

Index

Page numbers in *italics* refer to Figures. Page numbers in **bold** refer to Tables.

- acoustic response 109–111, **116**, 117, 119, 120, 122–123
- aeolian deposits, porosity 247
- Afar Rift system 214, 218
- African rift 147–148, 150, 152, 163, 214, 218
- Allan-type fault diagram 20, 22–23, 25, 32, 33, 36, 38
- Alpine orogeny 251, **252–253**, 257
- Andaman Sea, rift system 143
- Andersonian faulting 235, 238
- ant-tracking 245
- appraisal history, Hoton Field 247
- appraisal wells 197–200, 202, 204–206, 208, 210, 211
- Arctic rift 174, 176, 177
- Atlantic opening 174, 176, 190, 201, 251
- aulacogene setting 147, 148, 163

- balanced section 69
 - 2D 249–250
- basalt, potential field interpretation 169–192
- basement 182, 189
 - borehole imaging 109–123
 - Faroe–Shetland Basin 176
 - laser, fracture study 125–140
 - reservoir 3
 - Thailand 150
- bathymetry, Faroe–Shetland Basin 170, 179
- bedding intersection angle, wells 209
- BOC mark and line 99–100
- borehole
 - breakout 116, 119–122
 - comparing interpretations 83–96
- borehole imaging
 - igneous and basement rocks 109–117
 - structures 117–123
 - suggested workflow 118
- Bouguer *see* gravity
 - correction 179
- box fold 45, 46–47, 57, 58, 59
 - development 60–63
- break thrust 47, 65
- breccia 120, 207, 211
 - log response 114
- Brent Field 35, 37, 38
- brittle deformation 140, 255
- buckle fold 41–42, 49, 57, 62, 63
- buoyancy pressure 29, 34, 35, 38

- Caledonian Orogeny 169–170, 173, 176, 186, 190, 203
 - gravitational collapse 175, 201
- caliper analysis 120
- Canadian Rocky Mountains
 - fluid pressure and tectonics 69–80
- capillary threshold pressure 29–30, 33, 34, 35, 38
- casing shoe 204, 208, 210, 211
- Central African Rift 147–148, 163

- Central Graben 232, 233
- chalk reservoir
 - fracture density study 231–243
- Chiang Mai Basin 150, 151, 153, 157
- Clair Field 139–140, 169, **173**, 175, 176
 - fault seal 208–210
 - laser 3D scanning 125–126
 - polygonal faulting 206–208, 209
 - structure 200–203
 - well planning 197–211
 - appraisal wells 204–206
- Clair Ridge Fault 201–204, 206
- cleavage 60
- coal 78, 173–176
- coefficient of internal friction 238, 239, 242–243, 253
- cohesive strength 238
- collision zone 63–66, 69
- column height 2, 29–30, 33–36, 38
- compression 49
- conjugate faults 146, 160, 161–162
- conjugate fractures 240
- conjugate planes 239, 243, 253
- continental crust, stretched **184**, 190, 192
- cooling fractures 117, 119
- core orientation 99–100
 - standardizing measurements 100–107
- Corona High 171, 186, 187, 188–189, 191
- Coulomb shear stress criterion 70, 253–258
- crestal normal faults 49, 65, 66
- Cretaceous uplift 251
- crust
 - Faroe–Shetland Basin 169–192
 - potential field and velocity **184**, 185
 - thickened 150, 152
 - thinning 159, 163–164, 191–192
- curvature analysis 245
- curvature and fractures 51–53

- Darcy's Law 80

- thick- and thin-skinned fault model 249–253, 254
- thin-skinned tectonics 69
- throw:thickness modelling 220–223
- thrust 45, 65
 accommodation 43–44, 64
 development 76, 78
 seismic examples 53, 55–57
- tools
 core measurement 100, 107
 petrophysical 110, 111
 Riegl LMS scanner 130
- top reservoir structure maps 246
 interpretation variability 8, 10–14
- transmissibility multiplier 219, 221–225, 227
- trap 2–3
 inventory 19
 structural uncertainty 16–22
- triple junction 148, 214
- trishear 51
- Tropicana gold deposit 103
- truncation effect 14
- turbidite, folds 42, 43
- unloading fractures 117, 119
- unroofing, gneiss basement 151–152
- validation of model 236, 238, 239
- validity of interpretation 2–3, 95–96
- velocity and potential field 180–182
 structure **184**, 185
- vertical connectivity 222, 224, 226
- Victory Field 169, **173**
- Visund Field 35–36, 37, 38
- volume
 assessment 20–22, 23, 24–26
 from seismic 225
 increase and maturation 71–72, 73, 78
 uncertainty 24–25
- vorticity vector 103–106
- vuggy porosity 113, 119, 120
- waste disposal 3, 83, 109
- water in deformation 76–77, 78
- wavelength filtering 179–180
- weathering, basement 116, 117, 119, 121
- wedge tectonics 70, 74–75, 78, 80
- well data 234
- well performance prediction 246, 257–259
- well planning and structural geology 197–211
- well rate 247–249
- wellbore instability 199, 200, 203, 206–208, 209, 211
- Wernicke-style simple shear 192
- West Shetland Shear Zone 190, 191, 192
 Bouguer gravity map 186
- white space in interpretation 93–96
- workflow 2–3, 118, 249–254
 seismic forward modelling 214, 215–217
- Yemen, basement rocks 109, 112–115
- Young's modulus 249
- Zagros, folds and thrusts 56–58, 63, 64
 zone of disturbance, calculation of 204–206
