

Index

Page numbers in *italics* refer to Figures. Page numbers in **bold** refer to Tables.

- Acidere Formation 205
Acigöl Fault 199
acoustic fluidization 17
Aegean extensional province
 tectonic map 198
 tectonic setting 197–198, 200
Aegean Sea
 geodynamics 181–183
 geological map 140
 tectonic map 170, 181
Agridi Fault 126, 127, 129, 130, 131
Akrata Fault 129
Alasehir detachment 199, 205
Alasehir graben 215, 217
Alasehir granitoid 199, 202
Alpine orogeny 34–36
Amonton's Law 11–12, 17
Amorgos detachment
 geological setting 171–173
 map 170
 timing of detachment
 methods of analysis 173
 fission track analysis 173, 175
 results 174
 results discussed 175
 significance of results 175–176
amphibolite facies, Svecofennian 226, 229, 245
Anatolia
 cross-section 216, 217
 geological setting 200–201
 map 199
Anatolide Block 197, 198, 199, 200
andesites, origins of low/high K 74–76
André fault 141, 144, 145, 154
apatite FTA *see* fission track analysis
apatite (U–Th)/He dating
 studies on Ios
 method 150–151
 results 154
 significance of results 158–162
Appalachians orogen 2
apparent friction 12
⁴⁰Ar/³⁹Ar dating 114, 202–203
asperities and flash heating 16
Attic–Cycladic Massif 180, 181
Austroalpine nappe system 34
 magmatism 40, 41, 42
 metamorphism 36, 37, 38

Baklan granitoid 199, 211, 212, 213
Basal Conglomerate Unit 171, 172, 173
Basin and Range Province 2, 3, 4
 low-angle normal faults 9
Bergslagen plate 227
Biga Peninsula 200
Bothnian Belt 229
boudins *see* Varvara boudin
brittle/ductile behaviour 11
Burdur Fault 198, 199
Büyük Menderes graben 215, 217
Byerlee friction 9

carbon dioxide, role in faulting 11
cataclasite 11
Cataldag granitoid 199, 217

Catalina-Rincon Mountains
 (Arizona, USA) 4
Central Anatolide Crystalline Complex 198
Central Finland Granitoid Complex 229
 crust detail 242, 245, 246
 structure interpretation 237, 238
Central Volcanic Region (New Zealand) 74, 79, 81–83
chlorite, and fault strength 15
clays, reactions and fault strength 15
Coastal Fault System 141, 144, 145
collisional modelling 225–226
continental back-arc systems 73
 conceptual model 74
 studies in New Zealand, extension in
 relation to local variables
 crustal structure 78–81
 extension and arc migration 78
 extension–rotation relations 78
 geodetic strain estimates 76–77
 GPS strain estimates 77–78
 heat output 81–83
 palaeomagnetic rotations 78
 summary of observations 83–85
 tectonic setting 73–74
 volcanic arc migration 74–76
cooling, and crustal thinning 4
core complexes 4
 and tectonites 5
Corinth Rift 119, 120
cratonization 226
Cretan detachment 169, 170
crust
 structure in New Zealand 78–81
 thinning and cooling 4
Cyclades, regional geology 141
Cycladic Basal and Upper Units 140, 141
Cycladic Blueschist Unit 140, 141, 170

Dara Basin 127, 129, 130
Datça–Kale Fault 198, 199, 217
decollements, seismic character 233
detachment era, defined 1
detachment horizons 10
detachment zones
 seismic character 233
 Svecofennian orogen 241, 242, 244
Dixie Valley (Nevada, USA) 10
Drossopigi Fault 125
dynamic failure 14
dynamic fragmentation 19–22

earthquakes, and low-angle normal faults 9
East Anatolian Fault Zone 198
East Greenland, Caledonides 2
Eceemis Fault 198
Egrigöz granitoid 199, 201–202, 211, 212, 213, 214
Eliki Fault 129, 132, 133, 134, 135
Eromonsia Formation 186, 188, 189, 193
Erzurum-Kars Plateau 198
Eu anomaly 214
European Alps 33
 geology
 Alpine evolution 34–36
 Permo-Triassic evolution 36
 magmatism 39–44
 metamorphism 36–39
 sedimentary basins and volcanics 44–47
 map 35
 numerical analysis of geological evolution
 model set-up 47–49
 thermomechanics 50–52
 numerical and natural data compared 52–53
 magmatism 58–64
 metamorphism 53–58
 sedimentary basins and volcanics 64
Evçiler granitoid 199
Evia 140, 141
exhumation, factors affecting 179
extension
 and isostasy 4
 relation to rotation 78
 relation to volcanic arc migration 78
extension fault, defined 169
extension rate, effect of 226
extensional collapse 225–226
External Hellenides 170
extrusion wedge, defined 169
Eybek granitoid 199

fault breccia 11
fault core, defined 11
fault gouge 11
feldspar, reactions and fault strength 15
Feneos Basin 127, 128
fission track analysis (FTA), apatite and zircon
 Amorgos detachment study
 methods 173, 175
 results 174, 175–176
 Naxos study
 methods 184
 results 184, 189
 granodiorite 184, **185, 187**
 metamorphic rocks 184, **185, 187**
 sediments 184, **186, 188**
 results discussed
 granodiorite 192–193
 metamorphic rocks 189–192
 sediments 193
fixism and fixist concept, rise and fall of 1–3
flash heating 16
fluids, effect of
 at faults 12
 high pore pressure 13–14
Flysch Unit 172
folds, upright v. flat-lying 226
friction, coefficient of, for low-angle normal faults 9
friction in LANF, mechanics of 11–12
 evaluation of mechanisms, granular friction 17–19
 dynamic rock fragmentation 19–22
 mechanical process 16–17

- friction in LANF, mechanics of
(*Continued*)
requirement for reduction 12
requirements for low strength 12–13
 heating 15–16
 high pore fluid pressure 13–14
 weak faults materials 14–15
summary and discussion 22–25
