Special Publication reviewing procedures

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society has a team of Book Editors (listed above) who ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

Geological Society Special Publications are included in the ISI Index of Scientific Book Contents, but they do not have an impact factor, the latter being applicable only to journals.

More information about submitting a proposal and producing a Special Publication can be found on the Society's web site: www.geolsoc.org.uk.

It is recommended that reference to all or part of this book should be made in one of the following ways:

VANCE, D., MÜLLER, W. & VILLA, I. M. (eds) 2003. *Geochronology: Linking the Isotopic Record with Petrology and Textures*. Geological Society, London, Special Publications, **220**.

THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of 9000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to www.geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the American Geological Institute (AGI), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult www.geolsoc.org.uk, or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: enquiries@geolsoc.org.uk.

For information about the Society's meetings, consult *Events* on www.geolsoc.org.uk. To find out more about the Society's Corporate Affiliates Scheme, write to enquiries@geolsoc.org.uk.

Contents

Preface	vii
Introduction	
VANCE, D., MÜLLER, W. & VILLA, I. M. Geochronology: linking the isotopic record with petrology and textures — an introduction	1
Improving the link between accessory phase chronometers and petrological information	
FOSTER, G. & PARRISH, R. R. Metamorphic monazite and the generation of P–T–t paths	25
WHITEHOUSE, M. J. Rare earth elements in zircon: a review of applications and case studies from the Outer Hebridean Lewisian Complex, NW Scotland	49
MÖLLER, A., O'BRIEN P. J., KENNEDY, A. & KRÖNER, A. Linking growth episodes of zircon and metamorphic textures to zircon chemistry: an example from the ultrahigh-temperature granulites of Rogaland (SW Norway)	65
Advances in the chronometry of major minerals — prograde histories	
ANCZKIEWICZ, R. & THIRLWALL, M. F. Improving precision of Sm–Nd garnet dating by H ₂ SO ₄ leaching: a simple solution to the phosphate inclusion problem	83
ZHENG, Y.-F., ZHAO, Z.-F., LI, S.-G. & GONG, B. Oxygen isotope equilibrium between ultrahigh-pressure metamorphic minerals and its constraints on Sm–Nd and Rb–Sr chronometers	93
STOWELL, H. H. & TINKHAM, D. K. Integration of phase equilibria modelling and garnet Sm–Nd chronology for construction of P–T–t paths: examples from the Cordilleran Coast Plutonic Complex, USA	119
ROMER, R. L. & RÖTZLER, J. Effect of metamorphic reaction history on the U–Pb dating of titanite	147
Textually controlled ('in-situ') chronometry	
CLIFF, R. A. & MEFFAN-MAIN, S. Evidence from Rb–Sr microsampling geochronology for the timing of Alpine deformation in the Sonnblick Dome, SE Tauern Window, Austria	159
VANHAECKE, F., DE WANNEMACKER, G., BALCAEN, L. & MOENS, L. The use of dynamic reaction cell ICP mass spectrometry to facilitate Rb–Sr age determination	173
Understanding transport processes in rocks	
BAXTER, E. F. Natural constraints on metamorphic reaction rates	183
KRIEGSMAN, L. M. & NYSTRÖM, A. I. Melt segregation rates in migmatites: review and critique of common approaches	203
NYSTRÖM, A. I. & KRIEGSMAN, L. M. Prograde and retrograde reactions, garnet zoning patterns, and accessory phase behaviour in SW Finland migmatites, with implications for geochronology	213
WARTH, J.-A. & KELLEY, S. P. ⁴⁰ Ar/ ³⁹ Ar ages in mantle xenolith phlogopites: determining the ages of multiple lithospheric mantle events and diatreme ascent rates in southern Africa and Malaita, Solomon Islands	231
KRAMAR, N., COSCA, M. A., BUFFAT, P.-A. & BAUMGARTNER, L. P. Stacking fault-enhanced argon diffusion in naturally deformed muscovite	249
Index	261

Preface

The inspiration for this volume came from a symposium held at the 2002 Davos Goldschmidt. The editors would like to thank the following for their assistance with the reviewing of papers submitted to this Special Publication:

Jeff Amato
Tom Argles
Ethan Baxter
Mike Brown
Ray Burgess
John Christensen
Fernando Corfu
Gianfranco DiVincenzo
John Fitzgerald
Gavin Foster
Geoff Fraser
Robert Handler
Nigel Harris

Bodo Hattendorf
Dorrit Jacob
Rebecca Jamieson
Simon Kelley
Jan Kosler
Jim Lee
Anthi Liati
Beatrice Luais
Roland Maas
Dave Matthey
Franz Neubauer
Paddy O'Brien
Ian Parsons

Steve Reddy
Paule Renne
Daniela Rubatto
Erik Scherer
Frank Spear
John Tarney
Matthew Thirlwall
Alan Thompson
Jo-Anne Wartho
Dave Waters
Martin Whitehouse
Donna Whitney
