

Index

Page numbers in *italics* refer to Figure. Page numbers in **bold** refer to Tables.

- Aberdeen Ground Formation 174, 177, 179,
186–188, 196, 202–204
- abrasion, tunnel valley 108
- acquisition footprint 177, 178
- acritarch, Cryogenian 383
- Africa, hydrocarbons 16–20
- African glaciation 6, 7–8, 9
Late Ordovician 295, 319, 322, 355
see also North Africa
- age of glacial deposits 188
- Al Khlata Formation, Oman 14, 19, 20, 229–254
depositional environment 243–244, 246, 248
facies associations 240–248
glacial deposits 80
glaciation model 251
timing and mechanism 253–254
lithofacies **235–236**
palaeogeography 251, 252
palynology 230–231, 251
provenance 250–251
stratigraphy and sedimentology 231–234
- algae, Neoproterozoic 383, 384
- Algeria, Ordovician glaciogenic deposits 293–314
- Algeria, Ordovician proglacial deposits 319–350
- Algeria, proglacial outwash plain 355–373
- alluvial cone 46
- Ammar Formation 276–283
depositional environment 285–286
petrophysical study 288–289
- anoxic conditions 306, 308, 383, 389, 390, 391
- Antarctica *see* Victoria Land Basin
- Antarctica 20
- Antarctica, Carboniferous glaciation 9
- antidune 328, 329, 336, 340, 341, 367
- aquifer transmissivity 145, 154
- aquifers in buried valleys 129
- Arabian Shield, ice sheet 253
- Ar-Ar geochronology 218
- Australia
Neoproterozoic glaciations 5–7, 382–384
Neoproterozoic hydrocarbons 16
- bacteria, Neoproterozoic 383, 384
- ball-and-pillow structure 281
- Baltic Advance 41, 43, 45
- banded iron formations 382
- base Quaternary 187, 188, 191, 205
- bathymetry, southern North Sea 100
- Bavelian glacial deposits 188
- Bavention glaciation 207
- bedforms, proglacial sediments 325–331, 335–337, 341,
346, 347
- bioturbation 215, 305, 306, 307, 308, 358, 367
- black shale 16–18, 381, 383, 387, 388, 389–391
- blow-out 55, 69, 258, 259
- Bolivia, Carboniferous glaciation 9, 257–272
- Bolivia, gas discovery 20
- borehole data 147, 182
- borehole, Monax MMDD–1 385, 387–389
- braided river systems 355, 357–358, 369, 372–374, 376
- Brazil, black shale 16, 383, 390
- Brazil, gas discovery 20
- Brazil, unconformity sequences 265
- brine 121, 223, 224
- British Geological Survey 174, 187
- Brunhes–Matuyama magnetic anomaly 174, 177, 187
- buried channels 112, 129, 134, 141
- buried surface 62
- buried valley 79, 106, 109, 146, 148, 174
- burrows 35, 323, 339, 359, 367, 368
- case study, summary **3**
- cap-carbonates 382, 384
- carbon dioxide 4, 5, 257
- carbon in glacial systems 383–384
- carbon, enriched deglacial deposits 389
- carbonate 387, 391

 reservoir analogue 288–289
 Palaeozoic (Late) glaciation
 Bolivia 257–272
 North Africa 257, 322
 Palaeozoic ice age, Oman 229–254
 glaciation model 251
 Pan-African orogen 295, 321
 Pangaea 9
 Paraña Basin, Brazil 225
 Peon gas discovery 14, 16, 20, 66–68
 permafrost and tunnel valleys 155
 permeability 215, 217, 297, 313, 336
 palaeovalley infill 288–289
 Permian (Early) glaciation 6
 Permo Carboniferous ice age 9, 19–20
 petrography, diamictite clasts 248–250
 Petroleum Geo-Services, southern North Sea
 Megasurvey 100, 102, 104, 106
 petrophysical study 288–289
 phosphorite, Neoproterozoic 384
 plate tectonics and climate 5, 6
 Pleistocene glaciations 2, 5, 6, 10, 111, 124, 131,
 146, 160–161
 Pleistocene tunnel valleys 5, 76, **79**, 81, 82
 Plio-Pleistocene boundary 191
 ploughmarks *see under* iceberg ploughmarks
 ploughmarks, EP1 event 204
 polynas, Cryogenian 383
 pore fluid pressure 298
 pore-water analysis 221–223, 224
 porosity 154, 297
 glaciomarine sand 215, 217, 221–223
 sand wave deposits 313
 palaeovalley infill 288–289
 postglacial succession 306
 Precambrian hydrocarbon systems 381–391
 pressure, tunnel erosion 342–343
 proglacial deposits, Ordovician 328–350
 proglacial outwash plain, Late Ordovician
 355–373
 depositional environment 357–358
 morphology and distribution 370–373, 374
 Quaternary chronostratigraphy 189, 190
 Quaternary glaciations 111, 124, 131, 146, 160–161
 Quaternary stratigraphy, southern North sea 100
 Quaternary, base 187, 188, 191, 205
 radioactive shale 390
 radiocarbon dates 62
 Re–O dating 5
 rebound 323, 348
 rebound, faulting 313
 regression, forced 30, 31
 regressive system 31, 32, 42
 reservoir potential 19, 211, 313–314, 348
 glaciomarine sand 214, 217–225
 reservoir quality 344
 reservoir, formation in glacial sediments 4, 60
 resistivity profile, tunnel valley 152
 Rodinia 8, 382
 Rubjerg Knude Glaciotectionic
 Complex 38, 39, 40
 sag basin 18, 19, 295
 Sahara, glacial incisions 4
 Sahara, striated pavement 322
 salinity changes 14
 salt basin, Oman 253
 salt diapir 100, 102, 205
 salt dissolution features 19
 Salt Dome Province 112, 113, 125
 sand and gravel 202
 velocity effects 168–171, 182
 sand volcano 281
 sandstone dyke 280, 285, 302
 sandstone stacking 359
 sandstone, channelized (Tassili N'Ajjer) 355–373
 depositional setting 357–358
 distribution 370–373
 geological setting 356–357
 lithofacies 366
 sedimentology 359–370
 study methods 358–359
 width and thickness 373–376
 sandstone, poorly sorted 326, 333–339
 sandstone, ribbon 330–332, 339, 346–348, 357, 365
 depositional environment 324, 370, 371, 374
 sandstone, sheet 326–330
 sandstone, tractional bedforms 325–326, 343–344
 sandur 31, 32, 43, 45
 Palaeozoic 248, 251, 355, 357, 373, 374
 sandur sediments 330
 Saudi Arabia 9, 17, 19
 glaciomarine reservoir 211
 ice sheet 253
 palaeovalleys 287
 tunnel valley 80, 82, 83, 84
 Scandinavian ice sheet 41
 sea level change 4, 115, 131, 296
 seabed multiple 178, 179
 Seabed Project (Norwegian shelf) 55

- sea-level change and ice accumulation 30–32
 sea-level change, Late Ordovician 322, 324
 sediment volume, sandur 337
 sedimentary dyke 83, 280, 285, 302
 sedimentary logs
 Flinders Ranges 390
 Jutland/Danish Basin 34, 39, 40, 43, 46
 McMurdo Sound 216, 218–220
 Tihemboka area 365
 sedimentology, Ordovician glaciogenic deposits 18–19
 grain size 334, 339–340
 lithotypes 332, 333
 postglacial sediments 323–324
 preglacial sediments 322
 synglacial sediments 322–339, 349
 depositional model 343–348
 seismic 2D and 3D investigation tunnel valleys,
 western Denmark 129–142
 boreholes 132
 methodology 132–133
 morphology 134–137, 141
 seismic data 131–132
 seismic facies 138, 140
 seismic survey lines 131
 spatial distribution 133–134
 statistical analysis 133, 141
 substrate 137–138
 seismic 2D and 3D investigation, central
 North Sea Basin
 data and methods 186, 188–191
 crenulate channels 196–198
 Early Pleistocene event 195, 191–194
 megascale lineations 185, 193, 198–200, 201, 205
 profiles 190
 seismic 2D and 3D, tunnel valley infill, central
 North Sea 160
 data and methods 161, 174, 177–179
 seismic facies 159, 161–164, 165, 167,
 UK sector 174, 175, 179–183
 seismic velocity effects 161, 164–165, 166, 168
 correlation with infill 168–171
 seismic 3D investigation, tunnel valleys, North Sea
 Central Graben, Danish sector 111–125
 analysis 115–119, 120–122
 data base 112
 seismic facies 115–119, 125
 seismic interpretation of palaeovalleys, Bolivia
 data and method 259–260
 seismic facies 263, 265, 266–267, 269–271
 seismic profile, mid-Norwegian shelf 56, 62, 67, 69
 seismic resolution 14, 17
 seismic signature, basal glaciogenic unconformity
 characteristics 103, 104, 105–106, 109
 data 102–103
 ice margin 106–107
 seismic survey, In Amenas field 320
 seismite 282
 sequence stratigraphy 10, 13, 29–49
 sequence stratigraphy, glaciogenic deposits,
 Algeria 296–314
 data and methods 297–298
 depositional model 306–307
 correlation 307–311
 reservoir potential 313
 sedimentology 298–306
 tectonic setting 311–313
 sequence stratigraphy, glaciomarine deposits 219–220
 highstand systems tracts 217, 222, 224, 225
 Shackleton Formation 186
 shale gas 17, 390
 shearing, subglacial 11
 slumping 307
 slushball Earth 5, 389
 snowball Earth 382, 383, 386–387
 soft-sediment deformation 2, 8, 9, 11, 216
 Illizi Basin 296, 302, 323
 megascale lineations 198, 200
 sonic log 259
 South Oman Salt Basin 19
 oil, geochemical signature 384
