Index

North Sea, two phases of explosive volcanism 417
volcanoclastics 123, 124, 323
NE Porcupine Basin 322, 325
volcanics
acid, Tardree 343
intermediate
continental affinities, western Voring Plateau 59
Voring Plateau 65
rhyolite 255
volcanism
active 386
alkaline, inland 441
along line of active rifting 200
axial, increase in 330
basaltic 280, 431
basic, rifting-related, Torridonian 130
basinal 330
British 414–16
British Tertiary Volcanic Province, commencement of 430
Cainozoic 137, 141
Cape Verde Rise 8
central type 415
cessation of, British Tertiary Volcanic Province 417
continental 111
continental-rift margin 7
Cretaceous 429–30
Danian 315–16
ey early Tertiary 49, 225, 447
continental 16, 20
N Atlantic 3–11
North Sea Basin 407–18
western Barents Sea margin 135–45
E Greenland 266
Eocene extrusive 50
explosive 260, 365, 366, 372, 373, 376, 413, 414
adjacent to North Sea Basin 414
increase of in Iceland 153
extrusive, Skye 366
Faeroe Islands 235, 261
ey early termination of 236
switch to Greenland 235
Faeroes region, evidence for 263–8
fissure 439, 446
Hebridean, and ash deposition 445
high-Ti type 235
intraplate, E Greenland 157–8
Jurassic 320
major regional 255
marginal 147
mid Tertiary 145
model for lateral shift 235
N Atlantic 416–17
NE Atlantic 173
Palaeogene: sedimentary record in Denmark 395–403
rift-related 235
Rockall, western 132
silicic pyroclastic 377
subaerial 111
submarine 110
syn-rift 3
Tertiary, Kangerdlugssuaq region 161–77

Upper Plateau Basalts, E Greenland 201
Scoresby Sund 203
Upper Plateau lavas, E Greenland 435–6
Upper Series, Voring Plateau 51, 59, 65–6, 443
basal reflector 65
lithology and petrography 69–76
comparison with NE Atlantic magmatic provinces 75–6
petrology of the tholeiitic basalts 70–5
sediments 76–8
Upper Series basalts, Faeroe Islands 218, 222, 247, 302–3, 441, 442
upwelling, passive 53
Uttental Plateau, THOL-2 dyke swarms 165

Vágar, Faeroe Islands 227
Vandfaldsdalen Formation 163, 183, 186, 192, 193, 203, 266
isotope geochemistry of the lavas 186–7
isotopic trends 186
tholeiite 268
velocity discontinuities, upper crust 38, 40
velocity structure
dipping reflectors, E Greenland 105–10
upper crustal 108, 110
vent infill 365, 366, 372, 374
vents, retreating 5
vertical movement, Bjørnøya marginal high 137
vesiculation 375
Vestmanna drill-hole 227
Vestmanna Member 227, 230
Vidoy, Faeroe Islands 228
Vidoy Member 227, 230
Viking Graben 388
sedimentation rate 402, 403
viscosity, in the mantle 16
viscous drag 376
volatile release 369
volcanic centres 230
explosive 10
volcanic complexes, Iceland 150–1, 151–2
volcanic debris 255
volcanic glass 397, 408
volcanic margins, N Atlantic 3
volcanic markers
Jan Mayen Ridge (reflector F) 85, 92
possible interpretations 90–1
volcanic peaks (Bjørnøya marginal high) 137, 141
volcanic productivity rate 104
volcanic provinces, Jan Mayen Ridge 87, 90–1
volcanic source
seaward migration of 102
up-dip or down-dip 102–3
volcanic vents 375
volcanic zone 148
volcanoclastic debris, reworked 253
volcanoclastic flows, Voring Plateau 65
volcanoclastic sand
basaltic 409
Moray Firth 415
volcanoclastic sediments
early Palaeogene, distribution of in NW Europe 410

tholeiite basalt 434
Thulean 253
volcanoes
  central 431, 439, 440, 443
  central-vent 435, 447
  fissure 320, 430, 434, 437
  nephelinitic 441
  Skagerrak 400
Vøring Basin 52
sill intrusion 248
Vøring passive margin 6–7
  early Cainozoic evolution 53–4
Vøring Plateau 4–5, 49, 95, 307, 448
and conjugate Greenland margin 38, 40
  correlation with NE Greenland plateau basalts 80–1
dipping reflectors, MORB-type basalt 132
divergent-arcuate reflectors 58–9, 61, 62, 65–6
igneous activity 442–3
and landward Norwegian margin, structure of 37
models for dipping reflectors 52–4
origin of Palaeogene volcanic sequence 69–81
  Lower Series lavas, lithology and petrography 78–80
  Upper Series lavas, lithology and petrography 69–76
  Upper Series sediments 76–8
underlain by upper continental crust basement 80
Vøring Plateau continental margin 49
Vøring Plateau Escarpment 5, 35
Vøring Plateau lavas, chemical affinities of 75–6
Vøring Plateau marginal high 51, 135, 443
Vøring sedimentary basin 49

wairakite 257
weathering
  deep, of silicic rocks 373
  lateritic 446

Werner Bjerge central intrusive complex 210, 436
Wessx Basin, inversion structures 29
West Netherlands Basin 29
West Spitsbergen Fold Belt 421
orogenesis and deformation 422
Western Barents Sea Basin, rifted 421
Western Red Hills, Skye 260, 342, 346, 368
  emplacement of granites 415–16
Wetzeliea astra zone 400
Wetzeliea hyperacantha zone 266
Wetzeliea meckelfeldensis zone 400
Widemann Fjord, E Greenland 203, 205
Wilson Cycles 27
Wolf Rock–Epsom Shoal igneous association 325
Wollaston Forland 81, 434
wrench tectonics, Svalbard–Barents Shelf and NE
  Greenland 144
Wyville-Thomson Ridge 116, 229, 271, 283, 289
  sediments 272

xenoliths 375
basalt 205, 210
gabbro 210
mantle 192, 447

Ymir Ridge 229, 283, 289

zeolite cement 255, 259
zeolites 77, 125, 163, 165, 257, 278, 301, 403
  heulandite-clinoptilolite type 397
  zoning 165
Zuider Zee depression, aseismic 29
