Special Publication reviewing procedures

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Publications Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society has a team of series editors (listed above) who ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's series editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

Geological Society Special Publications are included in the ISI Science Citation Index, but they do not have an impact factor, the latter being applicable only to journals.

More information about submitting a proposal and producing a Special Publication can be found on the Society's web site: www.geolsoc.org.uk.

GEOLOGICAL SOCIETY SPECIAL PUBLICATION NO. 181

Climates: Past and Present

EDITED BY

MALCOLM B. HART

Department of Geological Sciences, University of Plymouth, UK

2000
Published by
The Geological Society
London

THE GEOLOGICAL SOCIETY

The Geological Society of London was founded in 1807 and is the oldest geological society in the world. It received its Royal Charter in 1825 for the purpose of 'investigating the mineral structure of the Earth' and is now Britain's national society for geology.

Both a learned society and a professional body, the Geological Society is recognized by the Department of Trade and Industry (DTI) as the chartering authority for geoscience, able to award Chartered Geologist status upon appropriately qualified Fellows. The Society has a membership of 9099, of whom about 1500 live outside the UK.

Fellowship of the Society is open to persons holding a recognized honours degree in geology or a cognate subject and who have at least two years' relevant postgraduate experience, or not less than six years' relevant experience in geology or a cognate subject. A Fellow with a minimum of five years' relevant postgraduate experience in the practice of geology may apply for chartered status. Successful applicants are entitled to use the designatory postnominal CGeol (Chartered Geologist). Fellows of the Society may use the letters FGS. Other grades of membership are available to members not yet qualifying for Fellowship.

The Society has its own Publishing House based in Bath, UK. It produces the Society's international journals, books and maps, and is the European distributor for publications of the American Association of Petroleum Geologists (AAPG), the Society for Sedimentary Geology (SEPM) and the Geological Society of America (GSA). Members of the Society can buy books at considerable discounts. The Publishing House has an online bookshop (<http://bookshop.geolsoc.org.uk>).

Further information on Society membership may be obtained from the Membership Services Manager, The Geological Society, Burlington House, Piccadilly, London W1V 0JU (Email: enquiries@geolsoc.org.uk; tel: +44 (0)207 434 9944).

The Society's Web Site can be found at <http://www.geolsoc.org.uk/>. The Society is a Registered Charity, number 210161.

Contents

Introduction	1
Pre-Cenozoic Climates	
CLAUSING, A. & BOY, J. A. Lamination and primary production in fossil lakes: relationship to palaeoclimate in the Carboniferous–Permian transition	5
BEERLING, D. J. Global terrestrial productivity in the Mesozoic era	17
HART, M. B. Climatic modelling in the Cretaceous using the distribution of planktonic Foraminiferida	33
GOLOVNEVA, L. B. The Maastrichtian (Late Cretaceous) climate in the Northern Hemisphere	43
Mid-Cenozoic Climates	
CHIRA, C., FILIPESCU, S. & CODREA, V. Palaeoclimatic evolution in the Miocene from the Transylvanian Depression reflected in the fossil record	55
JURKSCHAT, TH., FENNER, J., FISCHER, R. & MICHALZIK, D. Environmental changes in pre- evaporitic Late Miocene time in the Lorca Basin (SE Spain): diatom results	65
KORPÁS-HÓDI, M., NAGY, E., NAGY-BODOR, E., SZÉKVÖLGYI, K. & KOVÁCS, L. Ó. Late Miocene climatic cycles and their effect on sedimentation (west Hungary)	79
KVAČEK, Z. Climatic oscillations versus environmental changes in the interpretation of Tertiary plant assemblages	89
Responses to Quaternary Climate Change	
AMORE, F. O., CIAMPO, G., DI DONATO, V., ESPOSITO, P., RUSSO ERMOLLI, E. & STAITI, D. An integrated micropalaeontological approach applied to Late Pleistocene–Holocene palaeoclimatological and palaeoenvironmental changes (Gaeta Bay, Tyrrhenian Sea)	95
DI GERONIMO, I., DI GERONIMO, R., LA PERNA, R., ROSSO, A. & SANFILIPPO, R. Cooling evidence from Pleistocene shelf assemblages in SE Sicily	113
NAGY-BODOR, E., JÁRAI-KOMLÓDI, M. & MEDVE, A. Late Glacial and Post-Glacial pollen records and inferred climatic changes from Lake Balaton and the Great Hungarian Plain	121
ROHLING, E. J., DE RIJK, S., MYERS, P. G. & HAINES, K. Palaeoceanography and numerical modelling: the Mediterranean Sea at times of sapropel formation	135

RUSO ERMOLLI, E. Pollen analysis of the Acerno palaeo-lacustrine succession (Middle Pleistocene, southern Italy)	151
Vertebrate and Hominid Evolution as a Response to Climate Change	
AZANZA, B., ALBERDI, M. T. & PRADO, J. L. Large mammal turnover pulses correlated with latest Neogene glacial trends in the northwestern Mediterranean region	161
BONFIGLIO, L., MARRA, A. C. & MASINI, F. The contribution of Quaternary vertebrates to palaeoenvironmental and palaeoclimatological reconstructions in Sicily	171
CHALINE, J., DURAND, A., DAMBRICOURT MALASSÉ, A., DAVID, B., MAGNIEZ-JANNIN, F. & Marchand, D. Were climatic changes a driving force in hominid evolution?	185
FLADERER, F. A. Late Quaternary vertebrate taphocoenoses from cave deposits in southeastern Austria: responses in a periglacial setting	199
Index	215
