

# Cool-Water Carbonates: Depositional Systems and Palaeoenvironmental Controls

# The Geological Society of London BOOKS EDITORIAL COMMITTEE

**Chief Editor:** Bob Pankhurst (UK)

## **Society Books Editors**

John Gregory (UK)  
Jim Griffiths (UK)

John Howe (UK)  
Phil Leat (UK)

Nick Robins (UK)  
Jonathan Turner (UK)

## **Society Books Advisors**

Mike Brown (USA)  
Reto Gieré (Germany)

Jon Gluyas (UK)  
Doug Stead (Canada)

Randell Stephenson (Netherlands)  
Simon Turner (Australia)

## **Geological Society books refereeing procedures**

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society Book Editors ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

More information about submitting a proposal and producing a book for the Society can be found on its web site: [www.geolsoc.org.uk](http://www.geolsoc.org.uk).

It is recommended that reference to all or part of this book should be made in one of the following ways:

PEDLEY, H. M. & CARANNANTE, G. (eds) 2006. *Cool-Water Carbonates: Depositional Systems and Palaeoenvironmental Controls*. Geological Society, London, Special Publications, **255**.

BASSO, D., MORBIOLI, C. & CORSELLI, C. 2006. Rhodolith facies evolution and burial as a response to Holocene transgression at the Pontian Islands shelf break. *In*: PEDLEY, H. M. & CARANNANTE, G. (eds) *Cool-Water Carbonates: Depositional Systems and Palaeoenvironmental Controls*. Geological Society, London, Special Publications, **255**, 23–34.

GEOLOGICAL SOCIETY SPECIAL PUBLICATION NO. 255

# Cool-Water Carbonates: Depositional Systems and Palaeoenvironmental Controls

EDITED BY

H. M. PEDLEY  
University of Hull, UK

and

G. CARANNANTE  
Universita Federico II di Napoli, Italy

# THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of 9000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to [www.geolsoc.org.uk](http://www.geolsoc.org.uk).

**The Geological Society Publishing House** (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the American Geological Institute (AGI), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from [www.geolsoc.org.uk](http://www.geolsoc.org.uk)) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult [www.geolsoc.org.uk](http://www.geolsoc.org.uk), or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: [enquiries@geolsoc.org.uk](mailto:enquiries@geolsoc.org.uk).

For information about the Society's meetings, consult *Events* on [www.geolsoc.org.uk](http://www.geolsoc.org.uk). To find out more about the Society's Corporate Affiliates Scheme, write to [enquiries@geolsoc.org.uk](mailto:enquiries@geolsoc.org.uk).

## Contents

PEDLEY, M. & CARANNANTE, G. Cool-water carbonate ramps: a review	1
NALIN, R., BASSO, D. & MASSARI, F. Pleistocene coralline algal build-ups ( <i>coralligène de plateau</i> ) and associated bioclastic deposits in the sedimentary cover of Cutro marine terrace (Calabria, southern Italy)	11
BASSO, D., MORBIOLI, C. & CORSELLI, C. Rhodolith facies evolution and burial as a response to Holocene transgression at the Pontian Islands shelf break	23
BASSI, D., CARANNANTE, G., MURRU, M., SIMONE, L. & TOSCANO, F. Rhodalgae/bryomol assemblages in temperate-type carbonate, channelized depositional systems: the Early Miocene of the Sarcidano area (Sardinia, Italy)	35
KERSHAW, S. & GUO, L. Pleistocene calcified cyanobacterial mounds, Perachora Peninsula, central Greece: a controversy of growth and history	53
FORNÓS, J.J. & AHR, W.M. Present-day temperate carbonate sedimentation on the Balearic Platform, western Mediterranean: compositional and textural variation along a low-energy isolated ramp	71
TOSCANO, F., VIGLIOTTI, M. & SIMONE, L. Variety of coralline algal deposits (rhodalgae facies) from the Bays of Naples and Pozzuoli (northern Tyrrhenian Sea, Italy)	85
MASSARI, F. & CHIOCCI, F. Biocalcarene and mixed cool-water prograding bodies of the Mediterranean Pliocene and Pleistocene: architecture, depositional setting and forcing factors	95
BRAGA, J.C., MARTÍN, J.M., BETZLER, C. & AGUIRRE, J. Models of temperate carbonate deposition in Neogene basins in SE Spain: a synthesis	121
PEDLEY, M. & GRASSO, M. The response of cool-water carbonates to eustatic change in microtidal, Mediterranean Quaternary settings of Sicily	137
REUTER, M., BRACHERT, T.C. & KROEGER, K.F. Shallow-marine carbonates of the tropical–temperate transition zone: effects of hinterland climate and basin physiography (late Miocene, Crete, Greece)	157
RUBERTI, D., TOSCANO, F., CARANNANTE, G. & SIMONE, L. Rudist lithosomes related to current pathways in Upper Cretaceous temperate-type, inner shelves: a case study from the Cilento area, southern Italy	179
HALFAR, J., STRASSER, M., RIEGL, B. & GODINEZ-ORTA, L. Oceanography, sedimentology and acoustic mapping of a bryomol carbonate factory in the northern Gulf of California, Mexico	197
LUKASIK, J. & JAMES, N.P. Carbonate sedimentation, climate change and stratigraphic completeness on a Miocene cool-water epeiric ramp, Murray Basin, South Australia	217
ANASTAS, A.S., DALRYMPLE, R.W., JAMES, N.P. & NELSON, C.S. Lithofacies and dynamics of a cool-water carbonate seaway: mid-Tertiary, Te Kuiti Group, New Zealand	245
KINDLER, P., RUCHONNET, C. & WHITE, T. The Southern Marion Platform (Marion Plateau, NE Australia) during the early Pliocene: a lowstand-producing, temperate-water carbonate factory	269

HENDY, A.J.W., KAMP, P.J.J. & VONK, A.J. Cool-water shell bed taphofacies from Miocene–Pliocene shelf sequences in New Zealand: utility of taphofacies in sequence stratigraphic analysis	283
MUTTI, M., JOHN, C.M. & KNOERICH, A.C. Chemostratigraphy in Miocene heterozoan carbonate settings: applications, limitations and perspectives	307
KNOERICH, A.C. & MUTTI, M. Epitaxial calcite cements in Earth history: a cooler-water phenomenon during aragonite-sea times?	323
CARON, V., NELSON, C.S. & KAMP, P.J.J. Microstratigraphy of calcite cements in Pliocene cool-water limestones, New Zealand: relationship to sea-level, burial and exhumation events	337
Index	367
