 Toolebuc Formation 14, 16
 tooth marks on pterosaurs 15–16
 trace fossils 11–12
 trackways 11
 Triassic, oldest pterosaur 8, 17, 69
Tropeognathus spp. 26
 T. mesembrinus 27, 33, 36, 40, 41
 Tunbridge Wells Sand Formation 221, 223

 ulna
 embryo measurements 87
 Ferron Sandstone 187–188, 188, 190
 Oxford Clay Formation 176, 176
 Upper Tunbridge Wells Sand Formation 224, 225, 227
 Vesperopterylus lamadongensis 100, 100
 Utah 11, 187
Utahdactylus kateae 105

Vectidraco daisymorrisae 46
 muscle study
 methods 47
 results 47–51
 results discussed 51–54

- Vesperopterylus lamadongensis* 95–96
 comparative anatomy 101, 103
 description 96, 100–101
 measurements **100**
 palaeoenvironment 101
 phylogeny 102, 103
 skeleton 96, 98, 99
- vertebrae and vertebral column 224, 225
 Bexhill specimen 225–227
 caudal and dorsal 173
 cervical vertebra 162, 164–165, 196–199,
 197, 198, 199
 cranial fragment 165, 166–167
 description 87–89, 96
 indeterminate 174
 thoracic or cervical 166, 167
- Villaggio del Pescatore 209, 210
Volgadraco bogolubovi 160
- Wadhurst Clay Formation 221, 223
 Weald Clay Group 223
 Wealden Supergroup 221, 223
 Wessex Formation 221, 223
 Whitby Mudstone Formation 184
- Wight, Isle of 221
 wing metacarpals
 new Italian specimen
 described 212–215
 problems of assignment 215–217
- wing phalanx 177, 177–178, 177
- wing properties 57, 89, 100
 bone morphology 57–58
 flutter limits 63–64
 maximum loading 61–63
 membrane strain and deformation
 64–66, **66**
 membrane tension 61, 62, **63**, 65, 66
 morphology 58
 section analysis 58–59, 59
 structural model 60–61
- wingspan 161
 estimates 70, 84, 217
- wrist 58
- wukongopterids 120
- Young's Modulus 59
- Zorzino Limestone Formation 8
