HURST, A., GRIFFITHS, C. M. & WORTHINGTON, P. F. Introduction	vii
<b>Sedimentology and Stratigraphic correlation</b>	
SLATT, R. M., JORDAN, D. W., D'AGOSTINO, A. E. & GILLESPIE, R. H. Outcrop gamma-ray logging to improve understanding of subsurface well log correlations	3
HATTON, I. R., REEDER, M., NEWMAN, M. St J. & ROBERTS, D. Techniques and applications of petrophysical correlation in submarine fan environment, early Tertiary sequence, North Sea	21
BOURKE, L. T. Sedimentological borehole image analysis in clastic rocks: a systematic approach to interpretation	31
PEZARD, P. A., HISCOTT, R. N., LOVELL, M. A., COLLELA, A. & MALINVERNO, A. Evolution of the Izu–Bonin intraoceanic forearc basin, western Pacific, from cores and FMS images	43
SALIMULLAH, A. R. M. & STOW, D. A. V. Application of FMS images in poorly recovered coring intervals: examples from ODP Leg 129	71
SALIMULLAH, A. R. M. & STOW, D. A. V. Wireline log signatures of resedimented volcanoclastic facies, ODP Leg 129, West Central Pacific	87
RUHOVETS, N., RAU, R., SAMUEL, M., SMITH, H. Jr. & SMITH, M. Evaluating thinly laminated reservoirs using logs with different vertical resolution	99
BØLVIKEN, E., STORVIK, G., NILSEN, D. E., SIRING, E. & VAN DER WEL, D. Automated prediction of sedimentary facies from wireline logs	123
CAMERON, G. I. F. Analysis of dipmeter data for sedimentary orientation	141
<b>Fractures and stress</b>	
HILLIS, R. R. & WILLIAMS, A. F. Borehole breakouts and stress analysis in the Timor Sea	157
YASSIR, N. A. & DUSSEAULT, M. B. Stress determination in southwestern Ontario from borehole logs	169
COWGILL, S. M., MEREDITH, P. G., MURRELL, S. A. F. & BRERETON, N. R. In situ stress orientations in the Witch Ground Graben, North Sea, revealed by borehole breakouts: preliminary results	179
HORNBY, B. E. & LUTHI, S. M. An integrated interpretation of fracture apertures computed from electrical borehole scans and reflected Stonely waves	185
GOLDBERG, D., BROGLIA, C. & BECKER, K. Fracture permeability and alteration in gabbro from the Atlantis II Fracture Zone	199
BELL, J. S., CAILLET, G. & ADAMS, J. Attempts to detect open fractures and non-sealing faults with dipmeter logs	211
BREMER, M. H., KULENKAMPFF, J. & SCHOPPER, J. R. Lithological and fracture response of common wireline logs in crystalline rocks	221
MACLEOD, C. J., PARSON, L. M., SAGER, W. W. and the ODP Leg 135 Scientific Party. Identification of tectonic rotations in boreholes by the integration of core information with Formation MicroScanner and Borehole Televiewer images	235
ADAMS, J. T., AYODELE, J. K., BEDFORD, J., KAARS-SIJPESTEIJN, C. H. & WATTS, N. L. Application of dipmeter data in structural interpretation, Niger Delta	247
JACKSON, P. D., SHEDLOCK, S., WILLIS-RICHARDS, J. & GREEN, A. S. P. Enhanced resolution resistivity logging for fracture studies	265

**Physical properties**

RAAEN, A. M. High-frequency pseudo-Rayleigh waves as a new indicator of shear velocity	277
MCCANN, C. & SOTHCOTT, J. Laboratory measurements of the seismic properties of sedimentary rocks	285
GRIFFITHS, C. M., BRERETON, N. R., BEAUSILLON, R. & CASTILLO, D. Thermal conductivity prediction from petrophysical data: a case study	299
MCCANN, D. M. & ENTWISLE, D. Determination of Young's modulus of the rock mass from geophysical well logs	317
GRAN, K., BJØRLYKKE, K. & AAGAARD, P. Fluid salinity and dynamics in the North Sea and Haltenbanken basins derived from well log data	327
ALM, P.-G. The Temperature Decay Log—a difference approach of presenting a temperature survey	339
ØLGAARD, P. L. A new approach to the interpretation of nuclear borehole logs	349

**Mineralogy and geochemistry**

HARVEY, P. K. & LOVELL, M. A. Downhole mineralogy logs: mineral inversion methods and the problem of compositional colinearity	361
MYERS, K. J. & JENKYN, K. F. Determining total organic carbon contents from well logs: an intercomparison of GST data and a new density log method	369
SELLEY, R. C. The third age of wireline log analysis: application to reservoir diagenesis	377
CHESHIRE, M. J. & SELLWOOD, B. W. Sandstone diagenesis: framework of a forward modelling approach by integrating wireline and other geological data	389
