RUTTER, E., HOLDSWORTH, R.E. & KNIPE, R.J. The nature and tectonic significance of fault zone weakening: an introduction	1
Insights from neotectonic settings, deformation experiments and modelling studies	
TOWNEND, J. & ZOBACK, M. Implications of earthquake focal mechanisms for the frictional strength of the San Andreas fault system	13
KOPF, A. Permeability variation across an active low-angle detachment, western Woodlark Basin (ODP Leg 180) and its implication for fault activation	23
MAIN, I., MAIR, K., KWON, O., ELPHICK, S. & NGWENYA, B. Experimental constraints on the mechanical and hydraulic properties of deformation bands in porous sandstones: a review	43
FURLONG, K.P., SHEAFFER, S.D. & MALSERSVISI, R. Thermo-rheological controls on deformation within oceanic transforms	65
Insights from natural fault rocks	
WARR, L.N. & COX, S. Clay mineral transformations and weakening mechanisms along the Alpine Fault, New Zealand	85
YAN, Y., VAN DER PLUJM, B.A. & PEACOR, D.R. Deformation microfabrics of clay gouge, Lewis Thrust, Canada: a case for fault weakening from clay transformation	103
MITRA, G. & ISMAT, Z. Microfracturing associated with reactivated fault zones and shear zones: what it can tell us about deformation history	113
STEFFEN, K., SELVERSTONE, J. & BREARLEY, A. Episodic weakening and strengthening during synmetamorphic deformation in a deep crustal shear zone in the Alps	141
Geometric controls and fault system evolution	
WALSH, J.J., CHILDS, C., MEYER, V., MANZOCCHI, T., IMBER, J., NICOL, A., TUCKWELL, G., BAILEY, W.R., BONSON, C.G., WATTERSON, J., NELL, P.A. & STRAND, J. Geometric controls on the evolution of normal fault systems	157
WOJTAL, S.F. The nature and origin of asymmetric arrays of shear surfaces in fault zones	171
BEACOM, L.E., HOLDSWORTH, R.E., MCCAFFREY, K.J.W. & ANDERSON, T.B. A quantitative study of the influence of pre-existing compositional and fabric heterogeneities upon fracture zone development during basement reactivation	195
Insights from lithosphere- to crustal-scale fault zones	
TIKOFF, B., KELSO, P., MANDUCA, C., MARKLEY, M.J. & GILLASPY, J. Lithospheric and crustal reactivation of an ancient plate boundary: the assembly and disassembly of the Salmon River suture zone, Idaho, USA	213
SIMPSON, C., WHITMEYER, S.J., DE PAOR, D.G., GROMET, L.P., MIRO, R., KROL, M.A. & SHORT, H. Sequential ductile through brittle reactivation of major fault zones along the accretionary margin of Gondwana in Central Argentina	233
HATCHER, R.D. Rheological partitioning during multiple reactivation of the Paleozoic Brevard Fault Zone, Southern Appalachians, USA	255
TAVARNELLI, E., DECANDIA, F.A., RENDA, P., TRAMUTOLI, M., GUEGUEN, E. & ALBERTI, M. Repeated reactivation in the Apennine–Maghrebide system, Italy: an example of fault zone weakening?	271

TALBOT, C.J. Weak zones in Precambrian Sweden.	285
HANDY, M.R, MULCH, R., ROSENAU, M. & ROSENBERG, C.R. The role of fault zones and melts as agents of weakening, hardening and differentiation of the continental crust—a synthesis	305
