

# Index

- Aalenian, Whitby, 124  
abandonment deposits, 103, 108, 150, 269, 298  
ablation events, 69  
Absaroka thrust plate, 322–4  
accretionary palaeosols, 24  
adhesion ripples, 263, 295  
aggradation  
  sandurs, 62–3, 66, 71  
  Willwood Formation, 24, 26  
aggradation rates, 38, 46–7  
algal limestones, 206, 210–11  
Algeria, earthquakes, 16  
Algodones, 173  
alluvial fans  
  footwalls, 13  
  formation of, 11  
  hangingwalls, 14  
  Iceland, 53  
  Rotliegend, 302, 315  
  Rough Gas Field, 266  
alluvial plains, 47  
alluvial ridges, 46  
anhydrites, 182, 276, 286, 298, 303  
anisotropy, fluvial reservoirs, 2  
ankerite, 287, 346  
Ann Field, 303  
Anschutz East Ranch Field, 321–38  
antecedent drainage, 16  
Arabian Gulf, 286  
attenuation, 424  
Auk Field, 377–97  
autocycles, 162, 199  
avalanche facies, 169–70, 234, 294  
axial channels, 15  
axial drainage, 11–12, 15  
Aztec Sandstone, 200
- backswamps, 100, 106, 113  
Bagnold surfaces, 171–2  
bajadas, 13–14  
bank erosion potential, 37  
bankfull depth, 34–5, 37–8, 47, 80  
bankfull discharge, 9, 33, 41, 44  
barchan dunes, 170, 255, 263, 299–301  
Barremian Stage, Texas, 98  
Barren Red Measures, 19–20  
baryte, 352, 357  
Basalt Gravel Sheet, 63  
base-level changes, 137, 163  
basin subsidence, 27, 163, 302–3  
basin types, 7–8  
Baton Rouge, 39, 42  
Beara peninsula, 161  
bed roughness, 40  
bed thicknesses, sandurs, 71  
bedforms, 299  
bedload transport, 12, 39, 41–2, 47, 109–10  
Bighorn Basin, 23, 27
- bioturbation  
  deltaic deposits, 86  
  Kayenta Formation, 205  
  palaeosols, 24  
  Rotliegend, 298–9  
  Tumblagooda Sandstone, 220  
bitumen, 324, 331  
bivalves, 146  
black mudrocks, 106, 134, 149  
black shales, 108  
Bootle Fault, 247  
borehole spacing, 3  
boundary shear stress, 61  
bounding surfaces  
  aeolian, 2, 167  
  erosional, 17  
  Kayenta Formation, 201, 216  
  Page sandstone, 368  
  recognition, 80–1, 304–6  
Brahmaputra River, 37  
braid-plains  
  Pennant Sandstone, 143, 151  
  Texas, 112  
  Tumblagooda Sandstone, 226  
braided rivers, 37, 55, 73  
break-up features, 224, 227  
Brent Group, 126, 138, 436  
Bridgnorth Sandstone, 300  
Brithdir Beds, 146  
Broad Fourteens Basin, 315  
Brownstones Group, 112  
Buchan Field, 154  
buckle folds, Hercynian, 19  
bulk porosity, 361  
Bunter Sandstone, 154, 175  
Burghead, 340–1, 344  
Burghead Beds, 339–41, 344, 346  
burrows, 204, 206, 219
- Cadomin Formation, 154  
Calamus River, 254  
calcite, 126, 280, 283, 285, 287, 412  
calcium carbonate nodules, 24–5  
calcrete, 286, 401, 412  
caliche, 346  
Cape Basin, Spain, 54  
carbonate palaeosols, 85–7  
Carboniferous, southern North Sea, 19  
Carnian, Crawford Field, 418  
Carson River basin, 18  
Castilian Meseta, 83  
Cedar Mesa Sandstone, 173, 177  
Cefn Glas, 144  
cementation, 182, 188  
  Hopeman Sandstone, 352, 355, 357, 360  
Central North Sea, 379  
channel avulsion, 16–17, 35, 46, 85  
  autocycles, 162
