THE GEOLOGICAL SOCIETY

The Geological Society of London was founded in 1807 for the purposes of 'investigating the mineral structures of the earth'. It received its Royal Charter in 1825. The Society promotes all aspects of geological science by means of meetings, special lectures and courses, discussions, specialist groups, publications and library services.

It is expected that candidates for Fellowship will be graduates in geology or another earth science, or have equivalent qualifications or experience. All Fellows are entitled to receive for their subscription one of the Society's three journals: *The Quarterly Journal of Engineering Geology*, the *Journal of the Geological Society* or *Marine and Petroleum Geology*. On payment of an additional sum on the annual subscription, members may obtain copies of another journal.

Membership of the specialist groups is open to all Fellows without additional charge. Enquiries concerning Fellowship of the Society and membership of the specialist groups should be directed to the Executive Secretary, The Geological Society, Burlington House, Piccadilly, London W1V 0JU.

Contents

MORTON, A. C., HURST, A. & LOVELL, M. A. Introduction	vii
Sedimentology	
LUTHI, S. M. Sedimentary structures of clastic rocks identified from electrical borehole images	3
HARKER, S. D., MCGANN, G. J., BOURKE L. T. & ADAMS, J. T. Methodology of formation microscanner image interpretation in Claymore and Scapa Fields (North Sea)	11
RIDER, M. H. Gamma-ray log shape used as a facies indicator: critical analysis of an oversimplified methodology	27
HERWEIJER, J. C., HOCKER, C. F. W., WILLIAMS, H. & EASTWOOD, K. M. The relevance of dip profiles from outcrops as reference for the interpretation of SHDT dips	39
KING, D. E. Incorporating geological data in well log interpretation	45
MOSS, B. P. Stochastic reservoir description: a methodology	57
GRIFFITHS, C. M. The language of rocks: an example of the use of syntactic analysis in the interpretation of sedimentary environments from wireline logs	77
NURMI, R., CHARARA, M., WATERHOUSE, M. & PARK, R. Heterogeneities in carbonate reservoirs: detection and analysis using borehole electrical imagery	95
DORFMAN, M. H., NEWAY, J.-J. & COATES, G. R. New techniques in lithofacies determination and permeability prediction in carbonates using well logs	113
Stratigraphic correlation	
WORTHINGTON, P. F. Sediment cyclicity from well logs	123
GRIFFITHS, C. M. & BAKKE, S. Interwell matching using a combination of petrophysically derived numerical lithologies and gene-typing techniques	133
BUCKLEY, D. K. & OLIVER, D. Geophysical logging of water exploration boreholes in the Deccan Traps, Central India	153
Mineralogy and geochemistry	
HERRON, M. M. & HERRON, S. L. Geological applications of geochemical well logging	165
ANDERSON, R. N., DOVE, R. E. & PRATSON, E. Geochemical well logs: calibration and lithostratigraphy in basaltic, granitic and metamorphic rocks	177
BREWER, T. S., LOVELL, M. A., HARVEY, P. K., PELLING, R., ATKIN, B. P. & ADAMSON, A. Preliminary geochemical results from DSDP/ODP Hole 504B: a comparison of core and log data	195
PRIMMER, T. J., KERR, S. A. & MYERS, K. J. Feasibility of in situ elemental analysis in mudrock evaluation	203
HURST, A. Natural gamma-ray spectrometry in hydrocarbon-bearing sandstones from the Norwegian Continental Shelf	211
HUMPHREYS, B. & LOTT, G. K. An investigation into nuclear log responses of North Sea Jurassic reservoirs using mineralogical analysis	223
STOCKS, A. E. & LAWRENCE, S. R. Identification of source rocks from wireline logs	241

Identification of faults and fractures

FERTL, W. H. Circumferential acoustic logs detect natural fractures and determine their orientation	255
LEHNE, K. A. Fracture detection from logs of North Sea chalk	263
RÖNNINGSLAND, T. M. Structural interpretation of dipmeter results in the Gullfaks Field	273
DEVILLIERS, M. C. & WERNER, Ph. Examples of fault identification using dipmeter data	287
GOLDBERG, D., SPEED, D., WILKINSON, C. & SCHOLZ, E. A correlation of hydraulic conductivities from pulse tests with sonic log amplitudes	297

Physical properties

BELL, J. S. Investigating stress regimes in sedimentary basins using information from oil industry wireline logs and drilling records	305
EVANS, C. J. & BRERETON, N. R. In situ crustal stress in the United Kingdom from borehole breakouts	327
LOVELL, M. A. & PEZARD, P. A. Electrical properties of basalts from DSDP Hole 504B: a key to the evaluation of pore space morphology	339
ENTWISLE, D. C. & MCCANN, D. M. An assessment of the use of Christensen's equation for the prediction of shear wave velocity and engineering parameters	347
Index	355
