## Contents

**ENGLAND, W. A. & LARTER, S.** Understanding petroleum reservoirs: towards an integrated reservoir engineering and geochemical approach. Introduction

**New approaches, analytical and geochemical developments**

**THOMPSON, K. F. M.** Interpretation of charging phenomena based on reservoir fluid (PVT) data

**WILHELMS, A. & LARTER, S.** Shaken but not always stirred. Impact of petroleum charge mixing on reservoir geochemistry

**PHILP, R. P., HSIEH, M. & TAHIRA, F.** An overview of developments related to the characterization and significance of high molecular weight paraffins/hydrocarbons (>C₄₀) in crude oils

**HOLBA, A. G., WRIGHT, L., LEVINSON, R., HUIZINGA, B. & SCHEHING, M.** Effects and impact of early-stage anaerobic biodegradation on Kuparuk River Field, Alaska

**MEULBROEK, P., CATHLES, L. & GODDARD, W. A.** HCToolkit/EOS interface: an open source, multi-platform phase equilibria framework for exploring phase behaviour of complex mixtures

**Physical, chemical and numerical models**

**SMALLEY, C., ENGLAND, W. A., MUGGERIDGE, A., ABACIOGLU, Y. & CAWLEY, S.** Rates of reservoir fluid mixing: implications for interpretation of fluid data

**STAINFORTH, J. G.** New insights into reservoir filling and mixing processes

**SKEIE, J. E., DI PRIMIO, R. & KARLSEN, D. A.** An integrated basin modelling study applying asphaltene kinetics from reservoired petroleum in the Snorre Area, northern North Sea

**DI PRIMIO, R. & SKEIE, J. E.** Development of a compositional kinetic model for hydrocarbon generation and phase equilibria modelling: a case study from Snorre Field, Norwegian North Sea

**Case studies – Water and petroleum fluid compositional variations**

**LINES, M. D. & AULD, H. A.** A petroleum charge model for the Judy and Joanne Fields, Central North Sea: application to exploration and field development

**WAVREK, D. A. & MOSCA, F.** Compositional grading in the oil column: advances from a mass balance and quantitative molecular analysis

**MUELLER, E. & SCHOLZ, T.** Application of geochemistry in the evaluation and development of deep Rotliegend dry gas reservoirs, NW Germany

**WEISSERTBURGER, K. S. & BORBAS, T.** Fluid properties, phase and compartmentalization: Magnolia Field case study, Deepwater Gulf of Mexico, USA

**TAYLOR, T., STANCLIFFE, R., MACAULAY, C. & HATHON, L.** High temperature quartz cementation and the timing of hydrocarbon accumulation in the Jurassic Norphlet sandstone, offshore Gulf of Mexico, USA

**DUTTON, S. P. & FLANDERS, W. A.** Evidence of reservoir compartmentalization by calcite cement layers in deepwater sandstones, Bell Canyon Formation, Delaware Basin, Texas

**MCCARTNEY, R. A., WINEFIELD, P., WEBB, P. & KUHN, O.** Spatial variations in the composition of formation waters from the central North Sea: implications for fluid flow in the deep high-pressure high-temperature hydrocarbon play
