Index

Ainslie detachment, Cape Breton Island, Hollow Fault 88–96
Alba Field, UKCS, differential compaction and post-depositional sandstone remobilization 61–71
Anglesey, Wales, curvature-related fracturing 215
Arabian Plate
tectonic and stratigraphic evolution 187–96
Zagros deformation belt 187–96
basement faulting, Silesian Cracovian Region, geometry of fold arrays 167–79
bedding-plane faulting
curvature-related joints 23–4
fault-related joints 24
Black Hills foreland uplift
structural evolution 152–3
W South Dakota and NE Wyoming 145–66
geological setting 146–52
Bohemian Massif, Thaya dome
buckling and gravitational collapse of imbricated nappe sequence 197–212
metamorphic evolution 201–4
refolding of nappes and isograds 204–9
boundary element method (BEM) experiments 33–44
Brunovistulian continent, Moldanubian nappe sequence 197–212
buckle folds
3-D geometry and spatial organization 7–8
associated fractures 11–17
defined 1
and forced folds, temporal/spatial relationship 187–96
Zagros Mountains, Iran 7–8, 191–3
caldera resurgence, Ischia
drape folds 112–13
monoclinal folding 103–14
Canada, Maritimes basin, Nova Scotia, forced folding, and displacement transfer 87–101
Citara Tuff, Ischia 105–9
coal beds
Poland, Upper Silesian Coal basin (USCB), geometry of fold arrays 167–79
Wyoming, US, interbedded with sandstone, differential compaction and fractures 51–60
compactional forced folds
Alba Field, UKCS 61–71
Kaibab Monocline, Utah 23–49
Wyoming, coal interbedded with sandstone, differential compaction and fractures 51–60
compressional and strike-slip environments
Columbia River Basalt Province, Washington, USA, primary and forced folds 181–6
Fall River Formation, Black Hills foreland uplift, W South Dakota and NE Wyoming 145–66
inter-layer slip, model of forced folds 129–44
Silesian Cracovian Region, Poland, geometry of fold arrays 167–79
curvature-related joints, bedding-plane faulting 23–4
deformation processes
competition 142
en echelon folds 167–79
developable fold surfaces, neutral surface folds and forced folds 213–21
displacement transfer, and forced folding, Maritimes basin, Nova Scotia, eastern Canada 87–101
Dogger strata, Rhine graben, extensional forced folding and decollement 73–86
drag folds (stratal folding), Mexico 115–28
comparison with throw patterns 124
distribution 120–4
drape folds
and caldera resurgence at Ischia 112–13
coal, USCB 173
dune boundaries, Navajo Formation
boundary element method (BEM) experiments 33–44
defined 28
field data 32–3
joints associated 30
slip, location and extent 30–3
slip and fold curvature, East Kaibab Monocline, Utah 23–49
en echelon folds 167–79
extensional forced folding
caldera resurgence at Ischia 103–14
and decollement, Rhine graben 73–86
Maritimes basin, Nova Scotia 87–101
Mississippi Delta tectonics, Gulf of Mexico 115–28
Fall River Formation
Black Hills foreland uplift, W South Dakota and NE Wyoming 145–66
fracture domains 153–7
joint readings 157–61
stratigraphy 153
fault-bend folds 11
flexural flow folds, inter-layer slip, model 129–44
flexural slip folding 140
model 214–15
footwall
and hangingwall 121
Rhine graben 73–86
forced folds
  3-D geometry and spatial organization 8–11
  adjacent to normal faults, Gulf of Mexico 115–28
  Columbia River Basalt Province, Washington 181–6
  defined 1, 193
  extensional and décollement, pre-rift series Rhine graben 73–86
  Maritimes basin, Nova Scotia 87–101
  fold arrays in Silesian Cracovian Region, southern Poland 167–80
  fold curvature, and fracture density 17–19
  Maritimes basin, Nova Scotia 87–101
  model, inter-layer slip 129–44
  retrodeformable kinematic model, sequential development 97
  Rhine graben 73–86
  Tertiary sediments of Alba Field, UKCS 61–71
  Zagros Mountains, Iran 7–8, 193–5
  fracture density, and fold curvature 17–19
  fracture formation, timing 19–20
  fracture patterns, W South Dakota and NE Wyoming 145–66

Gaussian curvature, 3-D flexural slip folding model 214–15
Green River Basin, Mesaverde Group, sandstone and coal 51–60
growth faults, Gulf of Mexico 115–28
Gulf of Mexico, fold patterns adjacent to normal faults 115–28
Gulf of St Lawrence, Maritimes basin, Nova Scotia 87–101

hangingwall
  and footwall, drag folds 121
  Rhine graben 73–86

inter-layer slip
  model of forced folds 129–44
  wrench faulting 174–6
  Iran, Zagros Mountains 7–8, 187–96
  Iranian Block, tectonic and stratigraphic evolution 187–96
  Ischia, Italy
  caldera resurgence 103–14
  drape folds 110–11

Kaibab Monocline, Utah
  curvature-related joints 23–4
  field evidence 27
  interlayer slip 27
  numerical modelling 23–49

kink folds 220–1
layer-parallel slip 141
Louisiana, Gulf of Mexico, fold patterns adjacent to normal faults 115–28

Maritimes basin, Nova Scotia 87–101
Mesaverde Group, differential compaction of interbedded sandstone and coal 51–60
metamorphic zonation, Thaya dome, imbricated nappe sequence 197–212
Mississippi Delta tectonics, Gulf of Mexico 115–28
models of forced folds 129–44
  composition 130–3
  Gaussian curvature 214–11
  interpretation of fracture fabrics 137–9
  results 133–7
Moldanubian nappe sequence, Bohemian Massif, Thaya dome 197–212
monoclinal folding, induced by caldera resurgence at Ischia 103–14
Moray Firth, Outer, Alba Field, differential compaction and post-depositional sandstone remobilization 61–71
Mount Epomeo Green Tuff (MEGT), Ischia 103–13
multilayer flexures, interlayer slip and joint localization 23–49

Navajo Formation, Utah 28–49
neutral surface folds, and forced folds, three-dimensional fold geometries, and strain patterns 213–21
normal faults, vs reverse faults 115–28
North Sea, Alba Field, UKCS, differential compaction and post-depositional sandstone remobilization 61–71

Olympic–Wallowa lineament (OWL), Washington 181–6
pencil box shear folding 218
Poland, Silesian Cracovian Region, geometry of fold arrays 167–79
Powder River basin, and Black Hills foreland uplift, Wyoming 151
Priabonian, Rhine graben 74–7
profile geometry of forced folds and buckle folds 7–21
Quaternary, Late, monoclinal folding, caldera resurgence at Ischia 103–14
INDEX

Rattlesnake Mountain anticline, Rocky Mountains, monoclinic structure 96
regional tectonics, and fracture patterns, Fall River Formation, W South Dakota and NE Wyoming 145–66
reverse folding, adjacent to normal faults 119
Rhine graben
extensional forced folds and decollement, pre-rift series, influence on geometry of syn-rift sequences 73–86
geology and tectonics 73–4
Rocky Mountains, Rattlesnake Mountain anticline 96
Rupelian, Rhine graben 74–7
sandstone
Bedded and Injected Sandstone Facies, Alba Field 63–4
interbedded with coal 51–60
remobilization, post-depositional 61–71
Saudi Arabian Plate, Zagros deformation belt 187–96
shear folding, pencil box 218
Silesian Cracovian Region, Poland, geometry of fold arrays 167–79
South Dakota, and NE Wyoming, Fall River Formation, regional tectonics 145–66
strain patterns, prediction, 3-D fold geometries, neutral surface folds and forced folds 213–21
stratal folding (drag folds) 115–28
strike-slip faulting, Silesian Cracovian Region, geometry of fold arrays 167–79
strike-slip zone, wrenching regime, kinematics 172
syn-rift sequences, Rhine graben 73–86
temporal/spatial relationship
forced folds, and buckle folds 187–96
prediction of 3-D fold geometries, neutral surface folds and forced folds 213–21
Thaya dome, Bohemian Massif, buckling of nappe sequence 197–212

Tethys and Neo-Tethys Sea 187–8
Thaya dome, Bohemian Massif, buckling and gravitational collapse of imbricated nappe sequence 197–212
three-dimensional fold geometries
classification and folding mechanism 219
flexural folding model, Gaussian curvature 214–15
and spatial organization, forced folds and buckle folds 7–8
underthrusting, Brunovistulian continent,
Moldanubian nappe sequence 197–212
Urmieh-Dokhtar magmatic arc 188
Utah, East Kaibab Monocline, Hackberry Canyon 23–49
Vosges Massif, Rhine graben 73–4
Washington, Columbia River Basalt Province, primary and forced folds 181–6
wrench faulting
associated buckling 191–3
inter-layer slip 174–6
strike-slip zone 172
Wyoming, Rock Springs Uplift, interbedded coal with sandstone 51–60
Wyoming, NE, and South Dakota, Fall River Formation 145–66
Yakima fold belt, Columbia River Basalt Province, Washington 181–6
Zagros deformation belt, Saudi Arabian Plate 187–96
Zagros Mountains, Iran, buckle folds and forced folds 7–8
