# THE GEOLOGICAL SOCIETY

The Society was founded in 1807 as the Geological Society of London and is the oldest geological society in the world. It received its Royal Charter in 1825 for the purpose of 'investigating the mineral structure of the Earth'. The Society is Britain's national society for geology with a Membership of 7500 (1994). It has countrywide coverage and approximately 1000 members reside overseas. The Society is responsible for all aspects of the geological sciences including professional matters. The Society has its own publishing house which produces the Society's international journals, books and maps, and which acts as the European distributor for publications of the American Association of Petroleum Geologists and the Geological Society of America.

Fellowship is open to those holding a recognized honours degree in geology or cognate subject and who have at least two years relevant postgraduate experience, or who have not less than six years relevant experience in geology or a cognate subject. A Fellow who has not less than five years relevant postgraduate experience in the practice of geology may apply for validation and subject to approval, may be able to use the designatory letters C. Geol (Chartered Geologist).

Further information about the Society is available from the Membership Manager, The Geological Society, Burlington House, Piccadilly, London W1V 0JU, UK. The Society is a Registered Charity No. 210161.

# Contents

DE HAAN, H. J. Introduction	1
<b>Reservoir characterization</b>	
JONES, A., DOYLE, J., JACOBSON, T. & KJØNSVIK, D. Which sub-seismic heterogeneities influence waterflood performance? A case study of a low net-to-gross fluvial reservoir	5
KING, M. J. Application and analysis of a new method for calculation tensor permeability	19
KJØNSVIK, D. & ALVESTAD, J. An analytical method for calculating the performance of heterogeneous reservoirs and use in uncertainty analysis	29
KOKKEDEE, J. A. & BOUTKAN, V.K. Towards measurement of capillary pressure and relative permeability at representative wettability	43
BAKER, L. E. Three-phase relative permeability of water-wet, intermediate-wet and oil-wet sandstone	51
KALAYDJIAN, F., VIZIKA, O., MOULU, J.-C. & MUNKERUD, P.-K. The role of wettability and spreading in gas injection processes under secondary conditions	63
LONGERON, D., KALAYDJIAN, F. & BARDON, C. Gas – oil capillary pressure measurements at reservoir conditions: effect of interfacial tension and connate water saturation	73
HEFFER, K. J. & KOUTSABELOULIS, N. C. Stress effects on reservoir flow: numerical modelling used to reproduce field data	81
<b>Water and gas injection methods</b>	
JØRGENSEN, M. & STENBY, E. H. Modelling of vapour – liquid – liquid equilibria of CO <sub>2</sub> – crude oil mixtures	89
DALLAND, M. & HANSEN, J. E. Foam barriers for thin oil rims: gas blockage with hydrocarbon foams	99
HANSEN, J. E., SURGUCHEV, L. M., SVORSTØL, I. & BLAKER, T. SAGA injections: a new combination IOR process for stratified reservoirs	111
HAZLETT, R. D. Soluble gas injection for waterflood profile modification	125
KING, M. J., BLUNT, M. J., MANSFIELD, M. & CHRISTIE, M. A. Rapid evaluation of the impact of heterogeneity on miscible gas injection	133
DALEN, V., INSTEJFORD, R. & KRISTENSEN, R. A WAG injection pilot in the Lower Brent Formation at the Gullfaks Field	143
HALLAM, R. J., MA, T. D. & RAINBOLD, E.W. Performance evaluation and optimization of the Kuparuk hydrocarbon miscible water-alternating-gas flood	153
WILCOX, T. C., POLZIN, M. W., KUO, S. S. & HUMPHREY, K. J. Prudhoe Bay: infill drilling in gravity dominated WAG floods	165
NIKO, H. & OVENS, J. Waterflooding under fracturing conditions: from theoretical modelling to field processes	175
<b>Oil rim development</b>	
ZAKIROV, S. N., SHANDRYGIN, A. N. & ROMANOV, A.S. A new approach to oil rim development	187
MADSEN, T., LIE, O. & VELVIN, M. Improving oil recovery from Oseberg Gamma North using horizontal wells	197
