- acritarchs 297  
aeration *see* oxygen status  
Agulhas Bank 61, 80, 108  
Al Hasa 193, 195  
Alexandria-Wonarah High 262–3, 265–6, 269  
algae and phosphogenesis 175, 176, 197  
    *see also* micro-organisms  
Algeria, phosphates of 2  
allochthonous phosphates 240  
Alpine Helvetic Unit *see* Helvetic Shelf  
America (North) *see* Canada; USA  
Amman Formation 193  
anoxic events and phosphogenesis 9, 292, 299  
apatite family  
    sedimentary  
        composition 23  
        controls on formation 318–19  
        skeletal 294  
        X-ray analysis 23  
    synthetic  
        geochemistry 33–4  
        synthesis experiments 34–5  
            barium content 35–9  
            strontium content 41–2  
Aravalli Supergroup 307  
    chemical analysis 315–16  
    geological setting 313  
    micro-organism effects 316–18  
    petrography 313–14  
Arthur Creek Formation 265, 266, 267, 270  
Asia, phosphates of 291  
Atdabanian Stage 292  
Austral–Asiatic Phosphogenic Province 5–6  
Australia, phosphates of  
    continental *see* Daly Basin; Duchess Basin;  
        Georgina Basin; Wiso Basin  
    offshore Neogene/Quaternary compared 61, 62,  
        76–82  
    chemistry/geochemistry 66–76  
    isotopic composition 98–100  
    oxidation state 93–6  
    pore water 91  
    sulphate reactions 96–8  
    controls on formation 82–4  
        bacterial effects 98  
    diagenetic model 100–8  
    mineralogy 65  
    nodule characteristics 64–5  
    sedimentology 63–4, 89–90  
Austria 238–39, 151–53  
authigenic minerals and phosphogenesis 218–19, 233  
  
bacteria and phosphogenesis  
    history of interpretation 11–12  
    regional studies  
        Australia  
            methods 90–1  
            results 98, 112  
            synthesis and model proposed 107–8  
        France 160, 161, 164  
        Israel 177  
        Jordan 197  
        Siberia 225  
        *see also* micro-organisms  
Baltic Coast phosphates  
    climatic interpretation 258  
    history of exploitation 253–4  
    palaeogeography 256–8  
    petrography 256  
    stratigraphy and structure 254–6  
barium in phosphates 34, 41–2  
bathymetry and phosphogenesis 177  
Baturin Cycles and phosphogenesis 240, 245, 247, 248  
bed amalgamation and phosphogenesis 219  
Beetle Creek Formation 265, 267  
Belgium, phosphates of 2  
berthierine 223  
Bijawar Group 307–8  
biodetritral phosphates 179, 180–4  
biological effect on phosphogenesis *see* algae;  
    bacteria; micro-organisms  
biomineralization and phosphogenesis 292  
biosparite and phosphogenesis 210  
bioturbation and burrowing in phosphogenesis 174,  
    225, 240  
Birmanian Formation 309  
bitumen and phosphogenesis 176  
Bone Valley Formation 5  
    depositional history 144–5  
    mineralogy 149–50  
    stratigraphy 141–3  
Border Water Hole Formation 265, 267  
brachiopods, phosphatized 294, 297  
Britain, phosphates of 1–2 *see also* North Sea  
Brunette Sub-Basin 262–3, 266  
Burke River Embayment 262–3, 265–6  
burrow fills and phosphogenesis 174, 225, 240  
  
California, Southern Borderland phosphates of 80  
Cambrian phosphates  
    Austral–Asiatic Province 5–6  
    Georgina Basin 4, 49  
    exploration history 261–2  
    isotopic analysis 274, 276  
    methods of phosphogenesis 267–9

  - humic analysis 50, 51, 516
  - mineralogy 150–2
- Tommotian Stage 290, 291, 292
- tommotiids, phosphatic 294
- Top Springs Limestone 265, 267
- total organic carbon *see* organic carbon
- transgressions *see* sea level change
- trilobites, phosphatized 292
- Tunisia, phosphates of 2, 49, 56
  
- Udaipur phosphates
  - chemical analysis 315–16
  - composition 307
  - geological setting 313
  - micro-organism effects 316–18
  - petrography 313–14
- Undilla Sub-basin 262–3, 265–6, 269

- Upwelling effects on phosphogenesis 3, 4  
 Cretaceous evidence 217  
 Proterozoic–Cambrian evidence 292, 299  
 Recent evidence 63, 125  
 sediments and chemistry 89–91  
   bacterial analyses 90–1, 98, 107–8  
   diagenesis 100–4  
   lead isotope analyses 91, 98–100, 104  
   oxygen levels 93–6  
   sulphate levels 96–8  
 uranium isotopes in phosphates 120–1  
 USA *see* California; Carolina; Florida; Phosphoria  
   Formation; Pungo River Formation Western  
   Mountain Field  
 USSR *see* Estonia; Russia; Siberia
- Vampire Formation 299  
 Varswater Formation 120  
 veneers of phosphate 157, 158–60  
 vivianite 218–19  
 volcanism and phosphogenesis 4, 132
- weathering regimes and phosphogenesis 219, 231–2  
 Western Mountain Field phosphates 49, 55  
 winnowing and phosphogenesis 219, 240  
 Wiso Basin 262–3, 266, 268  
 worm tubes, phosphatized 297
- XRD and phosphate compositions  
 India 313–14  
 Siberia 226–30  
 USA 23, 50, 52–3  
 XRF 225
- Yenisei Bay phosphates  
 clay mineralogy 226–30  
 composition 224–6  
 conditions of accumulation 231–3  
 lithology 223–4
- Yorktown Formation 133, 139–41  
 depositional history 143–4  
 mineralogy 148–9
- Zhongyicun phosphates 290
