrrhenian Sea 32–41
- Appalachian Orogen 127–32
  - seismites
    - distribution 129
    - morphology 129
  - Taconian seismogenic deformation 127–32
- Appalachian–Caledonian Belt, Ordovician orogeny 55–9
- Arabian plate boundaries 239–45
- Asia
  - India–Asia collision zone 27–32
  - Pamir–Baikal–Okhotsk Shear Zone 27–9
  - tectonic history 30–2
  - tectonic map 26
  - and West Pacific region
    - tertiary extension causes 23–4
    - topographic map 22
- Atlantic, NE Region, volcanic rifted margins (VRMs) 314–38
- Australia, N, tectonic collision interaction with Indonesia and Papua New Guinea 86
- Australia, NW, Exmouth Plateau, tectonic deformation 271–311
  - Barrow Sub-basin seismic lines 286, 287
  - Callovian and Kimmeridge Extension 295–6
    - model predictions 296–7
  - Dampier Sub-basin
    - map 276
    - seismic reflection profile 292
  - Exmouth Sub-basin, seismic reflection profile 300
  - late Permian Extension 284–9
    - model prediction 289–91
  - late Triassic Extension 291–3
    - model predictions 293–5
  - maps 273, 275, 276
  - methodology 277–84
    - kinematic model 277–8
    - modelling parameters 279
  - regional geology 274–7
  - sensitivity of margin stratigraphy to detachment geometry 304
  - structural and stratigraphic development 284
  - Tithonian unconformity, interpreted seismic reflection line 298
  - Tithonian–Valanginian Extension 297–302
    - model predictions 301–6
- Australia–Pacific Plate, SW Pacific Neogene arcs 7–19
  - first convergence event *c.* 25 Ma 11–15
  - Hikurangi Plateau 16
  - pre-Miocene plate organization 9–11
  - reorganization (5 Ma–present) 15–16
  - role of forearc 16
  - simplification in late Miocene 15
- back-arc basin kinematics 21–53
  - Aegean Sea 41–7
  - Japan Sea 23–32
  - Tyrrhenian Sea 32–41
- Barrovian, High Himalayan Slab, Zaskar 139–56
- Bhutan, Himalayas, mechanical models of isograds and strain 141
- blueschists *see* Ios
- British Caledonides 55, 88–94, 109–26
  - configuration of northern Britain 111–13
  - correlation of Scottish with Connemara Dalradian 79
  - evolution of Laurentian margin 88–94
  - and Irish Caledonides
    - interpretation 58–9
    - map 56
  - mineralization and ore deposits 113–16
    - location of base metals 114
    - location of gold 115
  - and Newfoundland Appalachians 56, 57
  - regional geochemistry
    - Grampian Terrane 111–13, 118–19
    - Hebridean Terrane 111–13, 117
    - Lakesman Terrane 113, 120–1
    - map for Ca/K–Rb/Ba–Sr 116
    - map for Co–V–Ti 117
    - metallogeology, orthotectonics/paratectonics 121–2
    - Midland Valley Terrane 111–12, 118
    - Northern Highland Terrane 111–12, 118
    - Southern Uplands Terrane 112–13, 119–20
  - terrane analysis 109–13
    - boundary structures 110
    - geological characteristics 112
  - terranes, summary 112
