

Index

- Aberdeen Ground Formation 96, 100
- acceleration matrix 35
- accretionary complexes 140
- accumulative flow 33
- acoustic impedance 9
- Alba Field 92
- Alboran Sea 117, 119
- Alboran Trough 131
- alluvial deposits, pebble fabrics 60
- Almeria Canyon 116, 130–2
- amalgamation clasts 228, 234
- Andarax System 130
- Andrew Member 180, 197
- Andrew sequence 78
- anisotropy, permeability 61
- ankerite 181, 188, 194
- Antarctic Peninsula 138
- antidunes, pyroclastic flows 54
- appraisal 93
- Atlantic Rift system 156

- bacteria 190, 192, 196
- Balder Field 92, 100
- Balder sequence 78
- Balder Tuff 79
- Balmoral Field 180, 186
- basin formation 178
- basin inversion 142
- basin networks, Spain 117
- beach deposits 167
- bedding, graded 31
- bedforms, Solitary Channel 128–30
- bedload shear 56
- bentonite horizons 100
- Betic Cordillera 117, 119
- bicarbonates 190, 192, 195–6
- biodegradation 2, 190, 192, 194, 197
- biostratigraphy
 - Kimmeridge Clay 159
 - Solitary Channel 129–30
- bioturbation
 - megaturbidites 106
 - Rona Member 167–8
 - tuff beds 82
- biozones, Rona Member 171
- bores 40–1
- Botany Bay Group 140
- Brae Formation 201
- breccias, Laacher See 53
- Brent Group 214
- Bruce-Beryl embayment 74, 77, 179
- burrows 106, 109, 110, 167–8

- calcite 181, 184
- canyons, sediment supply to 25, 81
- carbon isotope studies 190–1, 195
- carbonate cementation 162, 177
- carbonates
 - photomicrographs 183
 - Pyrenees 112
- cementation depth 188
- cemented layers 197
- chair display 99
- channel development 2
- channel erosion 18
- channel margins 239
- channel thalweg deposits 128, 130
- channel-fill architecture 119, 128–9
- channel-lobe complexes 239
- channels
 - analysis 115–16
 - sinuous 18, 22
- chaotic sections 7–8
- chute-pool structures 54
- clastic intrusion 2
- clasts
 - bed position 223
 - density 223
 - flow-modified 234, 237
 - lateral extent 223
 - orientation 52, 223
 - origins 237
 - processes 227, 233
 - rip-up 51
 - shape 223
 - sizes 221
 - sorting 223
 - sphericity 223
- clay bonds 65
- clay deposits, experimental 18–19
- clay lobes 20
- climbing ripples 37
- closure 93
- clustered clasts 229, 235
- coastal drainage 23
- coastal onlap 79
- cobbles, orientation 52
- coccoliths 129
- composite sills 90
- concretions
 - carbonate 2
 - morphology 181
- conglomerate plugs 128
- conglomerates, channel 141
- conjugate shear 86–7

- contacts, faulted 92
- coprolites 82, 194
- core logs 105–7, 109
- correlation, without models 10
- Crawford Anticline 85, 179
- Crawford Ridge 82
- current directions, changes in 40
- debris flows
 - experimental 19, 22, 25–6
 - gliding 65
 - Solitary Channel 130
 - Viking Graben 156
- debrites 111–12, 235
- deformation features 2, 84
- deformation models 90–1
- delta progradation 79
- density currents 14, 16
- depletive flow 33, 36
- depositional environments, shale clasts 238–9
- depositional models
 - Balder sandstones 84
 - West Shetland Basin 155, 172
- depositional processes, instabilities in 8
- detached lobes 25
- detrital minerals, Sr ratios 191–92
- dewatering
 - rapid 100
 - syn-depositional 82
- diagenesis
 - Gustav Group 144
 - and reservoir quality 196–7
 - volcanic ash 190
- diapirs
 - as obstacles 47
 - sandstone 92
- dish structures 66, 82
- dispersed clasts 232, 236
- distal deposition, patterns in 7
- distances, inter-well 10
- distributary channels, deposition in 8
- dyke injection 73
- dykes
