

# Non-Volcanic Rifting of Continental Margins: A Comparison of Evidence from Land and Sea

## Geological Society Special Publications

### *Series Book Editors*

A. J. FLEET (CHIEF EDITOR)

P. DOYLE

F. J. GREGORY

J. S. GRIFFITHS

A. J. HARTLEY

R. E. HOLDSWORTH

A. C. MORTON

N. S. ROBINS

M. S. STOKER

J. P. TURNER

### **Special Publication reviewing procedures**

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Publications Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society has a team of series editors (listed above) who ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's series editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

Geological Society Special Publications are included in the ISI Science Citation Index, but they do not have an impact factor, the latter being applicable only to journals.

More information about submitting a proposal and producing a Special Publication can be found on the Society's web site: [www.geolsoc.org.uk](http://www.geolsoc.org.uk).

# THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of 9000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to [www.geolsoc.org.uk](http://www.geolsoc.org.uk).

**The Geological Society Publishing House** (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the American Geological Institute (AGI), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from [www.geolsoc.org.uk](http://www.geolsoc.org.uk)) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies world-wide, consult [www.geolsoc.org.uk](http://www.geolsoc.org.uk), or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; Email: [enquiries@geolsoc.org.uk](mailto:enquiries@geolsoc.org.uk).

# Contents

## Part 1: Introduction

WILSON, R. C. L., WHITMARSH, R. B., TAYLOR, B. & FROITZHEIM, N. Introduction: the land and sea approach 1

BOILLOT, G. & FROITZHEIM, N. Non-volcanic rifted margins, continental break-up and the onset of sea-floor spreading: some outstanding questions 9

## Part 2: Margin overviews

HUCHON, P., NGUYEN, T. N. H. & CHAMOT-ROOKE, N. Propagation of continental break-up in the southwestern South China Sea 31

SAYERS, J., SYMONDS, P., DIREEN, N. G. & BERNARDEL, G. Nature of the continent–ocean transition on the non-volcanic rifted margin of the central Great Australian Bight 51

CHALMERS, J. A. & PULVERTAFT, T. C. R. Development of the continental margins of the Labrador Sea—a review 77

WHITMARSH, R. B., MINSHULL, T. A., RUSSELL, S. M., DEAN, S. M., LOUDEN, K. E. & CHIAN, D. The role of syn-rift magmatism in the rift-to-drift evolution of the west Iberia continental margin: geophysical observations 107

BERTOTTI, G. Subsidence, deformation, thermal and mechanical evolution of the Mesozoic South Atlantic rifted margin: an analogue for Atlantic-type margins 125

## Part 3: Exhumed crust and mantle

ABE, N. Petrochemistry of serpentinized peridotite from the Iberia Abyssal Plain (ODP Leg 173): its character intermediate between sub-oceanic and sub-continental upper mantle 143

HÉBERT, R., GUEDDARI, K., LAFLÈCHE, M. R., BESLIER, M.-O. & GARDIEN, V. Petrology and geochemistry of exhumed peridotites and gabbros at non-volcanic margins: ODP leg 173, West Iberia ocean–continent transition zone 161

GARDIEN, V., POUPEAU, G., MUCEKU, B., HÉBERT, R., BEAUDOUIN, G. & LABRIN, E. The evolution of amphibolites from drilling Site 1067, ODP Leg 173 (Iberia Abyssal Plain): Jurassic rifting to Pyrenean collision 191

ZHAO, X. Palaeomagnetic and rock magnetic results from serpentinized peridotites beneath the Iberia Abyssal Plain 209

DESMURS, L., MANATSCHAL, G. & BERNOULLI, D. The Steinmann trinity revisited: mantle exhumation and magmatism along an ocean–continent transition: the Platta nappe, eastern Switzerland 235

MÜNTENER, O. & HERMANN, J. The role of lower crust and continental upper mantle during formation of non-volcanic passive continental margins: evidence from the Alps 267

## Part 4: Tectonics and stratigraphy

BUCK, R. & LAVIER, L. L. A tale of two kinds of normal fault: the importance of strain weakening in fault development 289

ABERS, G. A. Evidence for seismogenic normal faults at shallow dips in continental rifts 305

ROLLER, S., BEHRMANN, J. H. & KOPF, A. Deformation fabrics of faulted rocks and some syntectonic stress estimates from the active Woodlark Basin detachment zone (ODP leg 180) 319

ROBERTSON A. H. F., AWADALLAH, S., GERBAUDO, S., LACKSCHEWITZ, K. S., MONTELEONE, B. D., SHARP, T. R. & other members of the Shipboard Scientific Party. Evolution of the Miocene–Recent Woodlark Rift Basin, SW Pacific, inferred from sediments drilled during Ocean Drilling Program Leg 180 335

LACKSCHEWITZ, K., BOGAARD, P. V. D. & MERTZ, D. F. <sup>40</sup> Ar/ <sup>39</sup> Ar ages of fallout tephra layers and volcanoclastic deposits in the sedimentary succession of the western Woodlark Basin, Papua New Guinea: The marine record of Miocene–Pleistocene volcanism	373
RESIG, J. M., FROST, G. M., ISHIKAWA, N. & PEREMBO, R. C. B. Micropalaeontologic and palaeomagnetic approaches to stratigraphic anomalies in rift basins: ODP Site 1109, Woodlark Basin	389
MANATSCHAL, G., FROITZHEIM, N., RUBENACH, M. & TURIN, B. The role of detachment faulting in the formation of an ocean–continent transition: insights from the Iberia Abyssal Plain	405
WILSON, R. C. L., MANATSCHAL, G. & WISE, S. Rifting along non-volcanic passive margins: stratigraphic and seismic evidence from the Mesozoic of the Alps and Western Iberia	429
KHALIL, S. M. & MCCLAY, K. R. Tectonic evolution of the northwestern Red Sea–Gulf of Suez system	453
SONG, T., CAWOOD, P. A. & MIDDLETON, M. Transfer zones normal and oblique to rift trend: examples from the Perth Basin, Western Australia	475
<b>Part 5: Numerical models of extension and magmatism</b>	
CLIFT, P. D., LIN, J. & ODP LEG 184 SCIENTIFIC PARTY. Patterns of extension and magmatism along the continent–ocean boundary, South China Margin	489
BOWLING, J. C. & HARRY, D. L. Geodynamic models of continental extension and the formation of non-volcanic rifted continental margins	511
MINSHULL, T. A., DEAN, S. M., WHITE, R. S. & WHITMARSH, R. B. Anomalous melt production after continental breakup in the southern Iberia Abyssal Plain	537
PÉREZ-GUSSINYÉ, M., RESTON, T. & PHIPPS MORGAN, J. Serpentinization and magmatism during extension at non-volcanic margins—the effect of initial lithosphere structure	551
Index	577
