| SHARMA, R., VILLA, I. M. & KUMAR, S. Crustal architecture and evolution of the Himalaya–Karakoram–Tibet Orogen: introduction  | 1   |
| PORETTI, G., MORSUT, F. & PETTENATI, F. Nepal earthquake evidence from GNSS data at the Everest Pyramid Lab   | 7   |
| KUMAR, N., AODIA, A., GUIDARELLI, M., BABU, V. G., HAZARIKA, D. & YADAV, D. K. Delineation of lithosphere structure and characterization of the Moho geometry under the Himalaya–Karakoram–Tibet collision zone using surface-wave tomography   | 19  |
| THAKUR, V. C., JAYANGONDA PERUMAL, R. & JOE VIVEK, V. Seismotectonics of central and NW Himalaya: plate boundary–wedge thrust earthquakes in thin- and thick-skinned tectonic framework   | 41  |
| ADLAKHA, V., PATEL, R. C., KUMAR, A. & LAL, N. Tectonic control over exhumation in the Arunachal Himalaya: new constraints from Apatite Fission Track Analysis  | 65  |
| PUNIYA, M. K., PATEL, R. C. & PANT, P. D. Structural and thermochronological studies of the Almora klippe, Kumaun, NW India: implications for crustal thickening and exhumation of the NW Himalaya  | 81  |
| BOSE, N. & MUKHERJEE, S. Field documentation and genesis of the back-structures from the Garhwal Lesser Himalaya, Uttarakhand, India  | 111 |
| MONTEMAGNI, C., MONTOMOLI, C., IACCARINO, S., CAROSI, R., JAIN, A. K., MASSONNE, H.-J. & VILLA, I. M. Dating protracted fault activities: microstructures, microchemistry and geochronology of the Vaikrita Thrust, Main Central Thrust zone, Garhwal Himalaya, NW India                                  | 127 |
| IMAYAMA, T., TAKESHITA, T., YI, K. & FUKUYAMA, M. Early Oligocene partial melting via biotite dehydration melting and prolonged low-pressure–low-temperature metamorphism of the upper High Himalaya Crystalline Sequence in the far east of Nepal  | 147 |
| BROSKA, I., BAČÍK, P., KUMAR, S., JANÁK, M., KURYLO, S., FILIP, J., BAZARNIK, J. & MIKUŠ, T. Myrmekitic intergrowth of tourmaline and quartz in eclogite-hosting gneisses of the Tso Morari ultrahigh-pressure metamorphic terrane (Eastern Ladakh, India): a possible record of high-pressure conditions | 175 |
| KINGSON, O., BHUTANI, R., BALAKRISHNAN, S., DASH, J. K. & SHUKLA, A. D. Subduction-related Manipur Ophiolite Complex, Indo-Myanmar Ranges: elemental and isotopic record of mantle metasomatism   | 195 |
| CHAUHAN, D. S., SHARMA, R. & RAO, D. R. A new occurrence of lazulite from the Main Central Thrust in Kumaun Himalaya, India: fluid inclusion, EPMA and Raman spectroscopy focusing on lazulite in a highly tectonized zone  | 211 |
| HERI, A. R., BAHL, J. & VILLA, I. M. Geochemical discrimination and petrogenetic affinities of dykes intruding the Ladakh batholith, NW India   | 231 |
| GODIN, L., SOUCY LA ROCHE, R., WAFFLE, L. & HARRIS, L. B. Influence of inherited Indian basement faults on the evolution of the Himalayan Orogen  | 251 |
| OGASAWARA, M., FUKUYAMA, M., SIDDIQUI, R. H. & ZHAO, Y. Origin of the Ordovician Mansehra granite in the NW Himalaya, Pakistan: constraints from Sr–Nd isotopic data, zircon U–Pb age and Hf isotopes   | 277 |

|  |     |
|--|-----|
| BIKRAMADITYA, R. K., SINGH, A. K., CHUNG, S.-L., SHARMA, R. & LEE, H.-Y. Zircon U–Pb ages and Lu–Hf isotopes of metagranitoids from the Subansiri region, Eastern Himalaya: implications for crustal evolution along the northern Indian passive margin in the early Paleozoic | 299 |
| SEN, A., SEN, K., SRIVASTAVA, H. B., SINGHAL, S. & PHUKON, P. Age and geochemistry of the Paleoproterozoic Bhatwari Gneiss of Garhwal Lesser Himalaya, NW India: implications for the pre-Himalayan magmatic history of the Lesser Himalayan basement rocks                    | 319 |
| PATHAK, M. & KUMAR, S. Petrology, geochemistry and zircon U–Pb–Lu–Hf isotopes of Paleoproterozoic granite gneiss from Bomdila in the western Arunachal Himalaya, NE India  | 341 |
