Deformation of Glacial Materials
Glacier de Saleina, Valais, Switzerland – a small, fast-flowing and heavily-crevassed valley glacier. (Photo: M. J. Hambrey).
Deformation of Glacial Materials

EDITED BY

ALEX J. MALTMAN, BRYN HUBBARD
& MICHAEL J. HAMBREY
(University of Wales, Aberystwyth)

2000
Published by
The Geological Society
London
The Geological Society of London was founded in 1807 and is the oldest geological society in the world. It received its Royal Charter in 1825 for the purpose of ‘investigating the mineral structure of the Earth’ and is now Britain’s national society for geology.

Both a learned society and a professional body, the Geological Society is recognized by the Department of Trade and Industry (DTI) as the chartering authority for geoscience, able to award Chartered Geologist status upon appropriately qualified Fellows. The Society has a membership of 9099, of whom about 1500 live outside the UK.

Fellowship of the Society is open to those holding a recognized honours degree in geology or cognate subject and who have at least two years’ relevant postgraduate experience, or who have not less than six years’ relevant experience in geology or a cognate subject. A Fellow with a minimum of five years’ relevant postgraduate experience in the practice of geology may apply for chartered status. Successful applicants are entitled to use the designatory postnominal CGeol (Chartered Geologist). Fellows of the Society may use the letters FGS. Other grades of membership are available to members not yet qualifying for Fellowship.

The Society has its own publishing house based in Bath, UK. It produces the Society’s international journals, books and maps, and is the European distributor for publications of the American Association of Petroleum Geologists, (AAPG), the Society for Sedimentary Geology (SEPM) and the Geological Society of America (GSA). Members of the Society can buy books at considerable discounts. The publishing House has an online bookshop (http://bookshop.geolsoc.org.uk).

Further information on Society membership may be obtained from the Membership Services Manager, The Geological Society, Burlington House, Piccadilly, London W1V 0JU, UK. (Email: enquiries@geolsoc.org.uk; tel: +44 (0)207 434 9944).

The Society’s Web Site can be found at http://www.geolsoc.org.uk/. The Society is a Registered Charity, number 210161.
