Geological Society books refereeing procedures

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society Book Editors ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

More information about submitting a proposal and producing a book for the Society can be found on its website: www.geolsoc.org.uk.

It is recommended that reference to all or part of this book should be made in one of the following ways:

NEMČOK, M., MORA, A. & COSGROVE, J. W. (eds) 2013. *Thick-Skin-Dominated Orogens: From Initial Inversion to Full Accretion*. Geological Society, London, Special Publications, **377**.

THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of over 10 000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to www.geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult www.geolsoc.org.uk, or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: enquiries@geolsoc.org.uk.

For information about the Society's meetings, consult *Events* on www.geolsoc.org.uk. To find out more about the Society's Corporate Affiliates Scheme, write to enquiries@geolsoc.org.uk.

Acknowledgements

This special volume is a collection of research studies by teams, who attended a meeting entitled ‘Thick-skin-dominated orogens: from initial inversion to full accretion’, which was funded and organized by ECOPETROL-ICP (Instituto Colombiano del Petroleo) in the framework of the project ‘Cronología de la deformación en las Cuencas Subandinas’ at Barichara, Colombia, and which took place during 24–27 January 2011. The volume editors would like to thank all participants of the conference for their time-unconstrained discussion after each presentation that resulted in this Special Publication, and for coordinated effort to build this volume together. As a result, the volume contains a collection of unusually interlinked contributions and provides a relatively unified understanding of the transition from initial inversion to full accretion in thick-skin-dominated orogens, with special focus on driving dynamics and controlling factors. Leonardo Jimenez, Ana Milena Rangel, Luisa Campiño and many others are thanked for the help with logistics that extended well beyond conference guidelines. ECOPETROL-ICP and specially Andrés Reyes-Harker are thanked for releasing the data from the project ‘Cronología de la deformación en las Cuencas Subandinas’, which is the fundamental part of the contributions in this Special Publication by Bayona *et al.*, Caballero

et al., Jimenez *et al.*, Moreno *et al.*, Mora *et al.*, Silva *et al.* and Tesón *et al.* Ecopetrol Vex is thanked for releasing data for some of these contributions. The editors are extremely grateful to Lucia Ledvényiová, who coordinated the submission, review, revision and evaluation process on behalf of volume editors, for keeping us all in check and considerably reducing the volume production length. Reviewers, Richardson Allen, Maria Luisa Arboleya, Patrice Baby, Jason Barnes, German Bayona, Peter Bentham, James Buchanan, Núria Carrera, Oscar Fernandez-Bellone, Wolfgang Frisch, Harald Fritz, Andreas Henk, Camilo Higuera-Díaz, Brian Horton, Leonardo Jimenez, Paul Kapp, James Kellogg, Lorcan Kennan, Jonas Kley, Piotr Krzywiec, Carlos Macellari, Thomas Mann, Shankar Mitra, Camilo Montes, Andrés Mora, Chris Morley, Isabelle Morretti, Josep Anton Muñoz, Franz Neubauer, Douglas Patton, Ricardo Piethe, Juan Carlos Ramírez-Arias, Víctor Ramos, Francois Roure, Joel Saylor, Steven Schamel, Rasoul Sorkhabi, Daniel Stockli, Michael Taylor, Antonio Teixell and Eliseo Tesón, helped with quality of contributions. Editors are grateful to volunteers – Lauren Birgenheier, John McLennan, Thomas Anderson, Eric Hunt, Ian Walton, Steve Hermeston, Cameron Sheya and John Cosgrove – who helped with English, guarding the science.
