Geological Society books refereeing procedures

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society Book Editors ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

More information about submitting a proposal and producing a book for the Society can be found on its website: www.geolsoc.org.uk.

It is recommended that reference to all or part of this book should be made in one of the following ways:

SEPÚLVEDA, S. A., GIAMBIAGI, L. B., MOREIRAS, S. M., PINTO, L., TUNIK, M., HOKE, G. D. & FARIAS, M. (eds) 2015. *Geodynamic Processes in the Andes of Central Chile and Argentina*. Geological Society, London, Special Publications, **399**.

SURIANO, J., LIMARINO, C. O., TEDESCO, A. M. & ALONSO, M. S. 2015. Sedimentation model of piggyback basins: Cenozoic examples of San Juan Precordillera, Argentina. In: SEPÚLVEDA, S. A., GIAMBIAGI, L. B., MOREIRAS, S. M., PINTO, L., TUNIK, M., HOKE, G. D. & FARIAS, M. (eds) *Geodynamic Processes in the Andes of Central Chile and Argentina*. Geological Society, London, Special Publications, **399**, 221–244. First published online February 28, 2014, <http://dx.doi.org/10.1144/SP399.17>

THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of over 10 000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to www.geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult www.geolsoc.org.uk, or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: enquiries@geolsoc.org.uk.

For information about the Society's meetings, consult *Events* on www.geolsoc.org.uk. To find out more about the Society's Corporate Affiliates Scheme, write to enquiries@geolsoc.org.uk.

Contents

SEPÚLVEDA, S. A., GIAMBIAGI, L. B., MOREIRAS, S. M., PINTO, L., TUNIK, M., HOKE, G. D. & FARIAS, M.	1
Geodynamic processes in the Andes of Central Chile and Argentina: an introduction	
CHARRIER, R., RAMOS, V. A., TAPIA, F. & SAGRIPANTI, L. Tectono-stratigraphic evolution of the Andean Orogen between 31 and 37°S (Chile and Western Argentina)	13
GIAMBIAGI, L., TASSARA, A., MESCUA, J., TUNIK, M., ALVAREZ, P. P., GODOY, E., HOKE, G., PINTO, L., SPAGNOTTO, S., PORRAS, H., TAPIA, F., JARA, P., BECHIS, F., GARCÍA, V. H., SURIANO, J., MOREIRAS, S. M. & PAGANO, S. D. Evolution of shallow and deep structures along the Maipo–Tunuyán transect (33°40'S): from the Pacific coast to the Andean foreland	63
JARA, P., LIKERMAN, J., WINOCUR, D., GHIGLIONE, M. C., CRISTALLINI, E. O., PINTO, L. & CHARRIER, R. Role of basin width variation in tectonic inversion: insight from analogue modelling and implications for the tectonic inversion of the Abanico Basin, 32°–34°S, Central Andes	83
WINOCUR, D. A., LITVAK, V. D. & RAMOS, V. A. Magmatic and tectonic evolution of the Oligocene Valle del Cura basin, main Andes of Argentina and Chile: evidence for generalized extension	109
NAIPAUER, M., TUNIK, M., MARQUES, J. C., ROJAS VERA, E. A., VUJOVICH, G. I., PIMENTEL, M. M. & RAMOS, V. A. U–Pb detrital zircon ages of Upper Jurassic continental successions: implications for the provenance and absolute age of the Jurassic–Cretaceous boundary in the Neuquén Basin	131
GODOY, E. The north-western margin of the Neuquén Basin in the headwater region of the Maipo drainage, Chile	155
SÁNCHEZ, M., LINCE KLINGER, F., MARTINEZ, M. P., ALVAREZ, O., RUIZ, F., WEIDMANN, C. & FOLGUERA, A. Geophysical characterization of the upper crust in the transitional zone between the Pampean flat slab and the normal subduction segment to the south (32–34°S): Andes of the Frontal Cordillera to the Sierras Pampeanas	167
ALVAREZ, O., GIMENEZ, M. E., MARTINEZ, M. P., LINCE KLINGER, F. & BRAITENBERG, C. New insights into the Andean crustal structure between 32° and 34°S from GOCE satellite gravity data and EGM2008 model	183
SAGRIPANTI, L., AGUIRRE-URRETA, B., FOLGUERA, A. & RAMOS, V. A. The Neocomian of Chachahuén (Mendoza, Argentina): evidence of a broken foreland associated with the Payenia flat-slab	203
SURIANO, J., LIMARINO, C. O., TEDESCO, A. M. & ALONSO, M. S. Sedimentation model of piggyback basins: Cenozoic examples of San Juan Precordillera, Argentina	221
COSTA, C. H., AHUMADA, E. A., GARDINI, C. E., VÁZQUEZ, F. R. & DIEDERIX, H. Quaternary shortening at the orogenic front of the Central Andes of Argentina: the Las Peñas Thrust System	245
CORTÉS, J. M., TERRIZZANO, C. M., PASINI, M. M., YAMIN, M. G. & CASA, A. L. Quaternary tectonics along oblique deformation zones in the Central Andean retro-wedge between 31°30'S and 35°S	267
ZÁRATE, M. A., MEHL, A. & PERUCCA, L. Quaternary evolution of the Cordillera Frontal piedmont between c. 33° and 34°S Mendoza, Argentina	293
GARCÍA, V. H. & CASA, A. L. Quaternary tectonics and seismic potential of the Andean retrowedge at 33–34°S	311

MOREIRAS, S. M. & SEPÚLVEDA, S. A. Megalandslides in the Andes of central Chile and Argentina (32°–34°S) and potential hazards	329
HERMANN, R. L., FAUQUÉ, L. & WILSON, C. G. J. ³⁶ Cl terrestrial cosmogenic nuclide dating suggests Late Pleistocene to Early Holocene mass movements on the south face of Aconcagua mountain and in the Las Cuevas–Horcones valleys, Central Andes, Argentina	345
MOREIRAS, S. M. & PÁEZ, M. S. Historical damage and earthquake environmental effects related to shallow intraplate seismicity of central western Argentina	369
HOKE, G. D., GRABER, N. R., MESCUA, J. F., GIAMBIAGI, L. B., FITZGERALD, P. G. & METCALF, J. R. Near pure surface uplift of the Argentine Frontal Cordillera: insights from (U–Th)/He thermochronometry and geomorphic analysis	383
CARRETIER, S., TOLORZA, V., RODRÍGUEZ, M. P., PEPIN, E., AGUILAR, G., REGARD, V., MARTINOD, J., RIQUELME, R., BONNET, S., BRICHAU, S., HÉRAIL, G., PINTO, L., FARIÁS, M., CHARRIER, R. & GUYOT, J. L. Erosion in the Chilean Andes between 27°S and 39°S: tectonic, climatic and geomorphic control	401
RODRÍGUEZ, M. P., AGUILAR, G., URRESTY, C. & CHARRIER, R. Neogene landscape evolution in the Andes of north-central Chile between 28 and 32°S: interplay between tectonic and erosional processes	419
Index	447
