Page numbers in *italic* denote figures. Page numbers in **bold** denote tables.

abyssal peridotites 24
Africa 6, 253–77
age
  Catalan volcanism 122
  Gătaia lamproite 85–6, 97
  Gharyan lherzolite xenoliths 272
  Ligurian peridotites 16, 23, 27
  Scottish lithospheric mantle 7, 303, 305, 328, 330
  Spanish Central System 102
Alakite region 338, 342, *343*, 344, 348
alkaline basalts 24
alkaline mafic lavas, Catalonia (NE Spain) 4, 121–53
  enrichment 144–5, 147, 149
  geological setting 122–3
  major elements 125, **127**, 128–9, **130–1**, **132**, 135, **136–7**, **140–1**
  melt depletion 4, 138–9, 141, 150
  metasomatism types 4, 121, 141, 143–5, 147, 149
  modal composition 4, **124**, 150
  P–T–fO_2 conditions 134–5
  petrology 123–5
  Pyrenean massif 4, 121–2, 135, *139*, 144, *146*, *149*
  Sr–Nd isotope composition 145, *146*
  trace elements 129–34, 135, **136–7**, 138–9, **140**, 141, 144
alkaline magma
  NVL (Antarctica) upper mantle 6–7, 279–302
  Spanish Central System 4, 101–2, 112–16
Alpine–Apennine system 2, 11
altered xenoliths, Spanish Central System 102, 103–18
  modal composition 103, **104**
  P–T conditions 116
  secondary alteration 103, 112–13
aluminium content
  alkaline mafic lavas 125, **127**, 128–9, *134*, 141
  Avacha peridotite xenoliths 2, 41, **42**, 43, 44, *45*, *46*, *47*, *48*, 51, 53
  lamproite spinels 89
  monomineral thermobarometry 337
  NVL (Antarctica) 6, 279, 289, **290–1**, *294*, 296–7, 299, 300
  Scottish lithospheric mantle 309, 320–1, *324*
  SCS altered xenoliths 105, *108*
  Yakutian kimberlite pipes 347
amphiboles
  alkaline mafic lavas 4, 123, 125, *126*, 129, 133, **140–1**, 147, *148*, 149, 150
  Avacha peridotite xenoliths 2–3, 35–55
  Devès, Massif Central 5, 177, **179**, 180, 181, 187, *188*, 190, *192*
  Gătaia lamproite 83, *86–7*, **88**, 89
  Jabel El Arab mantle xenoliths 5–6, 223, 225, *228*, 231, **235**, **240**, *241*, 246, 247, 248
  La Palma Basal Complex 5, 155, 157–8, 159–60, **161–2**, **164–5**, 166–9, *171*
  NVL (Antarctica) 6, 279–80, 296, 297, 299–301
  Scottish lithospheric mantle 306
  SCS altered xenoliths 4, 101, 102, **104**, 105, **106–7**, 108, *109*, 113, *114*, 115, 117–18
anhydrous lherzolites 5, **179**, 180–1, 187, *188*, 192, 194
anhydrous spinel peridotite xenoliths 3, 57–81
Antarctica, NVL upper mantle 6–7, 279–302
apatite, Gătaia lamproite 83, **88**, *90*, 91
Arabian plate 5–6, 223–51
armalcolite, Gătaia lamproite 83, 85, *86–7*, **88**, *90*, 91
asthenospheric mantle
  Devès, Massif Central 5, 178, 190, 194
  fertile spinel lherzolites 3, 57–81
asthenospherization 2, 11, 17, 23, 25, 27, 28
Avacha volcano (Kamchatka)
  geological background 35–6
  mineral chemistry 41–5, 50–1
  peridotite xenoliths 2–3, 35–55
  petrography 36–41
avolcanic sequences 11, 13, 28

back-scattered (BSE) images 282, *287*, *292*
barite, Gătaia lamproite *90–1*, 92
barometers *see* monomineral thermobarometry
Basal Complex, La Palma 155–75
basalts
  Hyblean Plateau upper mantle 199
  Jabel El Arab mantle xenoliths 223, 247
  La Palma 155–75
  Ligurian Tethys 2, 24
  NVL mantle xenoliths 6, 298, 301
  Scottish Northern Highlands Terrane 303, 305
  Yakutian kimberlite pipes 349
batch melting
  Devès, Massif Central *190*
  Viliga peridotite xenoliths 3, 57, 77–8
biotites, La Palma Basal Complex 5, 155, 160, 166–8

calc-alkaline rocks
  Spanish Central System 102, 116, 118
  Viliga Volcanic Field 3, 57, 79
calcic amphiboles 2–3, 35–55
calcium content
  alkaline mafic lavas 128, 129, *134*
  NVL (Antarctica) 284, **285–6**, 287, **288**, **290–1**, 296, *298*, 299
  olivine melanephelinites 57, 59, 74, 75–6, *77*
  Scottish lithospheric mantle 309
calcium-exchange reaction, pressure estimations 135
Caledonian Orogeny 7, 305
Canary Islands, La Palma Basal Complex 155–75
carbon dioxide inclusions 225, 246, 248
carbonatite melts
  alkaline mafic lavas 4, 121, 144, 147, 149, 150
  Devès, Massif Central 5, 177, 188–9, 192–3, 194
  Jabel El Arab mantle xenoliths 6, 223, 245–6, 248
  Scottish lithospheric mantle 7, 303–33

carbonatite melts (*continued*)
SCS altered xenoliths 3, 4, 101, 113, *114*, 115, 118
Yakutian kimberlite pipes 349
Catalonia (NE Spain)
Neogene–Quaternary alkaline mafic lavas 121–53
volcanoes 121, 122–3
chlorites
La Palma Basal Complex 160, 166–8
pseudomorphs 104, *105*, 112, 117
chromatographic fractionation 4, 121, 144, 147, 149, 150
chromite thermobarometry 335, 337, 338, *339–41*, 342
chromium content
alkaline mafic lavas 125, **127**, 128–9, **130**, 132–3, *134*, 138, *139*, *147*
Avacha peridotite xenoliths 2, 35, 41–4, *45*, 53
Jabel El Arab mantle xenoliths **228**, 229–31, *234*
lamproite spinels 89
