Special Publication reviewing procedures

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society has a team of Book Editors (listed above) who ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

Geological Society Special Publications are included in the ISI Index of Scientific Book Contents, but they do not have an impact factor, the latter being applicable only to journals.

More information about submitting a proposal and producing a Special Publication can be found on the Society's web site: www.geolsoc.org.uk.

It is recommended that reference to all or part of this book should be made in one of the following ways:

ALSOP, G. I., HOLDSWORTH, R. E., MCCAFFREY, K. J. W. & HAND, M. (eds) 2004. *Flow Processes in Faults and Shear Zones*. Geological Society, London, Special Publications, **224**.

CASCIELLO, E., CESARANO, M. & COSGROVE, J. 2004. Shear deformation of pelitic rocks in a large-scale natural fault. *In*: ALSOP, G. I., HOLDSWORTH, R. E., MCCAFFREY, K. J. W. & HAND, M. (eds) 2004. *Flow Processes in Faults and Shear Zones*. Geological Society, London, Special Publications, **224**, 113–125.

THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of 9000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to www.geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the American Geological Institute (AGI), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult www.geolsoc.org.uk, or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: enquiries@geolsoc.org.uk.

For information about the Society's meetings, consult *Events* on www.geolsoc.org.uk. To find out more about the Society's Corporate Affiliates Scheme, write to enquiries@geolsoc.org.uk.

Contents

ALSOR, G. I. & HOLDSWORTH, R. E. Shear zones – an introduction and overview	1
DIJKSTRA, A. H., DRURY, M. R., VISSERS, R. L. M., NEWMAN, J. & VAN ROERMUND, H. L. M. Shear zones in the upper mantle: evidence from alpine- and ophiolite-type peridotite massifs	11
WHITE, J. C. Instability and localization of deformation in lower crust granulites, Minas fault zone, Nova Scotia, Canada	25
LLOYD, G. E. Microstructural evolution in a mylonitic quartz simple shear zone: the significant roles of dauphine twinning and misorientation	39
PIAZOLO, S., ALSOR, G. I., MØLLER NIELSEN, B. & VAN GOOL, J. A. M. The application of GIS to unravel patterns of deformation in high grade terrains: a case study of indentor tectonics from west Greenland	63
VIGNERESSE, J. L. Rheology of a two-phase material with applications to partially molten rocks, plastic deformation and saturated soils	79
COLLETTINI, C. & BARCHI, M. R. A comparison of structural data and seismic images for low-angle normal faults in the Northern Apennines (Central Italy): constraints on activity	95
CASCIELLO, E., CESARANO, M. & COSGROVE, J. Shear deformation of pelitic rocks in a large-scale natural fault	113
MALTMAN, A. & VANNUCCHI, P. Insights from the Ocean Drilling Program on shear and fluid-flow at the mega-faults between actively converging plates	127
JANSSEN, C., LÜDERS, V. & HOFFMANN-ROTHER, A. Contrasting styles of fluid–rock interaction within the West Fissure Zone in northern Chile	141
GUPTA, S. & BICKLE, M. J. Ductile shearing, hydrous fluid channelling and high-pressure metamorphism along the basement–cover contact on Sikinos, Cyclades, Greece	161
ALSOR, G. I. & HOLDSWORTH, R. E. Shear zone folds: records of flow perturbation or structural inheritance?	177
MACINNES, E. A. & WHITE, J. C. Geometric and kinematic analysis of a transpression terrane boundary: Minas fault system, Nova Scotia, Canada	201
PEREIRA, M. F. & SILVA, J. B. Development of local orthorhombic fabrics within a simple-shear dominated sinistral transpression zone: the Arronches sheared gneisses (Iberian Massif, Portugal)	215
OCCHIPINTI, S. A. & REDDY, S. M. Deformation in a complex crustal-scale shear zone: Errabiddy Shear Zone, Western Australia	229
BAILEY, C. M., FRANCIS, B. E. & FAHRNEY, E. E. Strain and vorticity analysis of transpressional high-strain zones from the Virginia Piedmont, USA	249
GIORGIS, S. & TIKOFF, B. Constraints on kinematics and strain from feldspar porphyroclast populations	265
GUMIAUX, C., BRUN, J. P. & GAPAIS, D. Strain removal within the Hercynian Shear Belt of Central Brittany (western France): methodology and tectonic implications	287

CARRERAS, J., DRUGUET, E., GRIERA, A. & SOLDEVILA, J. Strain and deformation history in a syntectonic pluton. The case of the Roses granodiorite (Cap de Creus, Eastern Pyrenees)	307
MOLLI, G. & TRIBUZIO, R. Shear zones and metamorphic signature of subducted continental crust as tracers of the evolution of the Corsica/Northern Apennine orogenic system	321
CHEW, D. M., DALY, J. S., FLOWERDEW, M. J., KENNEDY, M. J. & PAGE, L. M. Crenulation-slip development in a Caledonian shear zone in NW Ireland: evidence for a multi-stage movement history	337
MAZZOLI, S., INVERNIZZI, C., MARCHEGIANI, L., MATTIONI, L. & CELLO, G. Brittle–ductile shear zone evolution and fault initiation in limestones, Monte Cugnone (Lucania), southern Apennines, Italy	353
Index	375

Referees

The editors are very grateful to the following people for their help in refereeing papers for this volume.

- C. M. Bailey, College of William and Mary, USA
W. Bailey, CSIRO Petroleum, Australia
M. Barchi, Università di Perugia, Italy
M. Bestmann, Liverpool University, UK
M. Bickle, Cambridge University, UK
M. Brown, University of Maryland, USA
J. Carreras, Universitat Autònoma de Barcelona, Spain
C. Ehlers, Åbo Akademi University, Finland
D. Gapais, Université de Rennes 1, France
J. Imber, University of Durham, UK
R. Jamieson, Dalhousie University, Canada
D. Jiang, University of Maryland, USA
S. Johnson, University of Maine, USA
R. R. Jones, CognIT, Norway
M. Krabbendam, British Geological Survey, UK
R. Law, Virginia Tech, USA
S. Lin, University of Waterloo, Canada
G. E. Lloyd, University of Leeds, UK
A. Maltman, Aberystwyth University, UK
A. McCaig, University of Leeds, UK
B. Miller, San Jose State University, USA
T. Needham, University of Leeds, UK
G. J. H. Oliver, University of St Andrews, UK
C. W. Passchier, Johannes Gutenberg Universität, Germany
