THE GEOLOGICAL SOCIETY

The Society was founded in 1807 as the Geological Society of London and is the oldest geological society in the world. It received its Royal Charter in 1825 for the purpose of 'investigating the mineral structure of the Earth'. The Society is Britain's national society for geology with a Membership of 7500 (1993). It has countrywide coverage and approximately 1000 members reside overseas. The Society is responsible for all aspects of the geological sciences including professional matters. The Society has its own publishing house which produces the Society's international journals, books and maps, and which acts as the European distributor for publications of the American Association of Petroleum Geologists and the Geological Society of America.

Fellowship is open to those holding a recognized honours degree in geology or cognate subject and who have at least two years relevant postgraduate experience, or who have not less than six years relevant experience in geology or a cognate subject. A Fellow who has not less than five years relevant postgraduate experience in the practice of geology may apply for validation and subject to approval, may be able to use the designatory letters C. Geol (Chartered Geologist).

Further information about the Society is available from the Membership Manager, The Geological Society, Burlington House, Piccadilly, London W1V 0JU, UK.

Contents

| | |
|---|-----|
| Introduction | vii |
| Mechanics, dynamics and geometry of basin inversion | |
| SIBSON, R. H. Selective fault reactivation during basin inversion: potential for fluid redistribution through fault-valve action | 3 |
| BRODIE, J. & WHITE, N. The link between sedimentary basin inversion and igneous underplating | 21 |
| LOWELL, J. D. Mechanics of basin inversion from worldwide examples | 39 |
| KNOTT, S. D., BEACH, A., WELBON, A. I. & BROCKBANK, P. J. Basin inversion in the Gulf of Suez | 59 |
| MACGREGOR, D. S. Hydrocarbon habitat and classification of inverted rift basins | 83 |
| Modelling of basin inversion | |
| McCLAY, K. R. The geometrics and kinematics of inverted fault systems: a review of analogue model studies | 97 |
| EISENSTADT, G. & WITHJACK, M. O. Estimating inversion: results from clay models | 119 |
| KELLER, J. V. A. & McCLAY, K. R. 3D sandbox models of positive inversion | 137 |
| Recognition and measurement of basin inversion | |
| GREEN, P. F., DUDDY, I. R. & BRAY, R. J. Applications of thermal history reconstruction in inverted basins | 149 |
| HILLIS, R. R. Regional Tertiary exhumation in and around the United Kingdom | 167 |
| MENPES, R. J. & HILLIS, R. R. Quantification of tertiary exhumation from sonic velocity data, Celtic Sea/South-Western Approaches | 191 |
| Case studies: Americas | |
| ULIANA, M. A., ARTEAGA, M. E., LEGARRETA, L., CERDÁN, J. J. & PERONI, G. O. Inversion structures and hydrocarbon occurrence in Argentina | 211 |
| HOMOVC, J. F., CONFORTO, G. A., LAFOURCADE, P. A. & CHELOTTI, L. A. Fold belt in the San Jorge Basin, Argentina: an example of tectonic inversion | 235 |
| SINCLAIR, I. K. Transpressional inversion due to episodic rotation of extensional stresses in Jean d'Arc Basin, offshore Newfoundland | 249 |
| Case studies: Europe | |
| THOMAS, D. W. & COWARD, M. P. Late Jurassic–Early Cretaceous inversion of the northern East Shetland Basin, northern North Sea | 275 |
| HOOPER, R. J., LENG SIANG GOH & DEWEY, F. The inversion history of the northeastern margin of the Broad Fourteens Basin | 307 |
