Special Publication reviewing procedures

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society has a team of Book Editors (listed above) who ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

Geological Society Special Publications are included in the ISI Index of Scientific Book Contents, but they do not have an impact factor, the latter being applicable only to journals.

More information about submitting a proposal and producing a Special Publication can be found on the Society's web site: www.geolsoc.org.uk.

It is recommended that reference to all or part of this book should be made in one of the following ways:

MALPAS, J., FLETCHER, C. J. N., AITCHISON, J. C. & ALI, J. (eds) 2004. *Aspects of the Tectonic Evolution of China*. Geological Society, London, Special Publications, **226**.

HACKER, B., RATSCHBACHER, L. & LIOU, J. G. 2004. Subduction, collision and exhumation in the ultrahigh-pressure Qinling-Dabie orogen. *In*: MALPAS, J., FLETCHER, C. J. N., ALI, J. & AITCHISON, J. C. (eds) *Aspects of the Tectonic Evolution of China*. Geological Society, London, Special Publications, **226**, 157–176.

GEOLOGICAL SOCIETY SPECIAL PUBLICATION NO. 226

THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of 9000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to www.geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the American Geological Institute (AGI), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult www.geolsoc.org.uk, or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: enquiries@geolsoc.org.uk.

For information about the Society's meetings, consult *Events* on www.geolsoc.org.uk. To find out more about the Society's Corporate Affiliates Scheme, write to enquiries@geolsoc.org.uk.

Contents

MALPAS, J. Preface	1
Precambrian	
WILDE, S. A., CAWOOD, P. A., WANG, K., NEMCHIN, A. & ZHAO, G. Determining Precambrian crustal Evolution in China: a case-study from Wutaishan, Shanxi Province, demonstrating the application of precise SHRIMP U–Pb Geochronology	5
ZHAO, G., SUN, M., WILDE, S. A. & GUO, J. Late Archaean to Palaeoproterozoic evolution of the Trans-North China Orogen: Insights from synthesis of existing data of the Hengshan–Wutai–Fuping belt	27
ZHAI, M. Precambrian tectonic evolution of the North China Craton	57
Palaeozoic	
JAHN, B.-M. The central Asian Orogenic Belt and growth of the continental crust in the Phanerozoic	73
BUCKMAN, S. & AITCHISON, J. C. Tectonic evolution of Palaeozoic terranes in West Junggar, Xinjiang, NW China	101
YUAN, C., SUN, M., YANG, J., ZHOU, H. & ZHOU, M.-F. Nb-depleted, continental rift-related Akaz metavolcanic rocks (West Kunlun): implication for the rifting of the Tarim Craton from Gondwana	131
FLETCHER, C. J. N., CHAN, L. S., SEWELL, R. J., CAMPBELL, S. D. G., DAVIS, D. W. & ZHU, J. Basement heterogeneity in the Cathaysia crustal block, southeast China	145
Mesozoic	
HACKER, B. R., RATSCHBACHER, L. & LIOU, J. G. Subduction, collision and exhumation in the ultrahigh-pressure Qinling–Dabie orogen	157
WANG, Q. & CONG, B. UHP rocks and the Dabieshan Orogenic Belt	177
LI, X.-H., CHUNG, S.-L., ZHOU, H., LO, C.-H., LIU, Y. & CHEN, C.-H. Jurassic intraplate magmatism in southern Hunan–eastern Guangxi: $^{40}\text{Ar}/^{39}\text{Ar}$ dating, geochemistry, Sr–Nd isotopes and implications for tectonic evolution of SE China	193
Cenozoic-Present	
AITCHISON, J. C. & DAVIS, A. M. Evidence for the multiphase nature of the India–Asia collision from the Yarlung Tsangpo suture zone, Tibet	217
DAVIS, A. M., AITCHISON, J. C., BADENGZHU & HUI, L. Conglomerates record the tectonic evolution of the Yarlung–Tsangpo suture zone in southern Tibet	235
ROBINSON, P. T., BAI, W.-J., MALPAS, J., YANG, J.-S., ZHOU, M.-F., FANG, Q.-S. HU, X.-F., CAMERON, S. & STAUDIGEL, H. Ultra-high pressure minerals in the Luobusa Ophiolite, Tibet, and their tectonic implications	247
CHI, C. T. & DOROBEK, S. L. Cretaceous palaeomagnetism of Indochina and surrounding regions: Cenozoic tectonic implications	273

YUMUL, G. P., DIMALANTA, C. B., TAMAYO, R. A., MAURY, R. C., BELLON, H., POLVÉ, M., MAGLAMBAYAN, V. B., QUERUBIN, C. L. & COTTEN, J. Geology of the Zamboanga Peninsula, Mindanao, Philippines: an enigmatic South China continental fragment?	289
TENG, L. S. & LIN, A. T. Cenozoic tectonics of the China continental margin: insights from Taiwan	313
WU, F. T., CHANG, C. S. & WU, Y. M. Precisely relocated hypocentres, focal mechanisms and active orogeny in Central Taiwan	333
Index	355
