Page numbers in *italic* denote Figures. Page numbers in **bold** denote Tables.

- 'a' lava 15, 82, 86
- Ahsabkab Vallis 80, 81, 82, 83
- Aino Planitia 11, 14, 78, 79, 83
- Akna Montes 12, 14
- Alba Mons 31, 111
- Alba Patera, flank terraces 185, 197
- Albalonga Catena 435, 436–437
- amors 423
- 'Ancient Thebit' 377, 378, 388–389
- anemone 98, 99, 100, 101
- Angkor Vallis 4, 5, 6
- Annefrank asteroid 427, 428, 433
- anorthosite, lunar 19–20, 129
- Antarctic plate 111, 117
- Aphrodite Terra
 - Bouguer gravity anomaly 332, 333, 335
 - shear zones 335–336
- Apollinaris Mons 26, 30
- apollos 423
- Arabia, mantle plumes 337, 338, 339–340, 342
- Arabia Terra 30
- arachnoids, Venus 13, 15
- Aramaiti Corona 78, 79–83
- Arsia Mons 111, 118, 228
- Artemis Corona 10, 11
- Ascræus Mons 111, 118, 119, 205
 - age determination 206
 - annular graben 198, 199, 205–206, 207
 - flank terraces 185, 187, 189, 190, 197, 198, 205
 - pit craters 205–206, 207
 - self-similar clustering 209–210, 212
 - plumbing system 110–111, 210–211, 213–215
 - topography 207, 228
- asperity, Scathach Fluctus 97, 99, 101
- asteroids
 - main belt 1, 2, 423, 430, 433
 - composition 142
 - as impactors 163, 165
 - near-Earth 2, 423–424
 - density and structure 424
 - lineaments 424, 425, 424–433
 - S-type 423, 424, 427–428, 430
 - tectonism and magmatism 423–437
- atens 423
- Atla Regio, wrinkle ridges 358, 359, 360, 365, 369, 370, 371
- Beagle Rupes system
 - cross-cutting 315
 - strike-slip kinematics, lateral ramps 270, 277, 279
- Becuma radiating graben 14
- Beethoven basin 4, 7
 - Duyfken Rupes thrust 283
- Belgica Rupes 272, 275
- Beta Regio, Bouguer gravity anomaly 332, 333
- Bhumidevi Corona 78, 83–87
- Birt crater 378, 381
- Blossom Rupes fold-and-thrust belt 4, 274
 - age dating 294–309
 - crater counting 296, 297–300, 301, 302
 - lobate scarps 291, 292, 294–295
 - strike-slip kinematics 275–277, 278, 284
- Bouguer gravity anomaly, Venus 331–332, 333, 335
- Bransfield Rift 339
- Bransfield Strait 173, 174, 175
 - simple shear zone 174, 178
- Bransfield Trough 174, 175–176
- Breksta Linea 87, 88, 89, 90
- Brumalia Tholus 434–437
- calderas

 - strike-slip tectonics 173
 - Deception Island 176, 178–182
 - Mars 28, 33
- Caloris basin 4, 5, 6, 7, 9, 59
 - rough ejecta 5, 59, 60, 62
- canali, Venus 82
- Canary Islands
 - lithospheric flexure 219, 229–230, 231, 232, 233
 - magmatism on slow plates 112–114, 115, 116, 119
- canyons, Mars 34
- Cape Verde Islands, magmatism on slow-moving plates 108, 112–114, 115, 116, 119
- Caravaggio peak-ring basin 294, 295–296, 297
 - age 303–305, 307
 - crater-counting 296, 300
 - size–frequency distribution 300–301
- Ceraunius Tholus 28
- Cerro de la Mica double restraining bend 277, 278
- chasmata 12, 330
- chondrites 423–424
- Circum-Hellas volcanic province 26, 30
- climate change
 - SPLD deformation 407, 411–419
 - wrinkle ridges 357
- companion shield fields 77–78, 83, 86, 90
- cones
 - Mars 28, 31, 32
 - Moon 22
- coronae
 - Venus 13, 14, 15, 77–93
 - volcanic features 77–78, 82–83
 - companion shield fields 77–78, 83, 86, 90
 - lava flow fields 77, 82, 83, 86

- crater-counting
 Mars 206, 207, **211**, 213, 292, 300–301
 Mercury 160, 164–169, 296, 297–300, 301, 302
- crater-scaling law 163
- craters, faulting 313–324
 Mercury 315, 316, 317–324
- Crozet Islands, magmatism 108, 112–114, 117, 119
- crustal thickness
 Lakshmi Planum 332, 334
 Venus 332–335
- cryptomaria, Moon 21–22
- dark material 59, 60, **63**, 64, 70
- Deception Island volcanic caldera 173–182, 174, 175
 collapse 181–182
 faults and fractures 176
 lithology 176, 177
 magma chamber 177, 180, 181–182
 pre-collapse palaeoreconstruction 179, 181
 Riedel shear 178–180, 181–182
 strike-slip shear zone 176, 178–182
- Discovery Rupes **274**, 282
- Divalia Fossa 432, 433
- domes
 Moon 18, 22–23
 Venus 14, 15, 77, 80, 81, 82, 89
- drift 329, 339, 342–346
- Duyfken Rupes thrust 283
- dykes
 elastic reservoir models 259–260
 graben formation, Mars 395–402
 magma transport 203–204, 209–210, 214
 self-similar clustering 206, 208–209, 213
 Vesta 434
- Earth
 lithospheric flexure 229–230, 232–233
 lithospheric thickness 220, **221**, 226
 magma transport 204
 mantle plumes 107–108, 111–117, 337, 338
 near-stationary plates 107–108, 111–117
 comparison with Tharsis 118–121
 volcanic edifices, lithospheric flexure 219, 220, 226
 volcanic rock composition 139–140
- East Africa, mantle plumes 337, 338, 339
- Eistla Regio
 gravity anomaly 332, 333, 334
 mantle plume 339, 342
- Elysium Mons
 annular graben 198, 199
 flank terraces 185, 187, 189, 197, 198
- Elysium Planitia 26, 30
- Elysium volcanic province 26, 29–30
- Eminescu Crater, ejecta 305, 308
- en echelon folds 13, 270, 283–284, 285
- Enterprise Rupes
 crater counts 167, 169
 faulted craters 316, 319
 and Rembrandt basin 160, 161, 162, 169–170
 strike-slip kinematics 272–275
- Eros, lineaments 425, 426, 427, 428–430
- fault dip 313–315, 317
- fault kinematics and geometry 313–315,
 322–324
 estimation 317
- fault slip 314, 321
 measurement 316–317
- fault strike 314, 317, 322
 throw, Rupes Recta 382, 385–388, 390
- faulting
 craters 313–324
 Mercury 8, 315, 316, 317–324
 Moon, Rupes Recta 377–391
 Venus 330–331
