Preface	vii
MATHER, J. D., ROSE, E. P. F., Military aspects of hydrogeology: an introduction and overview	1
YOUNGER, P. L., Crouching enemy, hidden ally: the decisive role of groundwater discharge features in two major British battles, Flodden 1513 and Prestonpans 1745	19
MATHER, J. D., Water supply to Britain's eastern coastal defences in the 18th century and the work of Sir Thomas Hyde Page (1746–1821)	35
ROSE, E. P. F., Groundwater as a military resource: pioneering British military well boring and hydrogeology in World War I	49
DOYLE, P., Examples of the influence of groundwater on British military mining in Flanders, 1914–1917	73
WILLIG, D., HÄUSLER, H., Aspects of military hydrogeology and groundwater development by Germany and its allies in World War I	85
ROSE, E. P. F., Groundwater as a military resource: development of Royal Engineers Boring Sections and British military hydrogeology in World War II	105
MATHER, J. D., War as a catalyst for change: groundwater studies in the Geological Survey of Great Britain before 1950 and the impact of two World Wars	139
GREENWOOD, D. A., Soil and water: research by the British Army's Committee on Mud Crossing Performance of Tracked Armoured Fighting Vehicles in World War II	161
WILLIG, D., HÄUSLER, H., Aspects of German military geology and groundwater development in World War II	187
ROBINS, N. S., ROSE, E. P. F., CHENEY, C. S., Basement hydrogeology and fortification of the Channel Islands: legacies of British and German military engineering	203
GELLASCH, C. A., Hydrogeological support to United States military operations, 1917–2010	223
DOW, R. I. L., ROSE, E. P. F., Hydrogeology in support of British military operations in Iraq and Afghanistan 2003 to 2009	241
WILLIG, D., Hydrogeology and the <i>Bundeswehr</i> : water supply to German armed forces in Somalia, Kosovo and Afghanistan between 1993 and 2010	253
DOWNER, C. W., OGDEN, F. L., MARTIN, W. D., HARMON, R. S., Opportunity-driven hydrological model development in US Army research and development programs	267
HOWINGTON, S. E., PETERS, J. F., BALLARD JR., J. R., ESLINGER, O. J., FAIRLEY, J. R., KALA, R. V., GOODSON, R. A., PRICE, S. J., HINES, A. M., WAKELEY, L. D., Using computer simulation to explore the importance of hydrogeology in remote sensing for explosive threat detection	287
PRIDDY, J. D., BERNEY IV, E. S., PETERS, J. F., Effect of near-surface hydrology on soil strength and mobility	301

MILLER, J., FORAN, C., Development of cleanup technologies for the management of US military installations	321
MCCAFFREY, L., BULLOCK, C., Hydrogeology of British military sites: Project Aquatrine	343
MANSOUR, M. M., PEACH, D. W., HUGHES, A. G., ROBINS, N. S., Tension over equitable allocation of water: estimating renewable groundwater resources beneath the West Bank and Israel	355
Index	363
