## Contents

Dedication vii  
Preface ix  

**Background and importance**

*Fitzpatrick, R. W. and Donnelly, L. J.* An introduction to forensic soil science and forensic geology: a synthesis 1  
*Kobus, H. and Robertson, J.* The importance of forensic soil science and geology being connected to mainstream forensic science 33  

**Search for burials**

*Ruffell, A. and Barry, L.* The desktop study – an essential element of geoforensic search: homicide and environmental cases (west Belfast, Northern Ireland, UK) 39  
*McKinley, J. and Ruffell, A.* Geographical Information Science (GIS), spatial sampling and sediment variability examined using a case of manslaughter 55  
*Barone, P. M. and Di Maggio, R. M.* Dealing with different forensic targets: geoscientists at crime scenes 87  
*Molina, C. M. and Pringle, J. K.* Comparison of geophysical and botanical results in simulated clandestine graves in rural and tropical environments in Colombia, South America 107  
*Donnelly, L.* A standard operating procedure (SOP), for soil sampling, for the detection of volatile organic compounds and leachate associated with human decomposition from a shallow, unmarked, homicide grave 123  

**Trace evidence**

*Dixon, R. D. and Merkle, R. K. W.* Identifying the source of illicit gold from South America 135  
*Salvador, F. A. da S., Nogueira e Silva, M. P., de Oliveira Mascarenhas, R. and Rumbelsperger, A. M. B.* The application of forensic geology to investigate the substitution of zinc ingots between China and Brazil 147  
*Guo, H., Wang, P., Hu, C., Zhu, J., Yang, X., Quan, Y., Mei, H. and Li, J.* A case study in forensic soil examination from China 155  
*Raven, M. D., Fitzpatrick, R. W. and Self, P. G.* Trace evidence examination using laboratory and synchrotron X-ray diffraction techniques 165
